

Circular Economy and Waste Management in Eastern Europe

Florin-Constantin Mihai, Vitalii Ishchenko, Victoria Iordachi, Vania Ivanova,
Natela Dzebisashvili

Abstract: *Eastern Europe aims to address the EU's circular economy policies, despite socio-economic disparities compared to Western Europe. This work aims to provide regional insight into waste management and circular economy prospects with five relevant country analyses in Eastern Europe part of the EU (Romania, Bulgaria) and non-EU countries, but with candidate status (Ukraine, Rep of Moldova, and Georgia). In the latter cases, these countries face particular geopolitical challenges as additional barriers to advancing toward a circular economy transition. Despite these societal challenges, this work highlights some progress towards the circular economy path in each country. However, the landfill-based system prevails but developments of waste management facilities to divert waste from landfills towards recycling, biogas production, and composting supported by source-separation of waste with community involvement is a solid pathway in the near future. These efforts must be supported by authorities (clear regulations, less bureaucracy, waste databases improvement, financial support), business innovation, and the role of environmental NGOs in reducing waste-related pollution threats and waste diversion from multi-sectoral sectors (municipalities, agriculture, industry) to upper circular economy activities.*

Kostera, 2002-10-23 The process of transition in Eastern European countries is one in which ideas of the past and present both local and Western meet and conflict Presenting a wealth of new ethnographic and interview based research Critical Management Research in Eastern Europe argues that the reform process in Central and Eastern Europe has been dominated by the traditional Western view of management practice However this approach overlooks the fact that certain managerial and organizational practices developed in Central and Eastern Europe may still be appropriate and indeed effective within this particular setting The book brings together authors from both East and West Europe to evaluate how the two systems can best be harmonized which is particularly important in the context of EU enlargement

Strategic Management - New Rules for Old Europe Christian Scholz,Joachim Zentes,2007-11-05 Perhaps it was not really meant the way it was said but when Donald Rumsfeld used the term Old Europe in his famous speech of January 22 2003 he coined a phrase to depict not the birthplace of modern society but a graveyard of old and outdated ideas Even though it is legitimate for many of us in Europe to oppose the underlying message of going to war in Iraq it makes absolute sense to examine the rules of the game which Europe is currently playing and which it will play in the future In doing so it becomes obvious that important changes are taking place Strategic Management New Rules for Old Europe makes the hidden rules governing strategic management in Europe transparent The book follows a from to logic and takes the reader along the course of changing conditions and contingencies Europe has not only witnessed major transformations such as the dramatic fall of the Iron Curtain economic and monetary integration and the incorporation of new member states Fundamental change can also be perceived with respect to the corporate responses to these ongoing dynamic changes Strategic Management New Rules for Old Europe is divided into four parts Each of these consists of several contributions starting with the focus on people then on culture then on systems

Europe and the Management of Globalization Wade Jacoby,Sophie Meunier,2013-09-13 European politicians often speak of their efforts to manage globalization At one level this is merely a rhetorical device to make globalization more palatable to citizens and prove that policy makers are still firmly in control of their country's fate This volume argues that the advocacy of managed globalization goes beyond rhetoric and actually has been a primary driver of major European Union EU policies in the past twenty years The EU has indeed tried to manage globalization through the use of five major mechanisms 1 expanding policy scope 2 exercising regulatory influence 3 empowering international institutions 4 enlarging the territorial sphere of EU influence and 5 redistributing the costs of globalization These mechanisms are neither entirely novel nor are they always effective but they provide the contours of an approach to globalization that is neither ad hoc deregulation nor old style economic protectionism The recent financial crisis may have seemed initially to vindicate the European efforts to manage globalization but it also represented the limits of such efforts without the full participation of the US and China The EU cannot rig the game of globalization but it can try to provide predictability oversight and regularity with rules that accommodate European interests This book was based on a special issue of Journal of European Public Policy
