Managing Community Development in the New Federalism Donald F. Kettl, 1900 **Improving Federal Grants Management** United States. Advisory Commission on Intergovernmental Relations, 1977 Housing and Planning References, 1979 *The Growth of American Government* Ballard C. Campbell, 2014-12-29 How and why has government gotten bigger Should be a compulsory assignment for any seminar on modern political culture The Journal of American History American government has evolved over the generations since the mid nineteenth century The changing character of these institutions is a critical part of the history of the United States This engaging survey focuses on the evolution of public policy and its relationship to the constitutional and political structure of government at the federal state and local levels A new chapter in this revised and updated edition also examines the debate about big government in recent decades A marvelous multidisciplinary synthesis that builds on the findings of historians of national state and local government along with those of economists and political scientists to provide a coherent account of the rise of modern American governing structures Journal of Interdisciplinary History **State and Local Politics** David Berman, 2015-02-18 Politics at the state and local level has never been more interesting than in our devolutionary age This popular text is the most concise readable and current introduction to the field Now in its ninth edition the book keeps its focus on the varied and changing political and economic environments in which state and local governments function and their strengths and weaknesses in key areas of public policy The text is enlivened by boxed sections that relate individual experiences or highlight particular issues and developments Topics covered in this edition include the drive toward devolution in the federal system fiscal constraints political accountability affirmative action majority minority districts and changing approaches to welfare education land use and law enforcement *Perspectives on Management Capacity Building* Beth Walter Honadle, Arnold M. Howitt, 1986-01-01 *Perspectives on Management Capacity Building* provides a lively spectrum of views on the problems and prospects of improving the management and performance of municipal governments in the United States Leading specialists in public administration probe the management needs of local governments and explore ways in which they can improve their capacity to manage Today state and local governments are caught in the transition between the expansionism of the post World War II years and the retrenchment era of the late seventies and eighties Improved management capacity has emerged as the most effective way for local governments to ride out the economic and political pressures confronting them This book first investigates the meaning of the term management capacity It then considers how management needs have changed in the post war period and how these needs vary among large cities suburbs and rural communities Two of the contributions explore the organizational politics of management improvement while others look at the functional areas of computers and financial management The book also addresses human resource problems such as labor relations management development and training of municipal legislators and concludes with several viewpoints on federal efforts to improve local management

Bureaucratic Democracy Douglas Yates, 1982 Although everyone agrees on the need to make government work better few understand public bureaucracy sufficiently well to offer useful suggestions either theoretical or practical In fact some consider bureaucratic efficiency incompatible with democratic government Douglas Yates places the often competing aims of efficiency and democracy in historical perspective and then presents a unique and systematic theory of the politics of bureaucracy which he illustrates with examples from recent history and from empirical research He argues that the United States operates under a system of bureaucratic democracy in which governmental decisions increasingly are made in bureaucratic settings out of the public eye He describes the rational selfinterested bureaucrat as a minimaxer who inches forward inconspicuously gradually accumulating larger budgets and greater power in an atmosphere of segmented pluralism of conflict and competition of silent politics To make the policy process more competitive democratic and open Yates calls for strategic debate among policymakers and bureaucrats and insists that bureaucrats should give a public accounting of their significant decisions rather than bury them in incremental changes He offers concrete proposals applicable to federal state

and local governments for simplifying the now chaotic bureaucratic policymaking system and at the same time bolstering representation and openness This is a book for all political scientists policymakers government officials and concerned citizens It may well become a classic statement on the workings of public bureaucracy Resources in Education ,2001-04

Human Services Bibliography Series ,1978-02 *Federal Policymaking and the Poor* Michael J. Rich,2014-07-14 Do federal state and local governments differ in their responsiveness to the needs of the poorest citizens Are policy outcomes different when federal officials have greater influence regarding the use of federal program funds To answer such questions Michael Rich examines to what extent benefits of federal programs actually reach needy people focusing on the relationship between federal decision making systems and the distributional impacts of public policies His extensive analysis of the Community Development Block Grant Program CDBG the principal federal program for aiding cities reveals that the crucial divisions in domestic policy are not among the levels of government but between constellations of participants in the different governmental arenas Rich traces the flow of funds under the CDBG from program enactment through three tiers of targeting to needy places to needy neighborhoods and to needy people and offers a comparative study of eight CDBG entitlement communities in the Chicago area He demonstrates that while national program parameters are important for setting the conditions under which local programs operate the redistributive power of federal programs ultimately depends upon choices made by local officials These officials he argues must in turn be pressed by benefits coalitions at the community level in order to increase the likelihood that federal funds will reach their targets Originally published in 1993 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905 **Local Chief Executives' Perceptions of Policy-making and Management Needs** Center for Governmental Studies (Washington, D.C.),1975 **Hearings, Reports and Prints of the Joint Economic Committee** United States.
