Nature Of Passion:

The Nature of Passion F. Seymour Smith, 1956 **Passions for Nature** Rochelle Johnson, 2009

Nineteenth century Americans celebrated nature through many artistic forms including natural history writing landscape painting landscape design theory and transcendental philosophy Although we tend to associate these movements with the nation's dawning environmental consciousness *Passions for Nature* demonstrates that they instead alienated Americans from the physical environment even as they seemed to draw people to it Rather than see these expressions of passion for nature as initiating environmental awareness this study reveals how they contributed to a culture that remains startlingly ignorant of the details of the material world Using as a touchstone the writings of nineteenth century philanthropist Susan Fenimore Cooper the daughter of famed author James Fenimore Cooper *Passions for Nature* reveals that while a generalized passion for nature was intense and widespread in her era cultural attention to the real physical world was quite limited Popular artistic forms represented the natural world through specific metaphors for the American experience cultivating a national tradition of valuing nature in terms of humanity Johnson crosses disciplinary boundaries to demonstrate that anthropocentric understandings of the natural world result not only from the growing gulf between science and imagination that C P Snow located in the early twentieth century but also and surprisingly from cultural productions traditionally viewed as positive engagements with the environment By uncovering the roots of a cultural alienation from nature *Passions for Nature* explains how the United States came to be a nation that simultaneously reveres the natural world and yet remains dangerously distant from it

Life and Letters of James Hinton James Hinton,1878 Christian Brian Byrne,2021-09-09 Since the name Christian made its first appearance the meaning of the word has gone through many name changes Today there are as many meanings of Christian as there are denominations And disturbingly most of them bear a denominational not a biblical imprint Brian Byrne has put aside his denominational spectacles and has taken a long hard look at what the scriptures have to say about the identity life works and future of a Christian And the results will surprise you Brian Byrne has found that the life of every Christian involves the separation of the things that belong to God from the things of the evil one And integral in that separation is the question To whom do Christians give their allegiance He then explores the life character works and accomplishments of the One whose name Christians bear our Lord Jesus Christ Included in his study is the essential element in Christian's relationship with the Lord It is by faith He has found that one of the great missings in the lives of Christians is the presence and work of the Spirit Brian has explored this subject in considerable depth He has followed this study with a

study of Christian as disciple exploring seven elements in the life of a disciple and each one bears the imprint of the Spirit The family of God to whom all Christians belong has a special place in Brian s study He treats this special subject not as doctrine but as practical reality as the environment in which Christians are to express their faith Brian explores the surprising glory for the Christian that is beyond this life He concludes the book with details of a number of important words that Christians need to know and to apply Christian Not of This World is an essential resource for everyone who bears the name Christian and for those who teach the principles of our faith

State of Nature Or Eden? Helen Thornton,2005

State of Nature or Eden Thomas Hobbes and his Contemporaries on the Natural Condition of Human Beings aims to explain how Hobbes s state of nature was understood by a contemporary readership whose most important reference point for such a condition was the original condition of human beings at the creation in other words in Eden The book uses ideas about how readers brought their own reading of other texts to any reading that reading is affected by the context in which the reader reads and that the Bible was the model for all reading in the early modern period It combines these ideas with the primary evidence of the contemporary critical reaction to Hobbes to reconstruct how Hobbes s state of nature was read by his contemporaries The book argues that what determined how Hobbes s seventeenth century readers responded to his description of the state of nature were their views on the effects of the Fall Hobbes s contemporary critics the majority of whom were Aristotelians and Arminians thought that the Fall had corrupted human nature although not to the extent implied by Hobbes s description Further they wanted to look at human beings as they should have been or ought to be Hobbes on the other hand wanted to look at human beings as they were and in doing so was closer to Augustinian Lutheran and Reformed interpretations which argued that nature had been inverted by the Fall For those of Hobbes s contemporaries who shared these theological assumptions there were important parallels to be seen between Hobbes s account and that of scripture although on some points his description could have been seen as a subversion of scripture The book also demonstrates that Hobbes was working within the Protestant tradition as well as showing how he used different aspects of this tradition Helen Thornton is an Independent Scholar She completed her PhD at the University of Hull
