**Everyday Horsemanship** Eliza R. L. McGraw, 2006. How to understand and respect a horse's nature, train him humanely, and care for his physical and mental well-being.

**Horse Crazy** Jean O'Malley Halley, 2019-07-01. Horse Crazy explores the meaning behind the love between girls and horses. Jean O'Malley Halley, a self-professed horse girl, contends that this relationship and its cultural signifiers influence the manner in which young girls define their identity when it comes to gender. Halley examines how popular culture, including the pony book genre, uses horses to encourage conformity to gender norms but also insists that the loving relationship between a girl and a horse fundamentally challenges sexist and mainstream ideas of girlhood. Horse Crazy looks at the relationships between girls and horses through the frameworks of Michel Foucault's concepts of normalization and biopower, drawing conclusions about the way girls' agency is both normalized and resistant to normalization. Segments of Halley's own experiences with horses as a young girl, as well as experiences from the perspective of other girls, are sources for examination. Horsey girls, as she calls them, are girls who find a way to defy the expectations given to them by society, thinness obsession, with makeup and beauty frailty, and gain the possibility of freedom in the process. Drawing on Nicole Shukin's uses of animal capital theories, Halley also explores the varied treatment of horses themselves as an example of the biopolitical use of nonhuman animals and the

manipulation and exploitation of horse life In so doing she engages with common ways we think and feel about animals and with the technologies of speciesism

The question of agency is a key issue in social theory and research. The discourse of human agency as an effect of social relations is deeply intertwined with the history of sociological thought. However, in most recent discussions, the role of non-humans gains a substantial impact concerning agency. *Agency without Actors: New Approaches to Collective Action* asks: Are nonhumans active? Do they have agency? And if so, how and in which different ways? Consequently, *Agency without Actors: New Approaches to Collective Action* outlines a wide range of novel accounts that link human and non-human agency, tries to understand social, technical, political, and environmental networks as different forms of agency that produce discrete and identifiable entities, asks how different types of often conflicting agency and agents are distinguished in practice, how they are maintained, and how they interfere with each other. By studying the substantial impact of the role of non-humans in

connection with human relations the book aims to advance the discourse on agency and investigates into the different possible modes of human and nonhuman interplay This book is essential reading for students and scholars of sociology science and technology studies social anthropology animal studies environmental studies and social theory Sport, Animals, and Society James Gillett, Michelle Gilbert, 2013-12-17 This book advances current literature on the role and place of animals in sport and society It explores different forms of sporting spaces examines how figures of animals have been used to racialize the human athlete and encourages the reader to think critically about animal ethics animals in space time and place and the human animal relationship The chapters highlight persistent dichotomies in the use of and collaboration with animals for sport and present strategies for moving forward in the study of interspecies relations
