Abstract

Purpose – Sustainable management practices are crucial environmental initiatives implemented by manufacturing organisations to mitigate growing social and ecological problems and progress operational and economic successes. The theory of constraints highlights the essence of adopting sustainability practices, including green management, lean management, top management commitment and reverse logistics, to address production constraints and achieve manufacturing performance. However, more empirical evidence is required to determine whether sustainability practices affect manufacturing performance metrics in economies like Ghana. This research establishes whether adopting sustainable management practices impacts manufacturers' operational and sustainable performance.

Design/methodology/approach – This deductive research adopts an explanatory research design. Survey data was administered to 285 managers in 5,329 manufacturing businesses in Ghana. The data was processed and analysed with SmartPLS4.1 and structural equation modelling.

Findings – Green management and top management commitment positively predict the performance aspects of manufacturing organisations in Ghana. Also, reverse logistics and lean management practices improve firms' operational, social and environmental performance, except for economic performance. It is concluded that manufacturing businesses that embrace sustainable management practices can improve their performance.

Research limitations/implications – Although the study's objectives were primarily achieved, it was geographically restricted to Ghana, a developing country. Also, it was carried out within the boundaries of explanatory design and structural equation modelling.

Practical implications – It provides comprehensive information to assist owner-managers in prioritising heavy investments in appropriate sustainable management practices. It will also encourage them to develop a sustainability culture within their firms and supply chains to fast-track and sustain the adopted practices. These measures will enable manufacturing organisations to effectively handle growing sustainability problems to leverage their sustainable and operational performance.

Leonard Onyiriuba, 2016-10-04 *Bank Risk Management in Developing Economies Addressing the Unique Challenges of Domestic Banks* provides an up to date resource on how domestically based banks in emerging economies can provide financial services for all economic sectors while also contributing to national economic development policies. Because these types of bank are often exposed to risky sectors they are usually set apart from foreign subsidiaries and thus need risk models that foreign based banks do not address. This book is the first to identify these needs proposing solutions through the use of case studies and analyses that illustrate how developing economic banking crises are often rooted in managing composite risks. The book represents a departure from classical literature that focuses on assets liabilities and balance sheet management by which developing economy banks like their counterparts elsewhere have not fared well. Contains fifty cases that reinforce risk management best practices. Provides a consistent chapter format that includes abstract keywords learning focus and outcomes. Summaries questions and glossaries conclude each chapter. *Urban and Industrial Management in Developing Countries* Wilfrido Cruz, Kazuhiko Takemoto, Jeremy J. Warford, 1998-01-01 This book summarizes the key features of Japan's work to resolve the urban and industrial pollution problems stemming from its rapid post war industrial expansion. Drawing upon views expressed by Japanese and participants from other East Asian countries in an international workshop this book identifies the main areas in which developing countries may profit from the Japanese example. The report also contains a series of short essays by Japanese experts on Japan's environmental management history recent trends in Japanese environmental indicators and summaries of key themes that emerged during the workshop. **The Economic and Legal Foundations of Managing Innovative Development in Modern Economic Systems** Elena G. Popkova, Aleksei V. Bogoviz, Artem Krivtsov, 2020-10-26 Innovation is of critical value in the modern global economy as it performs several important economic functions. The first is related to supporting the sustainability of socio economic systems preventing the emergence of crises and if they do occur providing solutions to overcome their consequences. Secondly innovation allows for the activation of economic growth and social progress through the rationalization of economic activities. Thirdly innovation supports the global competitiveness of economic systems allowing for the specialization of production and sales of unique goods that are in high demand in both domestic and global markets. At the same time innovational development in economic systems is required to mitigate the high levels of risk and requires both effective management and a reliable normative and legal foundation. This book studies the economic and legal foundations of managing the innovational development of economic systems from an interdisciplinary perspective bringing together the thoughts of international scholars in management economics and law. *Managing in Developing Countries* James E. Knowledge Management in Developing Economies Kate Hutchings, Kavous Mohammadi, 2007-01-01 This important book brings together a set of original key contributions to knowledge management in developing economies. It encompasses a wide range of countries throughout Africa, Asia, the Middle East, and Latin America, as well as the transition economies of the former socialist countries in Eastern Europe. These carefully selected country case studies represent a broad range of issues in managing knowledge. They consider the way in which knowledge management processes and practices are influenced by local culture and institutions, as well as by interaction with the broader international community. The need for an aggregated analytical approach in untangling the increasingly complex process through which knowledge processes are created, transferred, and deployed is also highlighted. The book provides a strong nexus between theory and practice by offering solutions to problems such as minimising knowledge leakage, creating knowledge sharing cultures, and promoting management learning. Presenting the latest research on intercultural knowledge management, this book will be warmly welcomed by researchers, students, and lecturers with an interest in international management and knowledge management. Its strong focus on practitioner implications will provide international managers with invaluable suggestions on how to maximise knowledge sharing in international joint ventures and subsidiary operations.

An Inquiry into Women Representation in Management Sampti Guha, Sanskruti Rajesh Kadam, 2024-06-18 This book explores the status of women representation in management in Indian industries. Recognizing that women managers are facing barriers in achieving top level of management positions in industries, it adopts unique methodology of involving men and women managers as respondents to understand the key issues of gender diversity, glass ceiling, glass walls, glass cliffs, and gender inequality in the Indian corporate scenario. The book, via its six chapters, explores these key issues through the lens of feminist theories under four dimensions: personal, work, organisational, and social, and contains an extensive literature review to understand the root causes of these issues. Secondly, it discusses a pilot study conducted to understand the perspectives about career growth of women managers. Outcome of this pilot study works towards conceptualising factors under four dimensions mentioned above, influencing women participation in management, and to develop survey tools for further quantitative study. Thirdly, for the empirical analysis, the book employs exploratory factor analysis (EFA) to identify factors under each of these four dimensions, and structure of the relationship between factors and women representation in management is confirmed by the confirmatory factor analysis (CFA). This book is beneficial for several stakeholders as it is a multidimensional study. It is useful for the undergraduate and post graduate students and research scholars of management, social sciences such as economics, gender studies, psychology, political sciences, sociology, etc., law, medicine, and engineering. Apart from this, it is also useful for corporate executives, decision makers of corporate governance, women elected representatives, administrators, development practitioners, teachers, legal experts, international agencies like UN who are working on women empowerment, and all those

agencies working towards meeting SDG5 goal *Sustainability Management in the Oil and Gas Industry* Joshua Yindenaba Abor, Amin Karimu, 2023-06-07 The oil and gas industry is a complex sector with significant reach in terms of providing the energy needs of the global economy and the security environmental and development consequences thereof In particular the sector is extremely important for the economic growth of emerging markets and developing countries Furthermore the life span of oil and gas resources is finite with high health and safety risks and substantial environmental costs that require careful management and sustainability practices to ensure optimal extraction and utilisation of these resources This book examines the challenges and opportunities in the oil and gas industry in the context of emerging markets and developing economies It provides comprehensive coverage of the management and sustainability practices of the sector the environmental impact and sustainability of resources as well as the businesses that operate in the sector across the entire value chain It addresses the current discourse on topics such as the Sustainable Development Goals the Green Economy the Paris Agreement and Glasgow Climate Pact and concludes with a chapter on the future of the oil and gas industry The discussions around energy and energy transitions in particular continue to gain momentum and the book provides a wide reaching and up to date overview of the industry The book introduces readers to the concepts and formal models of analysis in the oil and gas sector and will serve as a useful resource for students scholars and researchers in operations marketing procurement and supply chain management project management health and safety management environmental economics natural resource economics development finance and development studies Researchers and practitioners working in these areas will also find the book a useful reference material **Accounting Reform in Transition and Developing**

experiment 4 projectile motion department of physics and - Dec 07 2022

web projectile motion is an example of motion with constant acceleration in this experiment a projectile will be fired from some height above the floor and the position where it lands will be predicted to make this prediction one needs to know how to describe the motion of the projectile using the laws of physics the

06 lab 3 projectile motion university of utah - May 12 2023

web section lab 3 projectile motion scientific data collection and analysis with some experimental design purpose this minilab is designed help you apply the skills you learned in the homework that is to collect data with errors make calculations with error and decide whether your experiments are valid or not

projectile motion physlab - Sep 04 2022

web the purpose of this lab is to study the motion of a projectile launched using a projectile launcher and inspect different aspects of projectile motion using highspeed video processing sample results trajectory of the projectile curve fitting for vertical velocity visualisation of the trajectory of the projectile total energy time vs height

[projectile motion lab 4 projectile motion launching a ball](#) - Mar 30 2022

web projectile motion launching a ball the purpose of this lab experiment was to observe an object moving in a projectile pathway and analyze this motion through measurements taken and found the objective of this lab experiment was to visualize a ball launched in a projectile pathway

[projectile motion vernier](#) - Jun 01 2022

web in this experiment you will use video analysis techniques to obtain position velocity and time data for a projectile analyze the position vs time and velocity vs time graphs for both the horizontal and vertical components of the projectile s motion

[lab 4 projectile motion washington state university](#) - Feb 09 2023

web lab 4 projectile motion goals to determine the launch speed of a projectile and its uncertainty by measuring how far it travels horizontally before landing on the floor called the range when launched horizontally from a known height to predict and measure the range of a projectile when the projectile is fired at an arbitrary

[5 3 projectile motion physics openstax](#) - Aug 15 2023

web projectile motion is the motion of an object thrown projected into the air when after the initial force that launches the object air resistance is negligible and the only other force that object experiences is the force of gravity

teacher toolkits projectile motion the physics classroom - Jul 14 2023

web this projectile simulator allows students to alter the launch speed launch height and launch angle of a projectile the trajectory range and time of flight are displayed the velocity vector components acceleration vector and the trajectory trace can be toggled off and on

3 3 projectile motion physics libretexts - Oct 05 2022

web projectile motion is a form of motion where an object moves in a parabolic path the path followed by the object is called its trajectory projectile motion occurs when a force is applied at the beginning of the trajectory for the launch after this the projectile is subject only to the gravity

[experiment 3 projectile motion part 1 department of physics](#) - Jun 13 2023

web what is projectile motion find the initial velocity v_0 of a ball rolling off the table in the figure below the launch position is the origin of the coordinate system positive directions as specified

projectile motion physics 1 lab experiment phet contribution - Mar 10 2023

web sep 26 2020 this activity is a lab experiment about projectile motion designed for physics 1 remote learning students it

uses phet projectile motion simulation to give the students the ability to distinguish the relation of the initial speed of the projectile and other physical quantities

projectile motion lab tarleton state university - Jan 08 2023

web projectile motion lab introduction projectile motion is a path traveled by an object influenced by the initial velocity launch angle and the acceleration due to gravity in this experiment you will predict the spot a steel ball will land after being launched objectives in this experiment you will

projectile motion lab report benjamin kelley phys physics - Feb 26 2022

projectile motion amrita vishwa vidyapeetham virtual lab - Apr 30 2022

web nov 14 2023 projectile motion projectile is defined as any body thrown with some initial velocity which is then allowed to move under the action of gravity alone without being propelled by any engine or fuel the path followed by a projectile is called its trajectory

experiment 2 projectile motion illinois institute of technology - Apr 11 2023

web in this lab we will study two dimensional projectile motion of an object in free fall that is an object that is launched into the air and then moves under the influence of gravity alone examples of projectiles include rockets baseballs reworks and the steel balls that will be used in this lab

4 3 projectile motion university physics volume 1 openstax - Nov 06 2022

web projectile motion is the motion of an object thrown or projected into the air subject only to acceleration as a result of gravity the applications of projectile motion in physics and engineering are numerous some examples include meteors as they enter earth's atmosphere fireworks and the motion of any ball in sports

projectile motion procedure mechanics virtual lab pilot - Jul 02 2022

web nov 15 2023 after clicking the fire button the user can view the motion of the projectile and also the time of flight maximum height and range of the projectile variable region the choose environment combo box helps you to choose the type of environment that the simulation has to be performed

projectile motion phet interactive simulations - Sep 16 2023

web projectile motion phet interactive simulations

lab 3 projectile motion lab report general physics studocu - Aug 03 2022

web the purpose of this experiment is to describe projectile motion the measured physical quantities that are measured in

this experiment include length meter and time second s the physical quantities that will be calculated based on those measurements include speed horizontal motion vertical motion and overall velocity

projectile motion kinematics air resistance parabolic curve - Oct 17 2023

web blast a car out of a cannon and challenge yourself to hit a target learn about projectile motion by firing various objects set parameters such as angle initial speed and mass explore vector representations and add air resistance to
