Nature's Embrace Satsuki Kawano,2010-03-31 Based on extensive fieldwork *Nature's Embrace* reveals the emerging pluralization of death rites in postindustrial Japan Low birth rates and high numbers of people remaining permanently single have led to a shortage of ceremonial caregivers most commonly married sons and their wives to ensure the transformation of the dead into ancestors resting in peace Consequently older adults are increasingly uncertain about who will perform memorial rites for them and maintain their graves In this study anthropologist Satsuki Kawano examines Japan s changing death rites from the perspective of those who elect to have their cremated remains scattered and celebrate their return to nature For those without children ash scattering is an effective strategy as it demands neither a grave nor a caretaker However the adoption of ash scattering is not limited to the childless By forgoing graves and lightening the burden on younger generations to care for them this new mortuary practice has given its proponents an increased sense of control over their posthumous existence By choosing ash scattering older adults contest their dependent status in Japanese society which increasingly views the aged as passive care recipients As such this study explores not only new developments in mortuary practices but also voices for increased self sufficiency in late adulthood and the elderly s reshaping of ties with younger generations *Nature's Embrace* offers insightful discussion on the rise of new death rites and ideologies older adults views of their death rites and Japan s changing society through the eyes of aging urbanites This book will engage a wide range of readers interested in death and culture mortuary ritual and changes in age

Scigaj,2021-12-15 Focusing on the work of A R

Ammons Wendell Berry W S Merwin and Gary Snyder author Leonard Scigaj shows that just as a sustainable society does not depreciate its resource base so a sustainable poetry does not restrict interest to language Over the past thirty years many poets have shown an increasing sensitivity to ecological thinking But critics trained in poststructuralist language theory often fail to explore the substance of ecopoetry Scigaj is the first to define ecopoetry as separate and distinct from nature or environmental poetry marked by its concern with balancing the interests of human beings with the needs of nature Just as science learned that the earth was not the center of the universe ecopoetry insists on the recognition that humans are not at the center of the natural world *The Wonders of the Caribbean: A Journey Through Nature's Paradise* Pasquale De Marco,2025-04-26 Immerse yourself in the natural wonders of the Caribbean with this captivating guide that unveils the region s breathtaking beauty and unparalleled biodiversity Discover the secrets of the Caribbean s diverse ecosystems from the vibrant coral reefs teeming with marine life to the ancient rainforests echoing with the songs of exotic birds Uncover the unique flora and fauna that call the Caribbean home from the colorful orchids and majestic palms to the playful dolphins and graceful sea turtles Learn about the intricate relationships between the islands inhabitants and their environment and gain insights into the delicate balance that sustains this fragile paradise Explore the cultural significance of nature in the Caribbean where the indigenous peoples deep connection to the land is reflected in vibrant festivals and traditions that celebrate the beauty of the environment Discover how the Caribbean s natural heritage has influenced its art music and folklore weaving a rich tapestry of cultural traditions However the Caribbean faces numerous environmental challenges

Nature: From nature to natures : contestation and reconstruction David Inglis, John Bone, Rhoda Wilkie, 2005 Many influential stances within the social sciences regard nature in one of two ways either as none of their concern which is with the social and cultural aspects of human existence or as wholly

a social and cultural fabrication But there is also another strand of social scientific thinking that seeks to understand the interplay between social and cultural factors on one side and natural factors on the other These volumes contain the main contributions that have been made within each of these streams of thought The selections illustrate to the reader the complexity of the various positions within these streams and the strengths and limitations of each perspective A new introduction places these articles in their historical and intellectual context and the volumes are completed with an extensive index and chronological table of contents
