Nature, Environment and Society Philip Sutton, 2017-03-14 How have sociologists responded to the emergence of environmentalism What has sociology to offer the study of environmental problems This uniquely comprehensive guide traces the origins and development of environmental movements and environmental issues providing a critical review of the most significant debates in the new field of environmental sociology It covers environmental ideas environmental movements social constructionism critical realism ecocentric theory environmental identities risk society theory sustainable development Green consumerism ecological modernization and debates around modernity and post modernity Philip Sutton adopts a long term view which focuses on the relationship between ideas of nature and environment ecological identities and social change providing a framework for future research Bringing environmental issues into contact with sociological theories Nature Environment and Society provides an up to date introduction to this important new field It will be essential reading for all students of sociology environmental studies and anyone interested in understanding environmental problems

Nature, Environment and Poetry Susanna Lidström, 2015-06-19 The environmental challenges facing humanity in the twenty first century are not only acute and grave they are also unprecedented in kind complexity and scope Nonetheless or therefore the political response to problems such as climate change biodiversity loss and widespread pollution continues to fall short To address these challenges it seems clear that we need new ways of thinking about the relationship between humans and nature local and global and past present and future One place to look for such new ideas is in poetry designed to contain multiple levels of meaning at once challenge the imagination and evoke responses that are based on something more than scientific consensus and rationale This ecocritical book traces the environmental sensibilities of two Anglophone poets Nobel Prize winner Seamus Heaney 1939 2013 and British Poet Laureate Ted Hughes 1930 1998 Drawing on recent and multifarious developments in ecocritical theory it examines how Hughes's and Heaney's respective poetics interact with late twentieth century developments in environmental thought focusing in particular on ideas about ecology and environment in relation to religion time technology colonialism

semiotics and globalisation This book is aimed at students of literature and environment the relationship between poetry and environmental humanities and the poetry of Ted Hughes or Seamus Heaney **Nature, Environment and Culture in East Asia** ,2013-07-15 Since in the current global environmental and climate crisis East Asia will play a major role in negotiating solutions it is vital to understand East Asian cultural variations in approaching and solving environmental challenges in the past present and future The interdisciplinary volume *Nature Environment and Culture in East Asia The Challenge of Climate Change* edited by Carmen Meinert explores how cultural patterns and ideas have shaped a specific understanding of nature how local and regional cultures developed coping strategies to adapt to environmental and climatic changes in the past and in the present and how various institutions and representatives might introduce their ideas and agendas in future environmental and climate policies on national levels and in international negotiating systems **Behavior and the**

Natural Environment Irwin Altman,Joachim F. Wohlwill,2012-12-06 The theme of the present volume concerns people's response to the natural environment considered at scales varying from that of a house hold plant to that of vast wilderness areas Our decision to focus on this particular segment of the physical environment was prompted in part by the intrinsic interest in this subject on the part of a diverse group of social scientists and professionals and of laypersons for that matter and in part by the relative neglect of this topic in standard treatments of the environment behavior field It also serves to bring out once again the interdisciplinary nature of that field and we are pleased to have been able to include representatives from geography sociology social ecology and natural recreation among our contributors We believe that this volume will serve a useful purpose in helping to integrate the findings and concepts in this presently somewhat fragmented field scattered as they are over a very diverse array of publications representing a similarly varied group of specialties It is hoped that the result will be to stimulate future development of this area and to add a measure of increased coherence to it Volume 7 of our series will be devoted to the theme of elderly people and the environment with M Powell Lawton joining us as guest co editor The titles of the papers comprising Volume 7 are shown on page v Irwin Altman Joachim F Wohlwill ix Contents Introduction

Environmental Science Andrew R. W. Jackson,Julie M. Jackson,2000 *Philosophy and the Natural Environment* Robin Attfield,Andrew Belsey,1994-09-30 Leading international environmental philosophers further the debate about the environment and the metaphysical ethical social and international implications **Human Well-Being and the Natural Environment** Partha Dasgupta,2001-11-15 In *Human Well Being and the Natural Environment* Partha Dasgupta explores ways to measure the quality of life In developing quality of life indices he pays particular attention to the natural environment illustrating how it can be incorporated more generally into economic reasoning in a seamless manner Professor Dasgupta puts the theory that he develops to use in extended commentaries on the economics of population poverty traps global warming structural adjustment programmes and free trade particularly in relation to poor countries The result is a treatise that goes beyond quality of life measures and offers a comprehensive account of the newly emergent subject of ecological

economics With the publication of this new paperback edition Professor Dasgupta has taken the opportunity to update and revise his text in a number of ways including developments to facilitate its current use on a number of graduate courses in environmental and resource economics The treatment of the welfare economics of imperfect economies has been developed using new findings and the Appendix has been expanded to include applications of the theory to a number of institutions and to develop approximate formulae for estimating the value of environmental natural resources Introduction of Non-native Plants Into the Natural Environment Jacques Lambinon,1997-01-01 *Canadians and the Natural Environment to the Twenty-first Century* Neil Stevens Forkey,2012-01-01 *Canadians and the Natural Environment to the Twenty First Century* provides an ideal foundation for undergraduates and general readers on the history of Canada s complex environmental issues Through clear easy to understand case studies Neil Forkey integrates the ongoing interplay of humans and the natural world into national continental and global contexts Forkey s engaging survey addresses significant episodes from across the country over the past four hundred years the classification of Canada s environments by its earliest inhabitants the relationship between science and sentiment in the Victorian era the shift towards conservation and preservation of resources in the early twentieth century and the rise of environmentalism and issues involving First Nations at the end of the century *Canadians and the Natural Environment to the Twenty First Century* provides an accessible synthesis of the most important recent work in the field making it a truly state of the art contribution to Canadian environmental history **Bulletin of the Atomic Scientists** ,1970-01 The Bulletin of the Atomic Scientists is the premier public resource on scientific and technological developments that impact global security Founded by Manhattan Project Scientists the Bulletin s iconic Doomsday Clock stimulates solutions for a safer world *Reclaiming Nature* James K. Boyce,Sunita Narain,Elizabeth A. Stanton,2007-06-07 In *Reclaiming Nature* leading environmental thinkers from across the globe explore the relationship between human activities and the natural This is a bold and comprehensive text of major interest to both students of the environment and professionals involved in policy making **Nature in Cities** Ian C. Laurie,1979 *Lincoln and the Natural Environment* James Tackach,2018-12-04 Winner ISHS Best of Illinois History Award 2019 In this groundbreaking environmental biography of Abraham Lincoln James Tackach maps Lincoln s lifelong relationship with the natural world from his birth and boyhood on Midwestern farms through his political career and presidency dealing with the effects of the Industrial Revolution and the Civil War Lincoln was born in a generation that grew up on farms but began to move to cities as industrialization transformed the American economy Turning away from the outdoor manual labor of his youth he chose careers in law and politics but always found solace outside first on the prairies of Illinois and later at the woodsy presidential retreat As Tackach shows Lincoln relied on examples and metaphors from the natural world in his speeches and writings As a member of the Whig Party Lincoln endorsed the Industrial Revolution which transformed the nation s economy and its physical social and cultural landscapes and advocated for the creation of railroads canals roads and bridges to facilitate

growth and the distribution of products But he and his party failed to take steps to protect the natural environment Surveying the destruction of the environment in the mid nineteenth century Tackach outlines how some American writers the first voices for protection and conservation began to call attention to the results of deforestation and the overhunting of animals during Lincoln s lifetime As commander in chief during the Civil War Lincoln approved a strategy that included significant infrastructure and environmental damage In the South where most of the battles occurred Union troops burned cities and towns and destroyed plantations farms and natural landscapes Tackach argues that midway through his presidency Lincoln seemed to sense that postwar Reconstruction would have to be spiritual political economic and environmental in order to heal the nation s wounds He signed the Morrill Act creating the land grant colleges and the environmentally progressive Yosemite Grant Act which preserved thousands of acres of forest in California The first scholar to thoroughly investigate Lincoln s lifelong relationship with the natural environment Tackach paints Lincoln s personal and professional life against the backdrop of nineteenth century American environmental history issues and writers providing insights into contemporary environmental issues

The Human Impact on the Natural Environment Andrew Goudie,2000 The book also discusses the development of ideas on global change BOOK JACKET

The Law of Nature Conservation Christopher Rodgers,2013-03-21 Providing a detailed account of the law of nature conservation this book reviews and discusses the way in which the law promotes the conservation of species of animal bird and plant and how it protects natural habitats for protected species Using an interdisciplinary approach the book sets nature conservation in its economic and scientific context It explains how the law reconciles the public interest in promoting biodiversity and the conservation of species and habitats on the one hand and the private property rights of landowners and other resource appropriators on the other The book offers an illuminating new interpretation of this area of environmental regulation using a resource allocation model of property rights to explain how legal and economic instruments for promoting nature conservation work in practice The analysis covers all recent legislation and case law including the Marine and Coastal Access Act 2009 the Conservation of Habitats and Species Regulations 2010 and the 2012 National Planning Policy Framework The book will serve as a critical guide to UK nature conservation law for those working in the system and a valuable reference point on the UK s approach to the area for environmental lawyers and policy makers overseas

Nature in the Built Environment Ambe J. Njoh,2020-03-03 A good understanding of the status quo is necessary for the success of efforts to develop and maintain nature in built space Accordingly this book conducts an environmental scan of the context of these efforts in global perspective In particular it develops and employs a novel environmental scanning model ESM designed to rigorously analyze the political economic social technological ecological cultural and historical PESTECH contexts of initiatives to promote biodiversity in the built environment The focus is on four specific substantive areas of environmental policy namely forestry water food and energy The units of analysis roughly correspond with the major United Nations Environmental Programme UNEP regions of the

world including sub Saharan Africa Middle East and North Africa Asia and the Pacific Western Europe North America and Latin America and the Caribbean Marketing, Morality and the Natural Environment Andrew Crane, 2002-01-04 This volume provides a new look at marketing and in particular the move to establish ostensibly green marketing Presenting evidence from extensive case studies these concerns are addressed through an examination of managers and employees understanding of the green marketing activities and processes that take part in their organisations
