Heldmaier, Martin F. Bach, Susanne Klaus, 2013-06-29 This book contains the proceedings of the 11th international symposium dedicated to the understanding of animal life in the cold held at Jungholz Austria August 13-18 2000. In 55 chapters contributed by researchers from 16 countries the current state of knowledge is reviewed and the most recent developments and discussions in this field are highlighted. The first symposium on hibernation and life in the cold was held in 1959 and from then on they continued to occur every 3-5 years. The regular occurrence of these meetings became almost a tradition. A tradition which is entirely based on the enthusiasm of participants and was nourished by scientific progress in this area during the past decades. The first symposium in 1959 was organised by Charles P. Lyman and Albert R. Dawe and was almost entirely dedicated to hibernation and torpor. This has been a backbone topic of the following symposia although other aspects of animal energetics, thermal physiology and biochemistry were included in later meetings. Australian Lizards Stephen K. Wilson, 2012 The extraordinary lives of lizards remain largely hidden from human eyes. Lizards feed, mate, lay eggs or give live birth and carefully manage their temperatures. They struggle to survive in a complex world of predators and competitors. The nearly 700 named Australian species are divided into seven families: the dragons, monitors, skinks, flap-footed lizards and three families of geckos. Using a vast array of artful strategies, lizards have managed to find a home in virtually all terrestrial habitats. *Australian Lizards: A Natural History* takes the reader on a journey through the remarkable life of lizards. It explores the places in which they live and what they eat, shows how they make use of their senses and how they control their temperatures, how they reproduce and how they defend themselves. Lavishly illustrated with more than 400 color photographs, this book reveals behavioral aspects never before published, offering a fascinating glimpse into the unseen lives of these reptiles. It will appeal to a diverse readership from those with a general interest in natural history to the seasoned herpetologist. **The Library of Natural History**, 1906
