Creating Private Sector Economies in Native America Robert J. Miller, Miriam Jorgensen, Daniel Stewart, 2019-10-24

Looks at the underdevelopment of the private sector on American Indian reservations with the goal of sustaining and growing Native nation communities **Navajo Land Selection** United States. Bureau of Indian Affairs. Navajo Land Selection E.I.S.

Task Force, United States. Department of the Interior, 1978 **Pastoralists at the Periphery** Claudia Chang, Harold Albert Koster, 1994-05 A Baluch tribesman follows his goats as they search for a bit of vegetation a Turkana youth guards his father's cattle against theft by raiders These pastoral inhabitants of mountain and desert waste are considered to be among the most geographically economically and politically peripheral of peoples yet they are not entirely isolated from broader sociopolitical and economic forces The lives of modern pastoralists are greatly affected by the policies of nations and the demands of world markets They may face military control forced settlement stock reduction programs or even efforts at development by governments claiming sovereignty over the lands they roam The authors of this collection of essays examine the impact of capitalism on nineteenth and early twentieth century pastoralists and discuss the historical transformations that have occurred in the lives and societies of herding peoples around the world They argue that pastoralists were not simply passive recipients of change imposed by capitalist politics and that historical and economic factors impinging on their societies were as important as ecological ones Collectively these papers demonstrate that twentieth century pastoralists and their nineteenth century predecessors should not be seen as immutably locked in a pastoral mode of production but rather as actively negotiating encounters between themselves and the expanding power of capitalist states *Housing and Economic*

Development in Indian Country Robin Leichenko, 2018-01-16 Among America's most complex planning environments Indian country continues to face innumerable challenges to its community development. These factors are historic in nature, creating an assemblage of complex problems in reservation land management, policy implementation, and the ability of tribes to access capital for community investment. This study explores the history and the land, population, economic, and housing characteristics of Indian country. The authors' investigation includes reservations, Alaska Native villages, and other Census recognized areas of historical Native American settlement and tribal culture. They analyze the constraints to housing and economic development and develop strategies for addressing those constraints. This book also identifies uses and evaluates data sources relevant to the study of housing and economic development on tribal lands. The research in this book was funded by the Fannie Mae Foundation. In the *Journal of the American Planning Association*, Nicholas C. Zaferatos wrote that *Housing and Economic Development in Indian Country* is an essential desk reference for policymakers and planners working in Native American communities as well as for nontribal agencies and other planners who share a concern for the well-being of tribal nations. It also contains extensive appendices in an accompanying CD containing data for individual tribal areas.

A Nation Within Ezra Rosser, 2021-10-07 In *A Nation Within*, Ezra Rosser explores the connection between land use patterns and development in the Navajo Nation. Roughly the size of Ireland or West Virginia, the Navajo reservation has seen successive waves of natural resource-based development over the last century: grazing and, over grazing, oil and gas, uranium, and coal. Yet Navajos continue to suffer from high levels of unemployment and poverty. Rosser shows the connection between the exploitation of these resources and the growth of the tribal government before turning to contemporary land use and development challenges. He argues that, in addition to the political challenges associated with any significant change, external pressures and internal corruption have made it difficult for the tribe to implement land reforms that could help provide space for economic development that would benefit the Navajo Nation and Navajo tribal members.

Working the Navajo Way Colleen O'Neill, 2005-10-20 The Dine have been a pastoral people for as long as they can remember, but when livestock reductions in the New Deal era forced many into the labor market, some scholars felt that Navajo culture would inevitably decline. Although they lost a great deal with the waning of their sheep-centered economy, Colleen O'Neill argues that Navajo culture persisted. O'Neill's book challenges the conventional notion that the introduction of market capitalism necessarily leads to the destruction of native cultural values. She shows instead that contact with new markets provided the Navajos with ways to diversify their household-based survival strategies. Through adapting to new kinds of work, Navajos actually participated in the reworking of modernity in their region, weaving an alternate, culturally specific history of capitalist development. O'Neill chronicles a history of Navajo labor that illuminates how cultural practices and values influenced what it meant to work for wages or to produce commodities for the marketplace. Through accounts of Navajo coal miners, weavers, and those who left the reservation in search of wage work, she explores the tension between making a living the Navajo way.

and working elsewhere Focusing on the period between the 1930s and the early 1970s a time when Navajos saw a dramatic transformation of their economy O Neill shows that Navajo cultural values were flexible enough to accommodate economic change She also examines the development of a Navajo working class after 1950 when corporate development of Navajo mineral resources created new sources of wage work and allowed former migrant workers to remain on the reservation Focusing on the household rather than the workplace O Neill shows how the Navajo home serves as a site of cultural negotiation and a source for affirming identity Her depiction of weaving particularly demonstrates the role of women as cultural arbitrators providing mothers with cultural power that kept them at the center of what constituted Navajo ness Ultimately Working the Navajo Way offers a new way to think about Navajo history shows the essential resilience of Navajo lifeways and argues for a more dynamic understanding of Native American culture overall Phase II Data Recovery at Sites NM-Q-25-51 and NM-Q-25-52 Along County Road 19, Borrego Pass, McKinley County, New Mexico Kurt E.

Native Students at Work Kevin Whalen,2016-06-01 Native Students at Work tells the stories of Native people from around the American Southwest who participated in labor programs

at Sherman Institute a federal Indian boarding school in Riverside California The school placed young Native men and women in and around Los Angeles as domestic workers farmhands and factory laborers For the first time historian Kevin Whalen reveals the challenges these students faced as they left their homes for boarding schools and then endured an outing program that aimed to strip them of their identities and cultures by sending them to live and work among non Native people Tracing their journeys Whalen shows how male students faced low pay and grueling conditions on industrial farms near the edge of the city yet still made more money than they could near their reservations Similarly many young women serving as domestic workers in Los Angeles made the best of their situations by tapping into the city s Indigenous social networks and even enrolling in its public schools As Whalen reveals despite cruel working conditions Native people used the outing program to their advantage whenever they could forming urban indigenous communities and sharing money and knowledge gained in the city with those back home A mostly overlooked chapter in Native American and labor histories Native Students at Work deepens our understanding of the boarding school experience and sheds further light on Native American participation in the workforce

Patterns of Exchange Teresa J. Wilkins, 2013-03-15 The Navajo rugs and textiles that people admire and buy today are the result of many historical influences particularly the interaction between Navajo weavers and the traders who guided their production and controlled their sale John Lorenzo Hubbell and other late nineteenth century traders were convinced they knew which patterns and colors would appeal to Anglo American buyers and so they heavily encouraged those designs In Patterns of Exchange Teresa J Wilkins traces how the relationships between generations of Navajo weavers and traders affected Navajo weaving The Navajos valued their relationships with Hubbell and others who operated trading posts on their reservation As a result they did not always see themselves as exploited victims of a capitalist system Rather because of Navajo cultural traditions of gift giving and helping others the artists slowly adapted some of the patterns and colors the traders requested into their own designs By the 1890s Hubbell and others commissioned paintings depicting particular weaving styles and encouraged Navajo weavers to copy them reinforcing public perceptions of traditional Navajo weaving Even the Navajos came to revere certain designs as the weaving of the ancestors Enhanced by numerous illustrations including eight color plates this volume traces the intricate play of cultural and economic pressures and personal relationships between artists and traders that guided Navajo weavers to produce textiles that are today emblems of the Native American Southwest Winner Multi cultural Subject New Mexico Book Awards

Ethnoecology Ted L. Gragson, Ben G. Blount, 1999 Scholars studying the ecology of specific areas often fail to take into account the presence of humans in those environments People not only are fundamental components of an ecosystem but possess a unique understanding of its nature This book examines subjects ranging from pastoralism to the use of medicinal plants to show that understanding the knowledge system of any people is essential to understanding their relation to their environment Using cases from the American Southwest and Pacific Northwest the Highland Maya Region of Central America and the Lowland

and Andean regions of South America the contributors examine the relation of humans and environment within the context of each local system s beliefs values and knowledge All emphasize the practical and cultural significance of indigenous knowledge of the environment and the importance of comparing this knowledge to scientific understanding prior to initiating development or conservation programs They also contribute to a theoretical approach that allows findings to be applied across studies regardless of ethnographic differences **Navajo Transmission Project (NTP) [NV,AZ,NM] ,1997**
