Nature Of Mental Things:

The Nature of Things Anthony M. Quinton, 2019-03-07 Originally published in 1973 In this systematic treatise Anthony Quinton examines the concept of substance a philosophical refinement of the everyday notion of a thing Four distinct but not unconnected problems about substance are identified what accounts for the individuality of a thing what confers identity on a thing what is the relation between a thing and its appearances and what kind of thing is fundamental in the sense that its existence is logically independent of that of any other kind of thing In Part 1 the first two problems are discussed while in Part 2 the third and fourth are considered Part 3 examines four kinds of thing that have been commonly held to be in some way non material abstract entities the unobservable entities of scientific theory minds and their states and finally values The author argues that theoretical entities and mental states are in fact material He gives a linguistic account of universals and necessary truths and advances a naturalistic theory of value Bruno, or On the Natural and Divine Principle of Things Friedrich Wilhelm Joseph von Schelling, 1984-01-01 Makes Schelling's dialogue Bruno readily accessible to the English language reader with valuable commentary on the work itself which details Schelling's account of his differences from Fichte

Love, the Greatest Thing in the World + Natural Law in the Spiritual World Henry Drummond, 2019-06-03 Love the Greatest Thing in the World In his most famous work the author meditates upon what he considers the greatest thing in the world love In *Natural Law in the Spiritual World* author explores how the world of religion and spirituality relates to the physical world and argues that faith was by no means in conflict with science **The Nature of Order, Book One: The Phenomenon of Life** Christopher Alexander, 2020-03-30 Christopher Alexander's series of ground breaking books including *A Pattern Language* and *The Timeless Way of Building* have pointed to fundamental truths of the way we build revealing what gives life and beauty and true functionality to our buildings and towns Now in *The Nature of Order* Alexander explores the properties of life itself highlighting a set of well defined structures present in all order and in all life from micro organisms and mountain ranges to good houses and vibrant communities In *The Phenomenon of Life* the first volume in this four volume masterwork Alexander proposes a scientific view of the world in which all space matter has perceptible degrees of life and sets this understanding of order as an intellectual basis for a new architecture With this view as a foundation we can ask precise questions about what must be done to create more life in our world whether in a room a humble doorknob a neighbourhood or even in a vast region He introduces the concept of living structure basing it upon his theories of centers and of wholeness and defines the fifteen properties from which according to his observations all wholeness is built Alexander argues that living structure is at once both personal and structural Taken as a whole the four books create a sweeping new conception of the nature of things which is both objective and structural hence part of science and also personal in that it shows how and why things have the power to touch the human heart A step has been taken through which these two domains

the domain of geometrical structure and the feeling it creates kept separate during four centuries of scientific thought from 1600 to 2000 have finally been united **Infidelity extirpated; or, Mirabaud's System of Nature analyzed. Galen Strawson's writings on the self and consciousness naturalism and panpsychism Galen Strawson might be described as the Montaigne of modern philosophers endlessly curious enormously erudite unafraid of strange difficult and provocative propositions and able to describe them clearly in other words he is a true essayist Strawson also shares with Montaigne a particular fascination with the elastic and elusive nature of the self and of consciousness Of the essays collected here A Fallacy of Our Age an inspiration for Vendela Vida's novel Let the Northern Lights Erase Your Name takes issue with the commencement address cliché that life is a story Strawson questions whether it is desirable or even meaningful to think about life that way The Sense of the Self offers an alternative account in part personal of how a distinct sense of self is not at all incompatible with a sense of the self as discontinuous leading Strawson to a position that he sees as in some ways Buddhist Real Naturalism argues that a fully naturalist account of consciousness supports a belief in the immanence of consciousness in nature as a whole also known as panpsychism while in the final essay Strawson offers a vivid account of coming of age in the 1960s Drawing on literature and life as much as on philosophy this is a book that prompts both argument and wonder

The Philosophy of William of Ockham Armand Augustine Maurer, 1999 History of the Concept of Mind Paul S. Macdonald, 2017-09-29 In the 20th century theorists of mind were almost exclusively concerned with various versions of the materialist thesis but prior to current debates accounts of soul and mind reveal an extraordinary richness and complexity which bear careful and impartial investigation This book is the first single authored comprehensive work to examine the historical linguistic and conceptual issues involved in exploring the basic features of the human mind from its most remote origins to the beginning of the modern period MacDonald traces the development of an armature of psychical concepts from

the Old Testament and Homer's works to the 18th century advocacy of an empirical science of the mind. Along the way detailed attention is paid to the Presocratics Plato Aristotle the Stoics and Epicurus before turning to look at the New Testament Neoplatonism Augustine Medieval Islam Aquinas and Dante. Treatment of Renaissance theories is followed by an unusual perhaps unique chapter on the words soul and mind in English literature from Chaucer to Shakespeare the story then rejoins the mainstream with analyses of Descartes Spinoza Leibniz Hobbes Locke Berkeley and Hume. Immanent Transcendence
Patrice Haynes, 2012-08-23

Over the last twenty years materialist thinkers in the continental tradition have increasingly emphasized the category of immanence. Yet the turn to immanence has not meant the wholesale rejection of the concept of transcendence but rather its reconfiguration in immanent or materialist terms: an immanent transcendence. Through an engagement with the work of Deleuze Irigaray and Adorno Patrice Haynes examines how the notion of immanent

transcendence can help articulate a non reductive materialism by which to rethink politics ethics and theology in exciting new ways However she argues that contrary to what some might expect immanent accounts of matter and transcendence are ultimately unable to do justice to material finitude Indeed Haynes concludes by suggesting that a theistic understanding of divine transcendence offers ways to affirm fully material immanence thus pointing towards the idea of a theological materialism
