Time and the Rhythms of Emancipatory Education Michel Alhadeff-Jones, 2016-10-26 Time and the Rhythms of Emancipatory Education argues that by rethinking the way we relate to time we can fundamentally rethink the way we conceive education Beyond the contemporary rhetoric of acceleration speed urgency or slowness this book provides an epistemological historical and theoretical framework that will serve as a comprehensive resource for critical reflection on the relationship between the experience of time and emancipatory education Drawing upon time and rhythm studies complexity theories and educational research Alhadeff Jones reflects upon the temporal and rhythmic dimensions of education in order to re theorize and address current societal and educational challenges The book is divided into three parts The first begins by discussing the specificities inherent to the study of time in educational sciences The second contextualizes the evolution of temporal constraints that determine the ways education is institutionalized organized and experienced The third and final part questions the meanings of emancipatory education in a context of temporal alienation This is the first book to provide a broad overview of European and North American theories that inform both the ideas of time and rhythm in educational sciences from school instruction curriculum design and arts education to vocational training lifelong learning and educational policies It will be of key interest to academics researchers and postgraduate students in the fields of philosophy of education sociology of education history of education psychology curriculum and learning theory and adult education The Open Access version of this book available at <http://www.taylorfrancis.com> has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license

Pursuing Instructional Effectiveness in Higher Education Edwin George Ralph, 2004 The title of this book has two meanings One meaning expresses a sense of relief that during the last several years post secondary institutions have begun to pay serious attention to the enhancement of instruction on their campuses There has been an emergence of new organisations associations conferences seminars and workshops a proliferation of books journals and articles an expansion of research and investigative inquiry and a growth of interest among post secondary faculty members and administrators all of which are devoted to various aspects of the improvement of both teaching and learning at the undergraduate level These initiatives have combined to furnish undeniable evidence attesting to the pursuit of better teaching and learning in higher education Increasing numbers of post secondary educators students and tax payers at large not only welcome wholeheartedly this new emphasis and as suggested by the last clause in the title they feel it has been long overdue A second interpretation of the title and the one which is a key theme of this book emphasises the substantive concept of the use and management of time and timing as an integral component of

effective instruction From the Introduction Handbook of Research on Student Engagement Sandra L. Christenson, Amy L. Reschly, CATHY WYLIE, 2012-02-23 For more than two decades the concept of student engagement has grown from simple attention in class to a construct comprised of cognitive emotional and behavioral components that embody and further develop motivation for learning Similarly the goals of student engagement have evolved from dropout prevention to improved outcomes for lifelong learning This robust expansion has led to numerous lines of research across disciplines and are brought together clearly and comprehensively in the Handbook of Research on Student Engagement The Handbook guides readers through the field s rich history sorts out its component constructs and identifies knowledge gaps to be filled by future research Grounding data in real world learning situations contributors analyze indicators and facilitators of student engagement link engagement to motivation and gauge the impact of family peers and teachers on engagement in elementary and secondary grades Findings on the effectiveness of classroom interventions are discussed in detail And because assessing engagement is still a relatively new endeavor chapters on measurement methods and issues round out this important resource Topical areas addressed in the Handbook include Engagement across developmental stages Self efficacy in the engaged learner Parental and social influences on engagement and achievement motivation The engaging nature of teaching for competency development The relationship between engagement and high risk behavior in adolescents Comparing methods for measuring student engagement An essential guide to the expanding knowledge base the Handbook of Research on Student Engagement serves as a valuable resource for researchers scientist practitioners and graduate students in such varied fields as clinical child and school psychology educational psychology public health teaching and teacher education social work and educational policy

Teacher Education Policy Rob McBride, 2003-12-16 To improve schools we need to improve teachers This volume provides recent research evidence that suggests that current education policy is not Promoting Effective Teacher Education And That Teacher Education Policy has failed to support the formation of professional partnerships in initial teacher education has almost ignored the induction of newly qualified teachers and has narrowed in service education into support for the implementation of central policy The evidence gathered in this book is used to argue for new forms of teacher education in every phase built upon the foundation of professional partnership between schools and institutions of higher education It is suggested that the funding for such changes could be drawn from less effective forms of school improvement such as National Curriculum development and school inspection With the implementation of such changes it is argued good quality teacher education programmes would prosper and foster a broad consensus about educational development that is often absent
