Nature History A Study In Theological:

A Natural History of Natural Theology Helen De Cruz, Johan De Smedt, 2014-12-19 An examination of the cognitive foundations of intuitions about the existence and attributes of God Questions about the existence and attributes of God form the subject matter of natural theology which seeks to gain knowledge of the divine by relying on reason and experience of the world Arguments in natural theology rely largely on intuitions and inferences that seem natural to us occurring spontaneously at the sight of a beautiful landscape perhaps or in wonderment at the complexity of the cosmos even to a nonphilosopher In this book Helen De Cruz and Johan De Smedt examine the cognitive origins of arguments in natural theology They find that although natural theological arguments can be very sophisticated they are rooted in everyday intuitions about purpose causation agency and morality Using evidence and theories from disciplines including the cognitive science of religion evolutionary ethics evolutionary aesthetics and the cognitive science of testimony they show that these intuitions emerge early in development and are a stable part of human cognition De Cruz and De Smedt analyze the cognitive underpinnings of five well known arguments for the existence of God the argument from design the cosmological argument the moral argument the argument from beauty and the argument from miracles Finally they consider whether the cognitive origins of these natural theological arguments should affect their rationality *A Preface to Theology* W. Gilpin, 1996-11-15 At a time of widespread perplexity about the social role of humanistic scholarship few disciplines are as anxious about their nature and purposes as academic theology In this important work W Clark Gilpin dean of the University of Chicago Divinity School proposes that American theological scholarship become responsible to a threefold public the churches the academic community and civil society Gilpin approaches this goal indirectly by investigating the historic social roles of Protestant theologians and the educational institutions in which they have pursued their scholarship and teaching Ranging from analyses of the New England Puritan Cotton Mather to contemporary theologians as public intellectuals Gilpin proposes that we find out what theology is by asking what theologians do By showing how particular cultural problems have always shaped the work of theologians Gilpin's work profoundly illuminates the foundations of American academic theology providing insights that will help guide its future

Scientific Endeavour Professor Christopher B Kaiser, 2013-05-28 Foundations of science are specific conditions of the cosmos of human intelligence of cultural beliefs and of technological structures that make the pursuit of modern science possible Each of the four foundations of scientific endeavour can be studied as a topic on its own The concurrent study of all four together reveals several tensions and interconnections among them that point the way to a greater unification of faith and science This book explores four foundations of scientific endeavour and investigates some of the paradoxes each of them raises Kaiser shows that the resolution of these paradoxes inevitably leads us into theological discourse and raises new challenges for theological endeavour In order to address these challenges Kaiser draws on the wider resources of the Judeo Christian tradition and argues for a refocusing of contemporary theology from the perspective of natural science
