

An aerial photograph of a coastal landscape. A winding road or path leads from the foreground towards the background, passing a small, light-colored building. The terrain is a mix of green vegetation and sandy or rocky patches. The overall scene is captured from a high angle, looking down on the landscape.

Zenginobuz, 2015-03-14 A critical comparative exploration of the framing of environmental problems in Northern and Southern Europe The book addresses theoretical and empirical questions about environmental attitudes and behaviours politics and protest cultures and contexts

EU Bioeconomy Economics and Policies: Volume II Liesbeth Dries, Wim Heijman, Roel Jongeneel, Kai Purnhagen, Justus Wesseler, 2019-11-28 This two volume book provides an important overview to EU economic and policy issues related to the development of the bioeconomy What have been the recent trends and what are the implications for future economic

development and policy making Where does EU bioeconomy policy sit within an international context and what are the financial frameworks behind them Volume II explores the EU food sector as well as food law and legislation rural development in the EU bio based economy strategy the circular economy and and bioenergy policies Methods of Environmental and Social Impact Assessment Peter Morris, Riki Therivel, Graham Wood, 2017-09-13 Environmental and social impact assessment ESIA is an important and often obligatory part of proposing or launching any development project Delivering a successful ESIA needs not only an understanding of the theory but also a detailed knowledge of the methods for carrying out the processes required Riki Therivel and Graham Wood bring together the latest advice on best practice from experienced practitioners to ensure an ESIA is carried out effectively and efficiently This new edition explains how an ESIA works and how it should be carried out demonstrates the links between socio economic cultural environmental and ecological systems and assessments incorporates the World Bank's IFC performance standards and best practice examples from developing as well as developed countries includes new chapters on emerging ESIA topics such as climate change ecosystem services cultural impacts resource efficiency land acquisition and involuntary resettlement Invaluable to undergraduate and MSc students of ESIA on planning ecology geography and environment courses this internationally oriented fourth edition of Methods of Environmental and Social Impact Assessment is also of great use to planners ESIA practitioners and professionals seeking to update their skills Agroforestry in Europe Antonio Rigueiro-Rodríguez, Jim McAdam, María Rosa Mosquera-Losada, 2008-11-09 Agroforestry has come of age during the past three decades The age old practice of growing trees and crops and sometimes animals in interacting combinations that has been ignored in the single commodity oriented agricultural and forestry development paradigms has been brought into the realm of modern land use Today agroforestry is well on its way to becoming a specialized science at a level similar to those of crop science and forestry science To most land use experts however agroforestry has a tropical connotation They consider agroforestry as something that can and can only be identified with the tropics That is a wrong perception While it is true that the tropics compared to the temperate regions have a wider array of agroforestry systems and hold greater promise for potential agroforestry interventions it is also true that agroforestry has several opportunities in the temperate regions too Indeed the role of agroforestry is now recognized in Europe as exemplified by this book North America and elsewhere in the temperate zone Current interest in ecosystem management in industrialized countries strongly suggests that there is a need to embrace and apply agroforestry principles to help mitigate the environmental problems caused or exacerbated by commercial agricultural and forestry production enterprises Natural Heritage Peter Howard, Thymio Papayannis, 2013-10-18 It has become more and more accepted that nature conservation is not possible without taking into account human activities Thus an integrated approach to both the natural and cultural heritage is being encouraged and developed Gathering a number of distinguished authors with diverse backgrounds from a religious leader to academics to conservation scientists the book aims to investigate the relationship

between human beings and nature between nature and culture Looking at nature as heritage of the human race is a recognition both of the tremendous impacts both positive and negative that human activities have had on the natural environment as well as the acceptance of human responsibility for managing our planet in a sustainable and sensitive manner The texts included examine this interface between human beings and nature in specific places from the Everglades in Florida and Mont Saint Michel in Atlantic France to the UK Europe and the Mediterranean as well as on a theoretical basis and in the context of the international biodiversity conventions
