*Natural Resource and Environmental Policy Analysis* George M. Johnston, David Freshwater, Philip Favero, 1988-01-01

Natural Resource And Environmental Policy Analysis George M Johnston, 2021-11-28 As natural resources have become scarcer issues of environmental policy have become more vital and subject to debate in global as well as local arenas Through the use of case studies especially developed for this book the authors analyze the wide range of institutional contexts in which natural resource and environmental policy issues arise and the processes by which they are resolved The first chapter provides a theoretical framework of key resource and environmental economics concepts an overview that gradually broadens as the student is exposed to alternative methods of analysis including market oriented analysis institutional analysis and modeling The case studies all begin with discussions of the pertinent biological physical social and institutional issues before economic analysis is applied and policy conclusions are drawn Suggested readings and study questions follow each chapter This book is designed for use in upper level college courses in natural resource and environmental economics and graduate courses in resource management It can be used either as a primary text in conjunction with theoretical readings or as a supplemental source of case study readings The cases will also be valuable for natural resource environmental and community development economists

**Problems** Philip Favero, 1997 **Environmental Resources and Applied Welfare Economics** V. Kerry Smith, 2015-06-18

This book first published in 1988 provides an overview of the diverse work that was being done in applied and theoretical environmental and resource economics Some essays reflect upon the background of the work of John Krutilla one of the founders of Resources for the Future and a leading scholar of environmental economics and the development of the field to date Other essays examine and convey findings on particular resource problems and theoretical issues and resource policies and the practice of applied welfare economics This title will be of interest to students of economics and environmental studies

**Environmental Protection at the State Level** Evan J. Ringquist, 2016-09-16 Why do some states enact stronger pollution control programmes than others And do stronger controls have identifiable impacts on environmental quality in

these states This work seeks to answer these question by means of combining data methods and theory from the natural and social sciences      **Environmental and Natural Resource Economics** Tom Tietenberg,Lynne Lewis,2023-07-31

Environmental and Natural Resource Economics is one of the most widely used textbooks for environmental economics and natural resource economics courses offering a policy oriented approach and introducing economic theory and empirical work from the field Students will develop a global perspective of both environmental and natural resource economics and how they interact This 12th edition provides updated data new studies and more international examples There is a considerable amount of new material with a deeper focus on climate change and coverage of COVID 19 social justice and the circular economy Key features include Extensive coverage of major contemporary issues including climate change water and air pollution resource allocation biodiversity protection sustainable development and environmental justice Four chapters specifically devoted to climate economics including chapters on energy climate mitigation carbon pricing and adaptation to climate change Introductions to the theory and method of environmental economics including externalities benefit cost analysis valuation methods and ecosystem goods and services and updates to the social cost of carbon New examples and debates throughout the text highlighting global cases and major talking points Environmental and Natural Resource Economics supports students with end of chapter summaries discussion questions exercises and further reading in the book and the companion website offers additional learning and teaching resources      *Natural Resources as Capital* Larry Karp,2017-10-27 An introduction to the concepts and tools of natural resource economics including dynamic models market failures and institutional remedies This introduction to natural resource economics treats resources as a type of capital their management is an investment problem requiring forward looking behavior within a dynamic setting Market failures are widespread often associated with incomplete or nonexistent property rights complicated by policy failures The book covers standard resource economics topics including both the Hotelling model for nonrenewable resources and models for renewable resources The book also includes some topics in environmental economics that overlap with natural resource economics including climate change The text emphasizes skills and intuition needed to think about dynamic models and institutional remedies in the presence of both market and policy failures It presents the nuts and bolts of resource economics as applied to nonrenewable resources including the two period model stock dependent costs and resource scarcity The chapters on renewable resources cover such topics as property rights as an alternative to regulation the growth function steady states and maximum sustainable yield using fisheries as a concrete setting Other less standard topics covered include microeconomic issues such as arbitrage and the use of discounting policy problems including the Green Paradox foundations for policy analysis when market failures are important and taxation Appendixes offer reviews of the relevant mathematics The book is suitable for use by upper level undergraduates or with the appendixes masters level courses      *Encyclopedia of Energy, Natural Resource, and Environmental Economics* ,2013-03-29 Every decision about energy involves its price and cost

The price of gasoline and the cost of buying from foreign producers the price of nuclear and hydroelectricity and the costs to our ecosystems the price of electricity from coal fired plants and the cost to the atmosphere Giving life to inventions lifestyle changes geopolitical shifts and things in between energy economics is of high interest to Academia Corporations and Governments For economists energy economics is one of three subdisciplines which taken together compose an economic approach to the exploitation and preservation of natural resources energy economics which focuses on energy related subjects such as renewable energy hydropower nuclear power and the political economy of energy resource economics which covers subjects in land and water use such as mining fisheries agriculture and forests environmental economics which takes a broader view of natural resources through economic concepts such as risk valuation regulation and distribution Although the three are closely related they are not often presented as an integrated whole This Encyclopedia has done just that by unifying these fields into a high quality and unique overview The only reference work that codifies the relationships among the three subdisciplines energy economics resource economics and environmental economics Understanding these relationships just became simpler Nobel Prize Winning Editor in Chief joint recipient 2007 Peace Prize Jason Shogren has demonstrated excellent team work again by coordinating and steering his Editorial Board to produce a cohesive work that guides the user seamlessly through the diverse topics This work contains in equal parts information from and about business academic and government perspectives and is intended to serve as a tool for unifying and systematizing research and analysis in business universities and government

*The Green Fiscal Mechanism and Reform for Low Carbon Development* Akihisa Mori,Paul Ekins,Stefan Speck,Soo-Cheol Lee,Kazuhiro Ueta,2013-10-30 This book reviews how far East Asian nations have implemented green fiscal reform and show how they can advance carbon energy tax reform to realize low carbon development with special reference to European policy and experience East Asian nations are learning European experiences to adopt them in their political economic and institutional contexts However implementation has been slow in practice partly due to low acceptability that comes from the same concerns as in Europe and partly due to weak institutional arrangements for the reform The slow progress in the revenue side turns our eyes on expenditure side how East Asian nations have increased environmental related expenditures and how far they have greened sectorial expenditures This lifecycle assessment of the fiscal reform coupled with the assessment of the institutional arrangement constitutes the features of this book The book helps to provide overall picture of green fiscal reform and carbon energy tax reform in the East Asian region The region has a variety of countries from lowest income to high income nations Nations have different interests in substance and barriers for reform This book covers recent development of environmental fiscal reform and carbon energy taxation in wider nations in the region including South Korea Taiwan Thailand Vietnam Indonesia and Japan In addition the book s holistic view helps to understand why a specific nation has interest and concern on some aspects of the reforms
