Nautical Dictionary Volume 1 Maritime In 5 Languages:

Bloomsbury World Englishes Volume 1: Paradigms Britta Schneider, Theresa Heyd, Mario Saraceni, 2021-05-20

Bloomsbury World Englishes offers a comprehensive and rigorous description of the facts, implications and contentious issues regarding the forms and functions of English in the world. International experts cover a diverse range of varieties and topics offering a more accurate understanding of English across the globe and the various social contexts in which it plays a significant role. With volumes dedicated to research paradigms, language ideologies and pedagogies, the collection pushes the boundaries of the field to go beyond traditional descriptive paradigms and contribute to moving research agendas forward. Volume 1 Paradigms analyzes the ways in which we make sense of English as a global language, its many varieties and how these come into contact and interact with other languages. It moves the field beyond existing models that are no longer sufficient to describe English in the era of globalization.

Celebrated in the novels of Joseph Conrad and vintage films, tramp ships, the precursor of bulk carriers, are not well understood today. Yet these vessels transported in bulk essential minerals and ores, grains, timber and other commodities and played a vital role in creating the modern global economy. While the histories of some individual tramp firms have been written, this book uses personal correspondence and surviving company records to chart the development of the entire industry, the largest in the world during a period of transformational technical change. Who were

the bold risk takers who founded tramp firms How did they mobilise the resources needed to enter this dynamic sector build immense companies and accumulate vast fortunes Why did others fail This study reveals how executives learned the art of managing tramps and developed strategic networking skills Tramp shipping resonates with many of today s high growth industries it was an information intensive high stress operation that required rapid sometimes instinctive decision making within a turbulent market Building business networks was supported by a distinctive culture that streamlined communication This innovative study places information knowledge learning culture and communication at the centre of the analysis in order to transport readers into the minds of those fascinating entrepreneurs who helped build the modern world *The*
