## **Managing Canal Irrigation Practical Analysis From South Asia:**

Managing Canal Irrigation Robert Chambers, 1988 A challenge to re-examine beliefs, biases and actions is presented through the exposure of misleading research and faulty diagnosis in the current policies and practices of canal irrigation

**Revolutionizing Development** Andrea Cornwall, Ian Scoones, 2022-03-28 This book tells the story of development studies in practice over the last fifty years through the work of one remarkable individual Robert Chambers. His work has taken him from being a colonial officer in Kenya through training and managing large rural development projects to a fundamental critique of top-down development and the championing of participatory approaches. The contributors eloquently demonstrate how he has been at the centre of major shifts in development thinking and practice over this period, popularising terms that are now at the centre of the development lexicon such as vulnerability, multi-dimensional poverty, sustainable livelihoods and farmer first. Robert Chambers played a major role in the massive growth in participatory approaches to development and particularly the application of participatory methods in development research and appraisal. This has led to fundamental challenges to development practice ranging from approaches to monitoring and evaluation to institutional learning and professional training. There is probably no one who has had more influence on approaches to development in the past decades. *Revolutionizing Development* offers a unique overview of these contributions in thirty-two concise chapters from authors who have been intimately involved as collaborators, critics and colleagues of Robert Chambers. **Canal**

**Irrigation Systems in India** Umesh Chandra Chaube, Ashish Pandey, Vijay P. Singh, 2023-10-04 The book focuses broadly on the preliminaries of the canal irrigation systems in India with a focus on their operation, maintenance and management of the canal systems. The chapters in this book are classified under four sections: viz i) preliminaries of the canal irrigation systems ii) operation of the canal irrigation systems iii) maintenance of the canal irrigation systems and iv) management of the canal irrigation systems. The preliminaries of the canal irrigation systems include an integrated view of irrigation and agriculture, irrigation management in India, problems, issues, a brief history and some lessons, irrigation administration, organizational structure for management of irrigated agriculture and farmers' participation. The operation of the canal irrigation systems includes the operation of dams and barrages, canal operation, water distribution, planning, measurement of flow and sediment in canals and performance evaluation of the canal irrigation system, use of groundwater in the canal command area. The canal irrigation systems maintenance includes dams, barrages, related equipment, canals and related structures, field drainage, diagnostic analysis of canal irrigation system, soil and water quality management, soil moisture and measurement. The management of the canal irrigation systems includes rehabilitation and modernization and a case study on rehabilitation, conjunctive use, management, operation and maintenance, budgeting and financing. The book is expected to be useful for academicians, water practitioners, scientists, water managers, environmentalists, administrators, NGOs, researchers and students who are actively involved in the operation, maintenance and management of the canal irrigation system for

addressing the challenges being faced in the irrigated agricultural while addressing issues of canal irrigation systems in South East Asia

**Selected Water Resources**

**Abstracts** ,1991-04      **The Last Oasis** Sandra Postel,2014-07-16 For decades now we have wasted and mismanaged the world's water supplies Today 27 countries are short of water a quarter of the world's population has no safe water 46 per cent have no proper sanitation and each year four million children die of water borne diseases As most of the world's major river systems cross several national boundaries the scope disputes and the threat to international security is becoming more and more real In *The Last Oasis* Sandra Postel examines the economic ecological and political factors affecting fresh water supply She confronts the issues of mismanagement and profligacy and analyses and dangers of confrontation both between nations and between rural and urban users She also emphasises that the technology and know how for effective water husbandry does exist With methods already in use farmers could cut their demand for water by 40-90 per cent and cities by one third without sacrificing economic output or quality of life Investing in water efficiency recycling and conservation help meet rising demands and stave off disaster But the priority is a common recognition of the gravity of the position and with that a widespread push for institutions to manage sustainable use of water      **Strategic Analyses of the National River Linking Project (NRLP) of India: Proceedings of the Workshop on Analyses of Hydrological, Social, and Ecological Issues of the NRLP** Upali A. Amarasinghe,Bharat R. Sharma,2008 Contributed articles      Decentralization and Coordination of Water Resource Management Douglas D. Parker,Yacov Tsur,2011-07-08 Centralized top down management of water resources through regulations has created unnecessary economic burdens upon users More flexible decentralized controls through the use of economic incentives have gained acceptance over the past decade The theme of this book is the increasing efforts throughout water scarce regions to rely upon economic incentives and decentralized mechanisms for efficient water management and allocation The book begins with a section of introductory chapters describing water systems institutions constraints and similarities in the following regions Israel and the Middle East Turkey California Florida and Australia Four of these regions face similar climates with wet winters and dry summers Florida has a more even seasonal distribution of rainfall yet it uses similar management strategies in controlling groundwater demand and water quality The book concludes with a section on water management case studies These case studies examine issues of conflict related to both water quality and water quantity While the case studies address both international and intranational concerns in specific regions of the world they portray broad principles that are applicable to many regions      **Review Paper on 'Garden Kits' in Africa** Douglas J. Merrey,2014-03-01 The purpose of this paper is to synthesize the available knowledge and lessons learned from past experiences in promoting kitchen or home gardens for food production with a special emphasis on water management The benefits of home gardens for better family nutrition health status of children and mothers and as an entry point for empowering women have been documented in some studies However there is very little specific evidence to confirm these benefits The paper also reviews some of the water management practices and garden technologies used in home and market gardens It recommends building on current home gardening practices starting with diagnostic appraisals

of actual gardening practices and moving on to participatory action research focused on evaluating promising water management technologies and testing implementation of strategies that empower women A Survey of Agricultural Economics Literature Lee R. Martin,1977 *Water Resources System Operation* Vijay P. Singh,Ram Narayan Yadava,2003

**Understanding and Measuring Social Capital** Christiaan Grootaert,Thierry Van Bastelaer,2002 This work details various methods of gauging social capital and provides illustrative case studies from Mali and India It also offers a measuring instrument the Social Capital Assessment Tool that combines quantitative and qualitative approaches Elinor Ostrom and the Bloomington School of Political Economy Daniel H. Cole,Michael D. McGinnis,2014-12-24 Elinor Lin Ostrom was awarded the 2009 Nobel Memorial Prize in Economic Sciences for her pathbreaking research on economic governance especially the commons but she also made important contributions to several other fields of political economy and public policy The range of topics she covered and the multiple methods she used might convey the mistaken impression that her body of work is disjointed and incoherent This four volume compendium of papers written by Lin alone or with various coauthors most notably including her husband and partner Vincent supplemented by others expanding on their work brings together the common strands of research that serve to tie her impressive oeuvre together That oeuvre together with Vincent s own impressive body of work has come to define a distinctive school of political economic thought the Bloomington School Each of the four volumes is organized around a central theme of Lin s work Volume 1 explores the roles played by the concept polycentricity in the disciplines of public administration political science and other forms of political economy Polycentricity denotes a complex system of governance in which public authorities citizens and private organizations work together to establish and enforce the rules that guide their behavior Itencapsulates an approach toward policy analysis that blurs standard disciplinary boundaries between the social sciences Throughout their long and remarkably productive careers Elinor and Vincent Ostrom never tired of reminding us of the capacity of ordinary humans to transcend their own limitations by engaging with others in the myriad forms of collective action required to build and sustain a self governing society Their careers stand as exemplars of the proper relationship between rigorous scholarship and responsible citizenship
