Commodity Price Volatility and Inclusive Growth in Low-Income Countries Mr.Rabah Arezki,Ms.Catherine A Pattillo,Mr.Marc G Quintyn,Min Zhu,2012-10-24 In the years following the global financial crisis many low income countries experienced rapid recovery and strong economic growth However many are now facing enormous difficulties because of rapidly rising food and fuel prices with the threat of millions of people being pushed into poverty around the globe The risk of continued food price volatility is a systemic challenge and a failure in one country has been shown to have a profound impact on entire regions This volume addresses the challenges of commodity price volatility for low income countries and explores some macroeconomic policy options for responding to commodity price shocks The book then looks at inclusive growth policies to address inequality in commodity exporting countries particularly natural resource rich countries Perspectives from the Middle East and North Africa sub Saharan Africa emerging Asia and Mexico are presented and finally the role of the international donor community is examined This volume is a must read for policymakers everywhere from those in advanced donor countries to those in countries with the poorest and most vulnerable populations

The Art of Planning Leland S. Burns,John Friedmann,2012-12-06 The work of Harvey S Perloff stands as a landmark in the evolution of Anglo American planning doctrine It is impossible to fully capture the essence of the published work in a paragraph page or even an entire essay Yet its highpoints can be identified His work was innovative reformist comprehensive and oriented toward the future In emphasizing the greater importance of people compared to things Perloff repeatedly prodded planners to be concerned with human needs and values He was critical of the past But inasmuch as he devoted more effort to envisioning what could lie ahead than in recalling the past his work was markedly optimistic He once admitted in writing to his built in weakness for expecting rational socially oriented solutions ultimately to win out no matter what the objective situation seems to be To some the expectation may be seen as naive to others as a faith in the wisdom of humankind to take the best course However received Perloff's optimism served as a powerful stimulant to keep moving ahead for the best that would come of it Institutions and the ways they should be shaped and reshaped were of central concern for institutions though he rarely used the term were the instruments through which knowledge was translated into action

Global Justice and Resource Curse Frank Aragbonfoh Abumere,2021-08-12 This book explores whether any theory alone is sufficiently capable of resolving the complexity of global justice arguing that a combination of statism and cosmopolitanism is needed In current times xenophobia nationalism and populism have amplified othering in both domestic and international politics In global justice the dichotomy between the polis and the cosmopolis separates statism from cosmopolitanism Using resource curse as a complex case of global justice the author demonstrates how neither statism nor

cosmopolitanism alone are sufficient but goes on to argue that a combination of the two theories is simultaneously necessary and sufficient to resolve the complexity of global justice. He demonstrates how statism is primarily applied to the institutional dimensions of resource curse and only secondarily applied to the interactional dimensions while cosmopolitanism is applied to the interactional dimensions but only secondarily applied to the institutional dimensions and therefore a combination of both theories is needed to resolve the problem of resource curse using the strength of the former to compensate for the weakness of the latter and vice versa. Global justice is widely taught and researched as one of the most important areas in political philosophy and political theory. This book will be of great interest to students and researchers, philosophers and political scientists of African politics, political theory, political philosophy, international relations and international development.

Rent, Resources, Technologies Alberto Quadrio Curzio, Fausta Pellizzari, 2013-03-09. Rent, resources and technologies are three crucial issues to the understanding of history and economics. The scarcity of resources, its interplay with technology and the role of rent in explaining both economic growth and income distribution are investigated by adopting a multi-sectoral and non-proportional model where scarce resources impose several scale constraints that may slow growth but may contribute to further development of new technologies. In this dynamic framework, the category of rent acquires new dimensions with far-reaching implications for both the system of prices and the distribution of income. The analytical and formal theoretical perspective of this book could be used as a basis for future historical and quantitative studies.
