Natural History Of Insects Illustrated:

Insects and Colors between Art and Natural History, 2024-10-28 This book explores how European naturalists and artists perceived, investigated and presented the relationship between insects and colors from the late sixteenth to the late eighteenth century. The contributors to this volume examine the creative methods and strategies that were developed to record color-related information about insects through studies on Hoefnagel's glazed metal and hand coloring practices, the lepidochromy technique used in paintings by Marseus van Schrieck and later naturalists, the representation of sexual dimorphism of color and variable color of caterpillars in the images of Goedaert Merian, Albin and R. Sel von Rosenhof, the painting by numbers technique applied to Schiffer's bookplates on Regensburg insects, Schiffermüller's watercolor originals of caterpillars and finally the color fading of exotic cabinet specimens and how this issue was tackled by Abbot and Smith. The volume is lavishly illustrated with rare and unpublished images and offers new insights into the interrelation between natural history and visual practices concerning the color of insects with a special focus on butterflies and moths. Contributors are Harald Bruckner, Kay Etheridge, Beth Fowkes, Tobin Stefanie, Jovanovic Kruspel, Karin Leonhard, V. E. Mandrij, Kimberly Schenck, Stacey Sell, Giulia Simonini and Friedrich Steinle. *Natural History Illustration in Pen and Ink*, Sarah Morrish, 2021-08-23 This beautiful book combines the author's extensive ecological knowledge with art and her passion for drawing with ink.
