Natural Magic:

Natural Magic Renée Bergland, 2024-04-30 A captivating portrait of the poet and the scientist who shared an enchanted view of nature Emily Dickinson and Charles Darwin were born at a time when the science of studying the natural world was known as natural philosophy a pastime for poets priests and schoolgirls The world began to change in the 1830s while Darwin was exploring the Pacific aboard the Beagle and Dickinson was a student in Amherst Massachusetts Poetry and science started to grow apart and modern thinkers challenged the old orthodoxies offering thrilling new perspectives that suddenly felt radical and too dangerous for women *Natural Magic* intertwines the stories of these two luminary nineteenth century minds whose thought and writings captured the awesome possibilities of the new sciences and at the same time strove to preserve the magic of nature Just as Darwin's work was informed by his roots in natural philosophy and his belief in the interconnectedness of all life Dickinson's poetry was shaped by her education in botany astronomy and chemistry and by her fascination with the enchanting possibilities of Darwinian science Casting their two very different careers in an entirely fresh light Renée Bergland brings to life a time when ideas about science were rapidly evolving reshaped by poets scientists philosophers and theologians alike She paints a colorful portrait of a remarkable century that transformed how we see the natural world Illuminating and insightful *Natural Magic* explores how Dickinson and Darwin refused to accept the separation of art and science Today more than ever we need to reclaim their shared sense of ecological wonder *The Elements of Natural Magic* Marian Green, 1989 **Letters on Natural Magic, Addressed to Sir Walter Scott, Bart** David

Natural Particulars Anthony Grafton,Nancy G. Siraisi,1999 Recently the history of science in early modern Europe has been both invigorated and obscured by divisions between scholars of different schools One school tends to claim that rigorous textual analysis provides the key to the development of science whereas others tend to focus on the social and cultural contexts within which disciplines grew This volume challenges such divisions suggesting that multiple historical approaches are both legitimate and mutually complementary *Christian Counseling and Occultism (Koch)* Kurt E. Koch,1965 *Natural Magic and Modern Science* Wayne Shumaker,1989 **The Language of Demons and Angels** Christopher I. Lehrich,2003-01-01 This is the first modern study of Agrippa s occult philosophy revealing it to be a coherent part of his intellectual work It analyzes the text of De occulta philosophia explicating the sophisticated structure and

argument of the work A History of Natural Philosophy Edward Grant, 2007-01-22 Natural philosophy encompassed all natural phenomena of the physical world It sought to discover the physical causes of all natural effects and was little concerned with mathematics By contrast the exact mathematical sciences were narrowly confined to various computations that did not involve physical causes functioning totally independently of natural philosophy Although this began slowly to change in the late Middle Ages a much more thoroughgoing union of natural philosophy and mathematics occurred in the seventeenth century and thereby made the Scientific Revolution possible The title of Isaac Newton s great work The Mathematical Principles of Natural Philosophy perfectly reflects the new relationship Natural philosophy became the Great Mother of the Sciences which by the nineteenth century had nourished the manifold chemical physical and biological sciences to maturity thus enabling them to leave the Great Mother and emerge as the multiplicity of independent sciences we know today Instruments and the Imagination Thomas L. Hankins, Robert J. Silverman, 2014-07-14 Thomas Hankins and Robert Silverman investigate an array of instruments from the seventeenth through the nineteenth century that seem at first to be marginal to science magnetic clocks that were said to operate by the movements of sunflower seeds magic lanterns ocular harpsichords machines that played different colored lights in harmonious mixtures Aeolian harps a form of wind chime and other instruments of natural magic designed to produce wondrous effects By looking at these and the first recording instruments the stereoscope and speaking machines the authors show that scientific instruments first made their appearance as devices used to evoke wonder in the beholder as in works of magic and the theater The authors also demonstrate that these instruments even though they were often tricks were seen by their inventors as more than trickery In the view of Athanasius Kircher for instance the sunflower clock was not merely a hoax but an effort to demonstrate however fraudulently his truly held belief that the ability of a flower to follow the sun was due to the same cosmic magnetic influence as that which moved the planets and caused the rotation of the earth The marvels revealed in this work raise and answer questions about the connections between natural science and natural magic the meaning of demonstration the role of language and the senses in science and the connections among art music literature and natural science Originally published in 1995 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905 **Earth, Air, Fire & Water** Scott Cunningham, 1991 Copyright date of 1st rev ed 2005 1st ed published in 1991
