**Natural Human Fertility** Peter Diggory, 1988-06-18      **Natural Human Fertility** Eugenics Society (London, England). Symposium, 1988      **Human Evolutionary Biology** Michael P. Muehlenbein, 2010-07-29 A wide ranging and inclusive text focusing on topics in human evolution and the understanding of modern human variation and adaptability      *Dynamics of Human Reproduction* James W. Wood, 2017-09-29 Awarded the W W Howells Award for the Outstanding Book in Biological Anthropology this volume presents a comprehensive integrated and up to date overview of the major physiological and behavioral factors affecting human reproduction In attempting to identify the most important causes of variation in fertility within and among human populations Wood summarizes data from a wide range of societies Trained as an anthropologist as well as a demographer he devotes special attention to so called natural fertility populations in which modern contraceptives and induced abortion are not used to limit reproductive output Such an emphasis enables him to study the interaction of biology and behavior with particular clarity The volume weaves together the physiological demographic and biometric approaches to human fertility in a way that will encourage future interdisciplinary research Instead of offering a general overview the focus is to answer one question Why does fertility and the number of live births vary from couple to couple within any particular population and from population to population across the human species as a whole Topics covered include ovarian function conception and pregnancy intrauterine mortality reproductive maturation and senescence coital frequency and the waiting time to conception marriage patterns and the initiation of reproduction the fertility reducing effects of breastfeeding the impact of maternal nutrition on reproduction and reproductive seasonality This unique combination of comprehensive subject matter and an integrated analytical approach makes the book ideally suited both as a graduate level textbook and as a reference work      *Demography: Analysis and Synthesis, Four Volume Set* Graziella Caselli, Jacques Vallin, Guillaume Wunsch, 2006-01-03 This four volume collection of over 140 original chapters covers virtually everything of interest to demographers sociologists and others Over 100 authors present population subjects in ways that provoke thinking and lead to the creation of new perspectives not just facts and equations to be memorized The articles follow a theory methods applications approach and so offer a kind of one stop shop that is well suited for students and professors who need non technical summaries such as political scientists public affairs specialists and others Unlike shorter handbooks *Demography Analysis and Synthesis* offers a long overdue thorough treatment of the field Choosing the analytical method that fits the data and the situation requires insights that the authors and editors of *Demography Analysis and Synthesis* have explored and developed This extended examination of demographic tools not only seeks to explain the analytical tools themselves but also the relationships between general population dynamics and their natural economic social political and cultural environments Limiting themselves to human populations only the authors and editors cover subjects that range from the core building blocks of population change fertility mortality and migration to the consequences of

demographic changes in the biological and health fields population theories and doctrines observation systems and the teaching of demography The international perspectives brought to these subjects is vital for those who want an unbiased rounded overview of these complex multifaceted subjects Topics to be covered Population Dynamics and the Relationship Between Population Growth and Structure The Determinants of Fertility The Determinants of Mortality The Determinants of Migration Historical and Geographical Determinants of Population The Effects of Population on Health Economics Culture and the Environment Population Policies Data Collection Methods and Teaching about Population Studies All chapters share a common format Each chapter features several cross references to other chapters Tables charts and other non text features are widespread Each chapter contains at least 30 bibliographic citations *The Lifeways of Hunter-Gatherers* Robert L. Kelly, 2013-04-15 In this book Robert L Kelly challenges the preconceptions that hunter gatherers were Paleolithic relics living in a raw state of nature instead crafting a position that emphasizes their diversity and downplays attempts to model the original foraging lifeway or to use foragers to depict human nature stripped to its core Kelly reviews the anthropological literature for variation among living foragers in terms of diet mobility sharing land tenure technology exchange male female relations division of labor marriage descent and political organization Using the paradigm of human behavioral ecology he analyzes the diversity in these areas and seeks to explain rather than explain away variability and argues for an approach to prehistory that uses archaeological data to test theory rather than one that uses ethnographic analogy to reconstruct the past

Ibss: Anthropology: 1988 British Library of Political and Economic Science, 1992 This bibliography lists the most important works in anthropology published in 1988 **Footbinding and Women's Labor in Sichuan** Hill

Gates, 2014-12-05 When Chinese women bound their daughters feet many consequences ensued some beyond the imagination of the binders and the bound The most obvious of these consequences was to impress upon a small child's body and mind that girls differed from boys thus reproducing gender hierarchy What is not obvious is why Chinese society should have evolved such a radical method of gender marking Gendering is not simply preparation for reproduction rather its primary significance lies in preparing children for their places in the division of labor of a particular political economy Drawing on extensive fieldwork and interviews with almost 5 000 women this book examines footbinding as Sichuan women remember it from the final years of the empire and the troubled times before the 1949 revolution It focuses on two key questions what motivated parents to maintain this custom and how significant was girls work in China's final pre industrial century In answering these questions Hill Gates shows how footbinding was a form of labor discipline in the first half of the twentieth century in China when it was a key institution in a now much altered political economy Countering the widely held views surrounding the sexual attractiveness of bound feet to Chinese men footbinding as an ethnic boundary marker its role

in female hypergamy and its connection to state imperatives this book instead presents a compelling argument that footbinding was in fact a crucial means of disciplining of little girls to lives of early and unremitting labor This vivid and fascinating study will be of huge interest to students and scholars working across a wide range of fields including Chinese history oral history anthropology and gender studies Women Letter-Writers in Tudor England James Daybell,2018-09-26 This book represents the most comprehensive study of women s letters and letter writing during the early modern period so far undertaken and acts as an important corrective to traditional ways of reading and discussing letters as private elite male and non political Based on over 3 000 manuscript letters it shows that letter writing was a larger and more socially diversified area of female activity than has been hitherto assumed In that letters constitute the largest body of extant sixteenth century women s writing the book initiates a reassessment of women s education and literacy in the period As indicators of literacy letters yield physical evidence of rudimentary writing activity and abilities document higher forms of female literacy and highlight women s mastery of formal rhetorical and epistolary conventions The book also stresses that letters are unparalleled as intimate and immediate records of family relationships and as media for personal and self reflective forms of female expression Read as documents that inscribe social and gender relations letters shed light on the complex range of women s personal relationships as female power and authority fluctuated negotiated on an individual basis Furthermore correspondence highlights the important political roles played by early modern women Female letter writers were integral in cultivating and maintaining patronage and kinship networks they were active as suitors for crown favour and operated as political intermediaries and patrons in their own right using letters to elicit influence Letters thus help to locate differing forms of female power within the family locality and occasionally on the wider political stage and offer invaluable primary evidence from which to reconstruct the lives of early modern women **Urbanism in the Preindustrial World** Glenn R.  Shining stars and black holes population and preindustrial cities Deborah L Nichols *The Bakairí Indians of Brazil* Debra Picchi, 2006-02-15 For over twenty five years Debra Picchi has documented how the Bakair Indians have addressed and endured change This up close portrayal of how a remarkable indigenous people of Brazil has managed to hold on to many of their traditions after years of contact with mainstream Brazilian culture is written in a down to earth conversational style yet does not avoid complex issues The original edition represented one of the first ethnographies on South American Indians to espouse political ecology explicitly as a theoretical orientation Expanded coverage in the second edition includes material on the theory of political ecology different methodological approaches used to collect data on populations the latest archaeological findings taking place in Brazil how Bakair gender constructs have changed over the last 100 years and the effects of population increases mechanized production and wealth accumulation Both accessible and rigorous Picchi packs much information into a slim volume which serves as a reminder of the value of long term fieldwork and demonstrates that research is as much about process as it is about product The Sugar Masters Richard Follett, 2005-06-01 Focusing on the master slave relationship in Louisiana s antebellum sugarcane country The Sugar Masters explores how a modern capitalist mind set among planters meshed with old style paternalistic attitudes to create one of the South s most insidiously oppressive labor systems As author Richard Follett vividly demonstrates the agricultural paradise of Louisiana s thriving sugarcane fields came at an unconscionable cost to slaves Thanks to technological and business innovations sugar planters stood as models of capitalist entrepreneurship by midcentury But above all labor management was the secret to their impressive success Follett explains how in exchange for increased productivity and efficiency they offered their slaves a range of incentives such as greater autonomy improved accommodations and even financial remuneration These material gains however were only short term According to Follett many of Louisiana s sugar elite presented their incentives with a facade of paternal reciprocity that seemingly bound the slaves interests to the apparent goodwill of the masters but in fact the owners sought to control every aspect of the slaves s lives from reproduction to discretionary income Slaves responded to this display of paternalism by trying to enhance their rights under bondage but the constant bargaining process invariably led to compromises on their part and the grueling production pace never relented The only respite from their masters demands lay in fashioning their own society including outlets for religion leisure and trade Until recently scholars have viewed planters as either paternalistic lords who eschewed marketplace values or as entrepreneurs driven to business success Follett offers a new view of the sugar masters as embracing both the capitalist market and a social ideology based on hierarchy honor and paternalism His stunning synthesis of empirical research demographics study and social and cultural history sets a new standard for this subject Autonomy Aparna Rao, 1998 The question of individuality in non European and especially South Asian societies is a controversial one Studies in anthropology and psychology undertaken in recent

years on concepts of person and self approach the problem by concentrating on ideologies the question of practice remains largely neglected This is the first study to examine the individual dividual debate empirically from the emic perspective of decision making observed over a two year period among the Bakkarwal Himalayan Muslim pastoralists Of particular significance is the fact that the author bases her approach on the life cycle and on gender and status differences **The Foraging Spectrum** R. J. Kelly,2007-12-31 The author wrote this book primarily for his archaeology students to show them how dangerous anthropological analogy is and how variable the actual practices of foragers of the recent past and today are His survey of anthropological literature points to differences in foraging societies patterns of diet mobility sharing land tenure exchange gender relations division of labour marriage descent and political organisation By considering the actual not imagined reasons behind diverse behaviour this book argues for a revision of many archaeological models of prehistory From the reviews A n excellent overview of key issues in hunter gatherer studies Alan Barnard in American Ethnologist Not since Man the Hunter has there been such a synthesis and such a mix of stimulating ideas This will be the authoritative work on hunter gatherers for a good number of years Brian Hayden in Canadian Journal of Archaeology A uthoritative comprehensive and highly readable A well worn and heavily annotated copy should be the companion of anyone claiming an interest or expertise in present or past hunter gatherers Bruce Winterhalder in American Antiquity Prepublication praise The Foraging Spectrum is a well written scrupulously researched synthesis of modern approaches to foraging behavior both past and present David Hurst Thomas American Museum of Natural History A tour de force of scholarship in behavioral ecology Mathias Guenther Wilfred Laurier University **Andean Civilization** Joyce Marcus,Patrick Ryan Williams,2009-12-31 This volume brings together exciting new field data by more than two dozen Andean scholars who came together to honor their friend colleague and mentor These new studies cover the enormous temporal span of Moseley s own work from the Preceramic era to the Tiwanaku and Moche states to the Inka empire And like Moseley s own studies from Maritime Foundations of Andean Civilization to Chan Chan The Desert City to Cerro Baul s brewery these new studies involve settlements from all over the Andes from the far northern highlands to the far southern coast An invaluable addition to any Andeanist s library the papers in this book demonstrate the enormous breadth and influence of Moseley s work and the vibrant range of exciting new work by his former students and collaborators in fieldwork **Strategies of Sex and Survival in Female Hamadryas Baboons** Larissa Swedell,2015-10-15 This book describes the first field study focusing on the behavior of hamadryas females in the wild In its attempt to rectify the male biased view of hamadryas baboon behavior that has persisted over the decades this book suggests that female behavior contributes more to hamadryas social organization than has previously been assumed and that females may in fact be acting in their own best interests after all For upper level undergraduate courses on primate behavior and ecology **Adaptation and Human Behavior** Napoleon Chagnon,2017-09-08 This volume presents state of the art empirical studies working in a paradigm that has become known

as human behavioral ecology The emergence of this approach in anthropology was marked by publication by Aldine in 1979 of an earlier collection of studies edited by Chagnon and Irons entitled *Evolutionary Biology and Human Social Behavior An Anthropological Perspective* During the two decades that have passed since then this innovative approach has matured and expanded into new areas that are explored here The book opens with an introductory chapter by Chagnon and Irons tracing the origins of human behavioral ecology and its subsequent development Subsequent chapters written by both younger scholars and established researchers cover a wide range of societies and topics organized into six sections The first section includes two chapters that provide historical background on the development of human behavioral ecology and compare it to two complementary approaches in the study of evolution and human behavior evolutionary psychology and dual inheritance theory The second section includes five studies of mating efforts in a variety of societies from South America and Africa The third section covers parenting with five studies on societies from Africa Asia and North America The fourth section breaks somewhat with the tradition in human behavioral ecology by focusing on one particularly problematic issue the demographic transition using data from Europe North America and Asia The fifth section includes studies of cooperation and helping behaviors using data from societies in Micronesia and South America The sixth and final section consists of a single chapter that places the volume in a broader critical and comparative context The contributions to this volume demonstrate with a high degree of theoretical and methodological sophistication the maturity and freshness of this new paradigm in the study of human behavior The volume will be of interest to anthropologists and other professions working on the study of cross cultural human behavior

**The Oxford Handbook of the History of Eugenics** Alison Bashford, Philippa

Levine, 2010-08-03 Eugenic thought and practice swept the world from the late nineteenth to the mid twentieth century in a remarkable transnational phenomenon Eugenics informed social and scientific policy across the political spectrum from liberal welfare measures in emerging social democratic states to feminist ambitions for birth control from public health campaigns to totalitarian dreams of the perfectibility of man This book dispels for uninitiated readers the automatic and apparently exclusive link between eugenics and the Holocaust It is the first world history of eugenics and an indispensable core text for both teaching and research Eugenics has accumulated generations of interest as experts attempted to connect biology human capacity and policy In the past and the present eugenics speaks to questions of race class gender and sex evolution governance nationalism disability and the social implications of science In the current climate in which the human genome project stem cell research and new reproductive technologies have proven so controversial the history of eugenics has much to teach us about the relationship between scientific research technology and human ethical decision making

**Paleodemography** Robert D. Hoppa, James W. Vaupel, 2008-10-30 Paleodemography is the field of enquiry that attempts to identify demographic parameters from past populations usually skeletal samples derived from archaeological contexts and then to make interpretations regarding the health and well being of those populations However paleodemographic theory

relies on several assumptions that cannot easily be validated by the researcher and if incorrect can lead to large errors or biases In this book physical anthropologists mathematical demographers and statisticians tackle these methodological issues for reconstructing demographic structure for skeletal samples Topics discussed include how skeletal morphology is linked to chronological age assessment of age from the skeleton demographic models of mortality and their interpretation and biostatistical approaches to age structure estimation from archaeological samples This work will be of immense importance to anyone interested in paleodemography including biological and physical anthropologists demographers geographers evolutionary biologists and statisticians
