Nature Of Cities Ecocriticism And Urban Environments:

The Nature of Cities Michael Bennett, David W. Teague, 2021-10-12 Cities are often thought to be separate from nature but recent trends in ecocriticism demand that we consider them as part of the total environment This new collection of essays sharpens the focus on the nature of cities by exploring the facets of an urban ecocriticism by reminding city dwellers of their place in ecosystems and by emphasizing the importance of this connection in understanding urban life and culture The editors both raised in small towns but now living in major urban areas are especially concerned with the sociopolitical construction of all environments both natural and manmade Following an opening interview with Andrew Ross exploring the general parameters of urban ecocriticism they present essays that explore urban nature writing city parks urban wilderness ecofeminism and the city and urban space The volume includes contributions on topics as wide ranging as the urban poetry of English writers from Donne to Gay the manufactured wildness of a gambling casino and the marketing of cosmetics to urban women by idealizing Third World naturalness These essays seek to reconceive nature and its cultural representations in ways that contribute to understanding the contemporary cityscape They explore the theoretical issues that arise when one attempts to adopt and adapt an environmental perspective for analyzing urban life *The Nature of Cities* offers the ecological component often missing from cultural analyses of the city and the urban perspective often lacking in environmental approaches to contemporary culture By bridging the historical gap between environmentalism cultural studies and urban experience the book makes a statement of lasting importance to the development of the ecocritical movement

The Environmental Justice Reader Joni Adamson, Mei Mei Evans, Rachel Stein, 2002-11 A collection of essays on the environmental justice movement examining the various ways that teaching art and political action affect change in environmental awareness and policies

The Cambridge Introduction to Literature and the Environment Timothy Clark, 2011-01-06 The degrading environment of the planet is something that touches everyone This 2011 book offers an introductory overview of literary and cultural criticism that concerns environmental crisis in some form Both as a way of reading texts and as a theoretical approach to culture more generally ecocriticism is a varied and fast changing set of practices which challenges inherited thinking and practice in the reading of literature and culture This introduction defines what ecocriticism is its methods arguments and concepts and will enable students to look at texts in a wholly new way Boxed sections explain key critical terms and contemporary debates in the field with hands on examples and comparisons Timothy Clark's thoughtful approach makes this an ideal first encounter with environmental readings of literature

Ruderal City Bettina Stoetzer, 2022-11-07 In *Ruderal City* Bettina Stoetzer traces relationships among people plants and animals in contemporary Berlin as they make their lives in the ruins of European nationalism and capitalism She develops the notion of the ruderal originally an ecological designation for the unruly life that inhabits inhospitable environments such as rubble roadsides train tracks and sidewalk cracks to theorize Berlin as a ruderal city Stoetzer explores sites in and around Berlin that have figured in German national

imaginaries gardens forests parks and rubble fields to show how racial class and gender inequalities shape contestations over today's uses and knowledges of urban nature Drawing on fieldwork with gardeners botanists migrant workers refugees public officials and nature enthusiasts while charting human and more than human worlds Stoetzer offers a wide ranging ethnographic portrait of Berlin's postwar ecologies that reveals emergent futures in the margins of European cities Brimming with stories that break down divides between environmental perspectives and the study of migration and racial politics Berlin's ruderal worlds help us rethink the space of nature and culture and the categories through which we make sense of urban life in inhospitable times

The Future of Environmental Criticism Lawrence Buell, 2009-02-09 Written by one of the world's leading theorists in ecocriticism this manifesto provides a critical summary of the ecocritical movement A critical summary of the emerging discipline of ecocriticism Written by one of the world's leading theorists in ecocriticism Traces the history of the ecocritical movement from its roots in the 1970s through to its diversification and proliferation today Takes account of different ecocritical positions and directions Describes major tensions within ecocriticism and addresses major criticisms of the movement Looks to the future of ecocriticism proposing that discourses of the environment should become a permanent part of literary and cultural studies

Reconciling Nature Robert M. Myers, 2019-11-01 Reveals how classic American novels embodied the tensions embedded in American views of the natural world from the Centennial until the end of the Second World War Reconciling Nature maps the complex views of the environment that are evident in celebrated American novels written between the Centennial Celebration of 1876 and the end of the Second World War During this period which includes the Progressive era and the New Deal Americans held three contradictory views of the natural world a recognition of nature's vulnerability to the changes brought by industrialism a fear of the power of nature to destroy human civilization and a desire to make nature useful Robert M Myers argues they reconciled these conflicting views through nature nostalgia policing of wilderness areas and through strategies of control borrowed from the social sciences Myers combines environmental history with original readings of eight novels producing fresh perspectives on Mark Twain's *Adventures of Huckleberry Finn* Stephen Crane's *Maggie* Kate Chopin's *The Awakening* Upton Sinclair's *The Jungle* Mary Austin's *The Ford* Theodore Dreiser's *An American Tragedy* Zora Neale Hurston's *Their Eyes Were Watching God* and William Faulkner's *Go Down Moses* While previous ecocritical works have focused on proto environmentalism in classic works of literature Reconciling Nature explores the ambivalence within these texts demonstrating how they reproduce views of nature as threatened threatening and useful The epilogue examines the environmental ideologies associated with the development and deployment of the first atomic bomb Reconciling Nature is an important contribution to ecocriticism American literary studies American studies and environmental history The book has incredible breadth and scope In each chapter Myers incorporates an impressive amount of historical context that always breathes new life into texts that have been discussed at length by other scholars Lloyd Willis author of *Environmental Evasion: The Literary, Critical and Cultural Politics of Nature's*

Nation *Routledge Handbook of the Digital Environmental Humanities* Charles Travis, Deborah P. Dixon, Luke Bergmann, Robert Legg, Arlene Crampsie, 2022-09-12 The Routledge Handbook of the Digital Environmental Humanities explores the digital methods and tools scholars use to observe interpret and manage nature in several different academic fields Employing historical philosophical linguistic literary and cultural lenses this handbook explores how the digital environmental humanities DEH as an emerging field recognises its convergence with the environmental humanities As such it is empirically critically and ethically engaged in exploring digitally mediated visualised and parsed framings of past present and future environments landscapes and cultures Currently humanities geographical cartographical informatic and computing disciplines are finding a common space in the DEH and are bringing the use of digital applications coding and software into league with literary and cultural studies and the visual film and performing arts In doing so the DEH facilitates transdisciplinary encounters between fields as diverse as human cognition gaming bioinformatics and linguistics social media literature and history music painting philology philosophy and the earth and environmental sciences This handbook will be essential reading for those interested in the use of digital tools in the study of the environment from a wide range of disciplines and for those working in the environmental humanities more generally Mussolini's Cities , **Key Concepts in Literary Theory** Julian Wolfreys, 2013-12-11 Key Concepts in Literary Theory presents the student of literary and critical studies with a broad range of accessible precise and authoritative definitions of the most significant terms and concepts currently used in psychoanalytic poststructuralist Marxist feminist and postcolonial literary studies The volume also provides clear and useful discussions of the main areas of literary critical and cultural theory supported by bibliographies and an expanded chronology of major thinkers Accompanying the chronology are short biographies of major works by each critic or theorist The third edition of this reliable reference work is both revised and expanded including more than 100 additional terms and concepts defined newly defined terms include keywords from the social sciences cultural studies and psychoanalysis and the addition of a broader selection of classical rhetorical terms an expanded chronology with additional entries and a broader historical and cultural range expanded bibliographies including key texts by major critics **Urban Ecologies** Christopher Schliephake, 2014-12-11 The term urban ecology has become a buzzword in various disciplines including the social and natural sciences as well as urban planning and architecture The environmental humanities have been slow to adapt to current theoretical debates often excluding human built environments from their respective frameworks This book closes this gap both in theory and in practice bringing together urban ecology with ecocritical and cultural ecological approaches by conceptualizing the city as an integral part of the environment and as a space in which ecological problems manifest concretely Arguing that culture has to be seen as an active component and integral factor within urban ecologies it makes use of a metaphorical use of the term perceiving cities as spatial phenomena that do not only have manifold and complex material interrelations with their respective natural environments but that are intrinsically

connected to the ideas imaginations and interpretations that make up the cultural symbolic and discursive side of our urban lives and that are stored and constantly renegotiated in their cultural and artistic representations The city is within this framework both seen as an ecosystemically organized space as well as a cultural artifact Thus the urban ecology outlined in this study takes its main impetus from an analysis of examples taken from contemporary culture that deal with urban life and the complex interrelations between urban communities and their natural and built environments

Film and Everyday Eco-disasters Robin L Murray, Joseph K Heumann, 2014-06-01 Eco disasters such as coal mining accidents oil spills and food borne diseases appear regularly in the news making them seem nearly commonplace These ecological crises highlight the continual tensions between human needs and the environmental impact these needs produce Contemporary documentaries and feature films explore environmental human conflicts by depicting the consequences of our overconsumption and dependence on nonrenewable energy Film and Everyday Eco disasters examines changing perspectives toward everyday eco disasters as reflected in the work of filmmakers from the silent era forward with an emphasis on recent films such as Dead Ahead an HBO dramatization of the Exxon Valdez disaster Total Recall a science fiction action film highlighting oxygen as a commodity The Devil Wears Prada a comment on the fashion industry and Food Inc a documentary interrogation of the food industry The authors evaluate not only the success of these films as rhetorical arguments but also their rhetorical strategies This interdisciplinary approach to film studies fuses cultural economic and literary critiques in articulating an approach to ecology that points to sustainable development as an alternative to resource exploitations and their associated everyday eco disasters

Words for a Small Planet Nanette Norris, 2013 Ecocriticism has matured beyond nature writing beyond writing about nature The essays in this volume look at the broader cultural historical sociological and psychological implications of ecology in written visual and sound culture In keeping with our sense of a global community these essays are representative of international scholarship on ecology and the environment and display the range of insight of which this criticism is capable Focusing on popular culture this volume is in the vanguard of our collective reflections on the directions in which our various societies are going

The Feminist Architecture of Postmodern Anti-Tales Kendra Reynolds, 2019-10-23 This monograph aims to counter the assumption that the anti tale is a subversive twin or dark side of the fairy tale coin instead it argues that the anti tale is a genre rich in complexity and radical potential that fundamentally challenges the damaging ideologies and socializing influence of fairy tales The Feminist Architecture of Postmodern Anti Tales Space Time and Bodies highlights how anti tales take up timely debates about revising old structures opening our minds up to a broader spectrum of experience or ways of viewing the world and its inhabitants They show us alternative architectures for the future by deconstructing established spatio temporal laws and structures as well as limited ideas surrounding the body and ultimately liberate us from the shackles of a single minded and simplistic masculine reality currently upheld by dominant social forces and patriarchal fairy tales themselves It is only when these masculine fairy tales and social architectures are deconstructed

that new more inclusive feminine realities and futures can be brought into being
