to her that the interest in hybridization of roses began to grow in France and from there it spread to the rest of Europe As hybridization of roses is an easy process those 160 species grew up into 6000 species of roses of cultivars and hybrids Prevost and Pepinieriste wrote down 880 names of different rose species in their Rose catalog But other rose species which were native to northwest Africa and North America were already being in use for medical purposes cooking purposes beautification purposes and also as symbols since ancient and medieval times The idea of My Love Is like a Red Red Rose has been en vogue for centuries Why is this so because a rose is normally accompanied with thorns which were a defensive protective epidermal outgrowths The original roses or creepers and they managed to cling to plants with the help of these thorns The idea of Roses for love have come down the millenniums as from the classical times when the rose was associated and identified with Venus Aphrodite

An Ethnography of Fragrance Dinah Jung, 2022-06-08 The perfumery arts in Asia have traditionally been presented as exotic or in recent decades mainly ignored The ethnographic report in hand recalibrates the character and meaning of perfumery in the Islamic world illustrated by the local example of Adan La j By retelling the stories which have become associated with specific fragrances there the author simultaneously introduces the reader to the history and culture of Islam and the southern edge of Yemen The cultural exchange along the Indian Ocean Rim and within the colonial empires supported the spread and refinement of aromatics The result is a new and fascinating portrayal and explanation of perfumery in general as well as of its tradition and special features in West Asia up to recent times
