Managing Britains Defence:

Managing Britain's Defence Malcolm McIntosh, 1990-06-18 Arguing that it is possible to increase both the role of Parliament in defence decision making and government control of defence resource planning this book focuses in detail on the management of Britain's defence by Francis Pym John Nott and Michael Heseltine *Managing Britain's Marine and Coastal Environment* Jonathan Potts, Hance D. Smith, 2013-02-01 Britain's maritime tradition is well documented The management of its marine and coastal environment is therefore of tantamount importance and offers lessons for other nations across the world The beginning of the new millennium marks a major long term turning point in the historical development of Britain's maritime interest discernible by continued diversification and intensification in the uses of the sea unprecedented and often adverse environmental impacts engendered by these uses and the beginning of a major effort to establish a comprehensive management system which can deal with both multiple uses and environmental impacts This collection featuring an impressive list of contributors covers themes including maritime history environmental issues public policy tourism technology and resources as well as open sea development and management It is a useful addition for those interested in geography the environment maritime studies and also engineering *The Management of the British Economy, 1945-2001* Nicholas Woodward, 2004 Since 1945 British governments have played an active role in managing the economy in the interests of securing high employment economic growth and low inflation with their approach evolving in response to changing economic circumstances intellectual shifts and past policy failures This book provides an overview of economic management particularly financial management and addresses how it has changed and why it has not always been successful It examines the actual policies that were introduced the problems that various governments faced in implementing them and how the approach to policymaking changed It also examines the main phases of economic policymaking and the conduct of policymaking as there is a widespread consensus that until recently short run economic management could have been more successful than it was *Understanding UK Military Capability* Andrew R. Curtis, 2024-05-21 Concentrating on decisions taken below the political level this book uncovers the factors that underpin the translation of strategic direction into military capability Human Resource Management in the British Armed Forces Alex Alexandrou, Richard Bartle, Richard Holmes, 2013-10-18 This study of the future of human resource management in the British armed forces considers the impact of the Human Rights Act 1998 and the Macpherson report It covers ethnic minorities and gay rights as well as other challenging human resource issues Nuclear Mentalities? B. Heuser, 1998-08-10 Concepts associated with nuclear strategy often go beyond any objective logic of deterrence Nuclear weapons have special roles in different national belief systems myths surround them they have catalysed tensions already existing in societies become symbols of power or of past sins This book delves into the conscious and subconscious beliefs in Britain France and the Federal Republic of Germany all voiced in debates about nuclear strategy about society the State and power structures each country's place in the world

the international system allies and enemies Defence Management in Uncertain Times Richard Holmes, Teri McConville, 2014-09-19 From the impact of the attacks on New York and Washington in 2001 to the problems of military uncertainty and the role of women in combat this collection of essays explores the changing face of militarism from the perspective of defence management experts *Managing the Revolution in Military Affairs* R. Matthews, J. Treddenick, 2001-08-20 The collapse of the Soviet Union and the end of the Cold War was the catalyst for profound changes in the global security and defence management environment including alterations in the size structure and configuration of the Armed Forces emergence of asymmetrical warfare recognition of the strategic significance of military infosphere embracing all dimensions of the virtual and vertical battlespace emphasis on coalition warfare and defence industrial cooperation and reform of the financial procurement and logistical systems The contributors to this book evaluate these environmental changes within a defence management context *Coastal Management* Institution of Civil Engineers (Great Britain), 1996 These conference proceedings from the coastal management conference include information on policy including the House of Commons Environment Committee Report on coastal zone protection and planning a number of consultative documents and details on new guidelines and policies which have had a significant impact on the coastal community **Contractors on Deployed Military Operations: United Kingdom Policy and Doctrine** , 2005 Since the Cold War the United States and United Kingdom UK armed services have undergone significant transformation in response to the radically altered threat environment new operational demands and reduced defense budgets Central to this transformation in both states is an expanded role for private contractors in providing deployed support functions traditionally conducted by uniformed personnel Despite the similar direction of military reform the U S armed services approach to battlefield outsourcing has undergone extensive public scrutiny and debate whereas UK Ministry of Defence MoD initiatives have hitherto attracted comparatively little independent assessment Close U S UK military cooperation over recent years in Afghanistan and Iraq and the likelihood that both states will remain close allies in future interventions suggest that the UK MoD s approach to deployed contractor support is a salient issue for U S military planners This monograph analyzes the MoD s outsourcing strategy and identifies those aspects of UK policy and doctrine that warrant consideration by the Department of Defense DoD and U S armed services Evaluation of the performance of MoD outsourcing policy and doctrine against measures of cost effectiveness and operational effectiveness reveals two broad observations The MoD has developed a number of novel command and control mechanisms that have succeeded in rationalizing and removing the risk in commercial battlefield support But the data necessary to evaluate the real impact of deployed outsourcing have yet to enter the public domain Similarly questions remain about the relative cost effectiveness of organic military provision and contractor alternatives Comparative analysis indicates that there are no fundamental differences in overarching MoD and DoD outsourcing philosophy but there are specific MoD initiatives that could enhance the U S armed services ability to manage

their deployed contractor support 7 **Confronting the Colonies** Rory Cormac, 2014-03-01 An original exploration of how the intelligence community became aware of the growing insurgent threat in the twilight of Empire the challenges this posed and its impact upon how Whitehall saw the world Proceedings of the XIII International Symposium SymOrg 2012: Innovative Management and Business Performance , 2012-06-03 **Transforming to Effects-based Operations** Andrew M. Dorman, 2008 The author examines the extent to which the United Kingdom UK has transitioned to effects based operations to ascertain 1 Areas where the U S Army could draw lessons from UK policies 2 Areas where the U S Army and the British Ministry of Defence could develop integrated or complementary approaches and doctrines towards transformation for future alliance coalition operations and 3 Implications for the U S Army for working with the UK This monograph is subdivided into four parts Section 1 is a review of the evolution of British defence policy since the end of the Cold War and evaluates the degree to which it has adopted an effects based approach Section 2 examines the British operational experience since the end of the Cold War including an analysis of the lessons learned and its experiences of working with allies Section 3 analyses the UK s capability development through its doctrine and acquisition strategies Section 4 evaluates the implications of these findings for the U S Army and makes 17 main recommendations **Europe's Coherence Gap in External Crisis and Conflict Management** Bertelsmann Stiftung, 2020-04-07 External interventions to mitigate crises or end conflicts have rarely succeeded The EU and its member states in particular have repeatedly run up against their limits in the civil wars in Afghanistan the Congo Libya Syria the Sahel region and Yemen However the EU if not the entire international community have learned one lesson from their faltering peacebuilding efforts If they are to have any chance of making a meaningful and lasting difference they must develop and use comprehensive strategies that combine and coordinate the various tools available to diplomacy development cooperation and security The 29 reports presented in this book one for each EU member state as well as one on the EU as a whole examine how steep the learning curve has been and accordingly how successful these bodies have been at forming new linkages among the various actors involved in external crisis and conflict management as well as within and between their institutions and organisations While the EU clearly still has a long way to go before it can live up to its rhetoric and become a distinct and effective actor on the foreign policy stage small and incremental steps in reorganising institutional practise may help in narrowing the gap between words and deeds This volume provides examples of how the EU and its member states have found new organisational structures and procedures specifically at the headquarters level to better organise the necessary combination and coordination of the many tools available for crisis and conflict management These ways are then juxtaposed in a big picture chapter which also identifies best practices for successful WGA implementation **The Role of Military-industrial Relations in Civil-military Relations and Foreign Policy** Glen Segell, 1997 *Procuring Complex Performance* Nigel Caldwell, Mickey Howard, 2010-09-13 This book examines the management of Procuring Complex Performance PCP in large scale programmes

that includes the downstream support phase in sectors such as construction healthcare transport aerospace marine and defence It brings together a series of edited chapters to explain why the traditional combination of linear project management and highly detailed contracts are now unsuited to the dynamics of emerging customer requirements based on performance and outcome Working with leading business professors across the UK and Europe Caldwell and Howard present the case for why large scale programmes of world class organizations often represent a shifting frontier between the boundaries of public private provision and silos of operations expertise Adopting a procurement perspective the authors explain how complex performance means not just coping with the dynamics of buyer supplier relationships but incorporates the shift from production orientation towards availability of bundled services such as maintenance and upgrade delivered over extended often multi decade timeframes The strength of PCP is its empirical case based support for new business models based on through life management availability contracting and service support which challenge simplistic notions of dyadic hierarchical relationships and transfer of risk to the supply base This unique publication is essential reading for scholars and practitioners seeking to understand the context of innovation and supply as a coordinated and integrated approach to managing and procuring complex performance **Managing International Business** Michael
