Managing Conflict The Key To Making Your Organization Work:

Managing Conflict Dean Tjosvold, 1989

Leading the Team Organization Dean Tjosvold, Mary M.

Tjosvold, 1991-01-01 Managers recognize that a good team organization can be the most valuable of their firm's competitive advantages. Lucrative markets draw competitors; efficient technology is copied; profitable products lose their appeal but a well-run team organization continues to introduce new technologies, find new markets, create new products and improve service to clients. However, as Dean and Mary Tjosvold reveal, there is a significant shortage both of strong leaders and of strong teams in corporate America today. Most employees are reluctant to step forward and take charge because they doubt they have the ability to turn an organization around. The Tjosvolds present here a model for creating leading and participating in teams that illustrates that only by working in teams throughout the organizational structure can a company reach its potential. They further demonstrate how to involve supervisors, middle managers and unions in productive teams and how organizations can use teams effectively to generate innovative programs or to solve specific problems. A case study runs through the book that illustrates precisely how the team building model can be applied. **Leading the Team Organization** is a valuable guide that will enable leaders and followers to empower each other to achieve common goals and create more profitable and successful organizations.

Understanding University Committees David A. Farris, 2023-07-03 Committees are indispensable to the governance of higher education yet there is seldom guidance to faculty and administrators on how committees should be conducted or how to maximize committee obligations. This is the first handbook on how both to manage committees and how to engage effectively as members to achieve departmental or broad institutional goals and how participation valuably contributes to individual learning and advancement. Based on empirical research, organizational theory and interviews with faculty and administrators, Dr. David Farris provides an informative and vivid examination of the dynamics of committee work, addresses the planning, conduct, roles, composition and dispositions of members as well as the institutional context and structures in which they operate that are vital to organizational success. Committees are not just laboratories for implementing the vision of university leadership; developing solutions to institutional challenges and refining organizational procedures; they are the proving ground for future leaders in higher education. How members perform in committees reflects our professionalism, aptitude, integrity and character—all important considerations given that we serve as ambassadors for our department, college, office and colleagues. In offering guidance on good committee practices, a recurring theme of this book is that readers should critically evaluate individual performance and how it impacts others or the committee at large. Too often the locus of control is presumed to be reserved for the chairperson even though significant influence can be exercised through informal leadership, member dispositions and leveraging social networks. In addition to reviewing the mechanism of committees, David Farris provides practical information regarding the functional application of committees: tactical, operational or strategic committee leadership and management group dynamics that influence committee performance and

the importance of diversity and inclusive committee cultures to institutional performance Throughout the book he identifies opportunities for faculty and administrators to reflect on their committee experiences challenges readers to consider how to capitalize on committee experiences and consider the various ways that committees shape institutional culture and performance This book provides guidance on how to create committees that are conducive to fair equitable and engaging participative decision making experiences to yield the best results and to promote enthusiasm for participation in committees whether as chairs or committee members
