This book is an important and original account of life in the new lean production workplace the car industry where it all began It brings together the two emblematic features of the twentieth century a working class meant to topple the social order and a product that largely provided the developmental model of that same order This book is neither a retrospective assessment nor a prediction for the future it reveals what has changed and what has remained the same in a workplace that remains a major part of the makeup of our society **Builders** Darren Thiel, 2013-05-07 Building workers constitute between five and ten per cent of the total labour market in almost every country of the world They construct repair and maintain the vital physical infrastructure of our societies and we rely upon and trust their achievements every day Yet we know surprisingly little about builders their cultures the organization of their work or the business relations that constitute their industry This book based on one year's participant observation on a London construction site redresses this gap in our knowledge by taking a close up look at a section of building workers and businessmen By examining the organizational features of the building project and describing the skill sweat malinger humour and humanity of the building workers Thiel illustrates how the builders were mostly autonomous from formal managerial control regulating their own outputs and labour markets This meant that the men's ethnic class and gender bound cultural activities fundamentally underpinned the organization of their work and the broader construction economy and thereby highlights the continuing centrality of class bound culture and social stratification in a post industrial late modern world Thiel outlines the on going connections and intersections between economy state class and culture ultimately showing how these factors interrelated to produce the building industry its builders and its buildings Based predominately on cultural and economic sociology this book will also be of interest to those working in the fields of gender and organizational studies social class and inequality migration and ethnicity urban studies and social identities *Business Organisation and Management* ,1925 **Psycho-Socio-Physical**
