

Managing Product Families

Possible approaches:

- Keep separate copy of all materials for each version and variant
- Keep common code, with deltas for variants (how to manage this?)

Other issues:

- What to keep under configuration management
- Basic objects vs derived objects
- When do we abandon versions?

Management Product Families:

Managing Product Families Susan Walsh Sanderson, Mustafa Uzumeri, 1997 The Innovation Imperative Strategies for Managing Product Models and Families by Susan Sanderson and Mustafa Uzumeri traces the new competitive challenges to the patterns appearing in product variety and change The authors successfully illustrate these patterns through a series of case studies that help to classify and explain the growing competitive challenge of dynamic competition Manufacturers are being forced to respond to new and different competitive challenges The Innovation Imperative will make you aware of the patterns in global competition and inspire you to create new strategies and management styles *Software Architectures for Product Families* Frank van der Linden, 2003-06-29 This book contains the proceedings of a third workshop on the theme of Software Architecture for Product Families The first two workshops were organised by the ESPRIT project ARES and were called Development and Evolution of Software Architectures for Product Families Proceedings of the first workshop held in November 1996 were only published electronically at <http://www.dit.upm.es/ares> Proceedings of the second workshop held in February 1998 were published as Springer LNCS 1429 The ARES project was finished in February 1999 Several partners continued operation in a larger consortium ITEA project 99005 ESAPS As such it is part of the European Eureka 2023 programme The third workshop was organised as part of the ESAPS project In order to make the theme of the workshop more generic we decided to rename it International Workshop on Software Architectures for Product Families As with the earlier two workshops we managed to bring together people working in the software architecture of product families and in software product line engineering Submitted papers were grouped in five sessions Moreover we introduced two sessions one on configuration management and one on evolution because we felt that discussion was needed on these topics but there were no submitted papers for these subjects Finally we introduced a surveys session giving an overview of the present situation in Europe focussed on ESAPS and in the USA focussed on the SEI Product Line Systems Program Product Platform and Product Family Design Timothy W. Simpson, Zahed Siddique, Roger Jianxin Jiao, 2006-03-20 Designing products and product families so they may be customized for the global marketplace and achieving these goals in abbreviated time period while maintaining production efficiencies are the keys to successful manufacturing operations The research on these areas has matured rapidly over the last decade Today's highly competitive and volatile marketplace is reshaping the way many companies do business as rapid innovation and mass customization offer a new form of competitive advantage In response companies like Sony Black and Decker and Kodak have successfully implemented strategies to design and develop an entire family of products to satisfy a wide variety of customer requirements Product Platform and Product Family Design Methods and Applications discusses how product platform and product family design can be used successfully to increase variety within a product line shorten manufacturing lead times reduce overall costs within a product line The material available here will serve as both a reference and a hands on guide for practitioners involved in the design planning and production of

products Included are real life case studies that explain the benefits of platform based product development **Advances in Product Family and Product Platform Design** Timothy W. Simpson, Jianxin (Roger) Jiao, Zahed Siddique, Katja Hölttä-Otto, 2013-09-13 Advances in Product Family and Product Platform Design Methods Applications highlights recent advances that have been made to support product family and product platform design along with successful applications in industry This book provides not only motivation for product family and product platform design i e address questions about why and when should we platform but also methods and tools to support the design and development of families of products based on shared platforms i e address the how and what questions about platforming It begins with a general overview of product family design to introduce the general reader to the topic and then progress to more advanced topics and design theory to help designers engineers and project managers plan architect and implement platform based product development strategies for their company Finally successful industry applications provide readers and practitioners with case studies and talking points to become platform advocates and leaders within their organization Software Product-Family Engineering Frank van der Linden, 2003-07-31 This book contains the proceedings of the Fourth International Workshop on Product Family Engineering PFE 4 held in Bilbao Spain October 3 5 2001 This workshop was the fourth in a series started in 1996 with the same s ject software product family engineering Proceedings of the second and third workshops have been published as LNCS 1429 and LNCS 1951 The workshops were organized within co operation projects of European dustry the rst two by ARES Esprit IV 20 477 1995 1999 This project had three industrial and three academic partners and focused on software archit uresforproductfamilies SomeofthepartnerscontinuedinITEAproject99005 ESAPS 1999 2001 ITEAisthesoftwaredevelopmentprogram 2023 within the European Eureka initiative ITEA projects last for two years and ESAPS was succeeded by CAFE ITEA ip00004 which started in 2001 and will t minate in 2003 This workshop was initially prepared within ESAPS and the preparation continued in CAFE Due to the attacks in the USA of September 11 several people were not able to y and therefore did not show up However we have included their submissions in these proceedings The session chair presented these submissions and their inputs were used during the discussions It was planned that Henk Obbink be workshop chair and Linda Northrop and Sergio Bandinelli be co chairs However because of personal circumstances Henk Obbink was not able to leave home during the workshop Moreover both co chairs had already enough other duties Therefore the chairing duties were taken over by the program chair Frank van der Linden *Software Product Management and Pricing* Hans-Bernd Kittlaus, Peter N. Clough, 2008-12-18 Software product management and pricing are key success factors for any organization providing software be it a software company or an organization responsible for software in a company that belongs to a different industry After defining the term software product and looking at the business and organizational sides the core elements of software product management and pricing are discussed Recommendations are given on how to deal with these elements depending on different types of organizations and products

in order to achieve the long term success *Management of Design* Sriram Dasu, Charles Eastman, 2012-12-06 Product design significantly influences product cost and quality as well as market share and profitability of a firm Design projects often involve many people belonging to different functional areas and in many organizations several design projects may be under way at the same time Due to this complexity management of design has given rise to a rich set of research problems in management and engineering In this volume design is considered as the planning and specification activity prior to fabrication Design determines what products will be produced how they will be produced and when they will be introduced into the market The quality of the products and the speed with which they are developed are significantly affected by the design process The design process by which a product is developed is determined by the managerial and engineering practices tools and techniques This book presents engineering and management perspectives on design Topics covered include Decomposition of product development projects Tools and techniques for preliminary evaluation of designs Interface between design and manufacturing assembly and distribution Design information flows and Determination of the scope timing and duration of projects and the allocation of resources **Software Product Lines** Gary J. Chastek, 2003-08-02 Software product lines are emerging as an important new paradigm for software development Product lines are enabling organizations to achieve impressive time to market gains and cost reductions In 1997 we at the Software Engineering Institute SEI launched a Product Line Practice Initiative Our vision was that product line development would be a low risk high return proposition for the entire software engineering community It was our hope from the beginning that there would eventually be sufficient interest to hold a conference The First Software Product Line Conference SPLC1 was the realization of that hope Since SPLC1 we have seen a growing interest in software product lines Companies are launching their own software product line initiatives product line technical and business practices are maturing product line tool vendors are emerging and books on product lines are being published Motivated by the enthusiastic response to SPLC1 and the increasing number of software product lines and product line researchers and practitioners the SEI is proud to sponsor this second conference dedicated to software product lines We were gratified by the submissions to SPLC2 from all parts of the globe from government and commercial organizations From these submissions we were able to assemble a rich and varied conference program with unique opportunities for software product line novices experts and those in between This collection represents the papers selected from that response and includes research and experience reports **Cooperative Decision-Making in Modular Product Family Design** Marc Windheim, 2019-11-21 The development of modular product families holds enormous economic potential for companies as there are always great opportunities but also risks associated with all life phases of a product However these fundamental and far reaching effects inevitably lead to conflicting objectives when defining modular product structures which makes decision making in product development particularly complex Considering relevant theories from decision theory and product family design this book presents an innovative method to support decision makers in the

development of modular product families The central element of the method is a novel Modularity Decision Dashboard MDD which interactively visualizes all decision relevant data The findings presented here confirm that applying the method to real world decision making problems leads to a more balanced ratio between internal and external variety and thus significantly contributes to the efficient economic benefit of modularization Distribution Planning and Control David Frederick Ross,2015-05-14 This third edition provides operations management students academics and professionals with a fully up to date practical and comprehensive sourcebook in the science of distribution and Supply Chain Management SCM Its objective is not only to discover the roots and detail the techniques of supply and delivery channel networks but also to explore the impact of the merger of SCM concepts and information technologies on all aspects of internal business and supply channel management This textbook provides a thorough and sometimes analytical view of the topic while remaining approachable from the standpoint of the reader Although the text is broad enough to encompass all the management activities found in today s logistics and distribution channel organizations it is detailed enough to provide the reader with a thorough understanding of essential strategic and tactical planning and control processes as well as problem solving techniques that can be applied to everyday operations Distribution Planning and Control Managing in the Era of Supply Chain Management 3rd Ed is comprised of fifteen chapters divided into five units Unit 1 of the text The SCM and Distribution Management Environment sets the background necessary to understand today s supply chain environment Unit 2 SCM Strategies Channel Structures and Demand Management reviews the activities involved in performing strategic planning designing channel networks forecasting and managing channel demand Unit 3 Inventory Management in the Supply Chain Environment provides an in depth review of managing supply chain inventories statistical inventory management and inventory management in a multiechelon channel environment Unit 4 Supply Chain Execution traces the translation of the strategic supply chain plans into detailed customer and supplier management warehousing and transportation operations activities Finally Unit 5 International Distribution and Supply Chain Technologies concludes the text by exploring the role of two integral elements of SCM international distribution management and the deployment of information technologies in the supply chain environment Each chapter includes summary questions and problems to challenge readers to their knowledge of concepts and topics covered Additionally supplementary materials for instructors are also available as tools for learning reinforcement Pro Oracle Fusion Applications Tushar Thakker,2015-09-02 Pro Oracle Fusion Applications is your one stop source for help with installing Oracle s Fusion Applications suite in your on premise environment It also aids in the monitoring and ongoing administration of your Fusion environment Author Tushar Thakker is widely known for his writings and expertise on Oracle Fusion Applications and now he brings his accumulated wisdom to you in the form of this convenient handbook Provisioning an Oracle Fusion Applications infrastructure is a daunting task You ll have to plan a suitable topology and install the required database an enterprise wide identity management solution and the applications themselves all while

Product Management Ishrat Nadeem Zahid, 2013. Product management is a demanding but exciting career. The product manager's challenges are unending; his responsibilities are rigorous and what he does has direct impact on a company's financial performance. Building and launching new products and turning an idea from a piece of paper into a functional product is almost a miracle. In addition, the product manager manages the product throughout its life. In doing so, the product manager deals with pretty much every function in the company. Speaking of the product life, anything done well during the planning phase will pay off during the other phases of the product life cycle. The execution phase is the phase when a product really takes shape. Once the product is complete and ready to be launched, it is an exciting time for the product manager. The product is ready to put under real world test. Just building and launching a product is not enough. Target customers should be told about how great a product is, which takes good marketing and evangelism. Market routes must be established to sell and promote the product and make business out of it. Additionally, different types of services can be defined to be attached with the product as an overall offering. Defining and implementing a go to market plan for the product is a complicated but interesting set of activities. If the go to market ecosystem is set up well, the product manager can watch his product's and associated services revenues multiply. Once the product is out there, it needs to be taken care of. Sustaining a product takes effort. This is the time to turn a good product into a great product, to take the product toward completeness and maturity. Eventually, any product will get old and obsolete. Even the greatest of products must be given a farewell and the end of life must happen to keep the innovation wheel rotating. New products and services enter the picture and the product management action starts all over again.

Software Configuration Management Bernhard Westfechtel, André van der Hoek, 2003-04-30. While the SCM 10 experiment proved very successful, the SCM community felt that it should go for a formal workshop once again. In fact, this would open up the opportunity to document current research and fertilize the development of this discipline. As a consequence, the following workshop SCM 11 was held as a co-located event with ICSE at Portland, Oregon in May 2003. The Call

for Papers received a lively response with 36 submissions out of which 15 were accepted for publication 12 long and 3 short papers. These papers appear in the second part of this volume ordered by topic. In addition to paper presentations the workshop provided sufficient time for inspiring discussions. The chairs of both workshops would like to acknowledge the invaluable contribution of all authors and speakers, the program committees, the organizers of the ICSE conferences and Springer Verlag.
