Spaces Speak, Are You Listening? Barry Blesser, Linda-Ruth Salter, 2009-09-18 How we experience space by listening the concepts of aural architecture with examples ranging from Gothic cathedrals to surround sound home theater We experience spaces not only by seeing but also by listening We can navigate a room in the dark and hear the emptiness of a house without furniture Our experience of music in a concert hall depends on whether we sit in the front row or under the balcony The unique acoustics of religious spaces acquire symbolic meaning Social relationships are strongly influenced by the way that space changes sound In *Spaces Speak Are You Listening* Barry Blesser and Linda Ruth Salter examine auditory spatial awareness experiencing space by attentive listening Every environment has an aural architecture The audible attributes of physical space have always contributed to the fabric of human culture as demonstrated by prehistoric multimedia cave paintings classical Greek open air theaters Gothic cathedrals acoustic geography of French villages modern music reproduction and virtual spaces in home theaters Auditory spatial awareness is a prism that reveals a culture's attitudes toward hearing and space Some listeners can learn to see objects with their ears but even without training we can all hear spatial geometry such as an open door or low ceiling Integrating contributions from a wide range of disciplines including architecture music acoustics evolution anthropology cognitive psychology audio engineering and many others *Spaces Speak Are You Listening* establishes the concepts and language of aural architecture These concepts provide an interdisciplinary guide for anyone interested in gaining a better understanding of how space enhances our well being Aural architecture is not the exclusive domain of specialists Accidentally or intentionally we all function as aural architects

Matter of North Brent Wetters, Anthony Cushing, 2025-07-01 Documents and illuminates Glenn Gould's groundbreaking radio composition *The Idea of North* *Matter of North* collects essays and source material related to Glenn Gould's landmark 1967 radio documentary *The Idea of North* The most famous product other than his studio piano recordings of Gould's 1964 decision to abandon the concert stage for the recording studio it combines Gould's interests in the contrapuntal by the simultaneous layering of speaking voices with philosophy and a life long fascination with the Canadian Arctic Because the documentary is a multivalent work the contributors approach the documentary from unique

perspectives sociological philosophical music theoretical ethnomusicological each illuminating a salient aspect of the work The source material section includes for the first time the complete interview responses by Gould s five participants along with other important documentation Matter Transmission Nicolás Salazar Sutil,2018-05-17 Arguing for a paleocybernetic approach to current media studies debates Nicolas Salazar Sutil develops an original framework for a new media ecology that embraces the primitive the prehistoric and the brute Paying serious attention to materials used for cultural mediation that are unprocessed unexplained and raw such as bones and limestones Salazar Sutil posits that advanced industrialisation of new media technology has prompted countercultural movements that call for radical new ways of transmitting culture for instance through an experiential and high tech appreciation of prehistoric landscape heritage The future calls for a Palaeolithic awareness of living landscape as medium for the embodied transmission of cultural imaginaries and memories The more media technology spurs mass forms of instantaneous media communication the greater the need for primitive knowledge of earthling body and earthly landscape our prime media for sustainable cultural transmission **A Philosophy of Ambient Sound** Ulrik Schmidt,2023-06-13 This book presents the first book length study of ambient sound as a key issue in sound studies and sonic philosophy Taking a broad media philosophical approach it explores ambient sound as a basic dimension of the sonic environment sonic technologies sonic arts and the material staging of listening Through analyses of key concepts such as surroundability mediatization immanence synthezation and continuous variation the book elucidates how ambient aspects of sound influence our conceptions of what sound is and how it affects us by exposing sound s relation to basic categories such as space time environment medium and materiality It also illuminates how the strategic production of ambient sound constitutes a leading aesthetic paradigm that has been a decisive factor in the shaping of the modern sonic environment from key developments in experimental and popular music sound art and cinematic sound design to the architectural technological construction of listening spaces in concert halls and theaters and in current streaming infrastructures digital surround sound and the everyday aesthetics of headphone listening Audio Culture, Revised Edition Christoph Cox,Daniel Warner,2017-07-27 The groundbreaking Audio Culture Readings in Modern Music Continuum September 2004 paperback original maps the aural and discursive terrain of vanguard music today Rather than offering a history of contemporary music Audio Culture traces the genealogy of current musical practices and theoretical concerns drawing lines of connection between recent musical production and earlier moments of sonic experimentation It aims to foreground the various rewirings of musical composition and performance that have taken place in the past few decades and to provide a critical and theoretical language for this new audio culture This new and expanded edition of the Audio Culture contains twenty five additional essays including four newly commissioned pieces Taken as a whole the book explores the interconnections among such forms as minimalism indeterminacy musique concr te free improvisation experimental music avant rock dub reggae ambient music hip hop and techno via writings by philosophers cultural theorists and composers

Instead of focusing on some crossover between high art and popular culture Audio Culture takes all these musics as experimental practices on par with and linked to one another While cultural studies has tended to look at music primarily popular music from a sociological perspective the concern here is philosophical musical and historical Audio Culture includes writing by some of the most important musical thinkers of the past half century among them John Cage Brian Eno Ornette Coleman Pauline Oliveros Maryanne Amacher Glenn Gould Umberto Eco Jacques Attali Simon Reynolds Eliane Radigue David Toop John Zorn Karlheinz Stockhausen and many others Each essay has its own short introduction helping the reader to place the essay within musical historical and conceptual contexts and the volume concludes with a glossary a timeline and an extensive discography

The Oxford Handbook of Sound and Imagination, Volume 1 Mark Grimshaw-Aagaard, Mads Walther-Hansen, Martin Knakkegaard, 2019-07-26 Whether social cultural or individual the act of imagination always derives from a pre existing context For example we can conjure an alien s scream from previously heard wildlife recordings or mentally rehearse a piece of music while waiting for a train This process is no less true for the role of imagination in sonic events and artifacts Many existing works on sonic imagination tend to discuss musical imagination through terms like compositional creativity or performance technique In this two volume Handbook contributors shift the focus of imagination away from the visual by addressing the topic of sonic imagination and expanding the field beyond musical compositional creativity and performance technique into other aural arenas where the imagination holds similar power Topics covered include auditory imagery and the neurology of sonic imagination aural hallucination and illusion use of metaphor in the recording studio the projection of acoustic imagination in architectural design and the design of sound artifacts for cinema and computer games

Cultural Studies , 2016-09-12 This volume claims that interdisciplinarity and translation constitute the two main challenges for cultural studies today These conceptual issues inter and trans express themselves within specific historical and cultural contexts Interdisciplinarity is linked with the ongoing process of the institutionalisation of cultural studies in national academies but also increasingly internationally comparatively and to a certain extent even globally of cultural studies of global culture Translation concerns cultural studies both as an object or product and as a subject or producer of translation processes Cultural studies is the result of translation translates and is being translated The essays in this volume therefore relate these various ongoing cultural linguistic and institutional translation processes to political and ethical issues of internationalisation and globalisation The contributions draw their originality and strength from strategically crossing disciplinary and national boundaries They deliberately ignore the question of what may be proper to cultural studies

and instead problematise the notions of propriety and belonging As a reading practice cultural studies in these pages is performed through adaptations and combinations of theory and critical practice The volume should be of interest to everyone concerned with cultural studies role in promoting intellectual debate within an increasingly international and globalised public sphere

Techniques of Hearing Michael Schillmeier, Robert Stock, Beate Ochsner, 2022-10-21 Hearing health and technologies are entangled in multi faceted ways This edited volume addresses this complex relationship by arguing that modern hearing was and is increasingly linked to and mediated by technological innovations By providing a set of original interdisciplinary investigations that shed new light on the history theory and practices of hearing techniques it is able to explore the heterogeneous entanglements of sound hearing practices technologies and health issues As the first book to bring together historians scholars from media studies social sciences cultural studies acoustics and neuroscientists the volume discusses modern technologies and their decisive impact on how normal hearing enhanced and smart hearing as well as hearing impairment have been configured It brings both new insights into the histories of hearing technologies as well as allowing us to better understand how enabling hearing technologies have currently been unfolding an increasingly hybrid ecology engaging smart hearing devices and offering stress free hearing and acoustic well being in novel auditory environments The volume will be of interest to all scholars and students of disability studies sound studies sociology of health and illness medical history health and society as well as those interested in the practices and techniques of self monitored and smart hearing
