Lawry, 2024-06-03 Among other major navies that of the United States put armed naval landing parties ashore during the nineteenth and early twentieth centuries Although done primarily to protect American interests they also safeguarded international communities against the savage hordes of uncivilized nations Specially designed light field guns carried aboard gunboats and larger warships sometimes supported the bluejackets and marines customarily when larger parties more likely to face sharp actions went ashore Most American naval landings of the nineteenth century took place in Africa Asia and Central and South America whereas the following century saw landings against larger and otherwise civilized nations such as Mexico and Russia The last of these landings were made in conjunction with the Allied assaults on North Africa in November 1942 The first purpose built landing guns the bronze Dahlgren muzzleloading smoothbore howitzers saw extensive deployment during the Civil War and postwar in Korea The US Navy s very first steel breechloading guns were landing pieces Five different marks of 3 inch breechloading guns and several guns of other calibers followed in successive decades serving for varying periods The history and characteristics of these landing guns are chronicled *Catalog of Course of Instruction at the United States Naval Academy* United States Naval Academy, *Navy Department Appropriation Bill for 1939* United States. the Library of the United States Military Academy United States Military Academy. Library, 1969 **Warship Builders** Thomas Heinrich, 2020-11-15 Warship Builders is the first scholarly study of the U S naval shipbuilding industry from the early 1920s to the end of World War II when American shipyards produced the world s largest fleet that helped defeat the Axis powers in all corners of the globe A colossal endeavor that absorbed billions and employed virtual armies of skilled workers naval construction mobilized the nation s leading industrial enterprises in the shipbuilding engineering and steel industries to deliver warships whose technical complexity dwarfed that of any other weapons platform Based on systematic comparisons with British Japanese and German naval construction Thomas Heinrich pinpoints the distinct features of American shipbuilding methods technology development and management practices that enabled U S yards to vastly outproduce their foreign counterparts Throughout the book comparative analyses reveal differences and similarities in American British Japanese and German naval construction Heinrich shows that U S and German shipyards introduced electric arc welding and prefabrication methods to a far greater extent than their British and Japanese counterparts between the wars laying the groundwork for their impressive production records in World War II While the American and Japanese navies relied heavily on government owned navy yards the British and German navies had most of their combatants built in corporately owned yards contradicting the widespread notion that only U S industrial mobilization depended on private enterprise Lastly the U S government s investments into shipbuilding facilities in both private and government owned shipyards dwarfed the sums British Japanese and German counterparts expended This enabled American builders to deliver a vast fleet that played a pivotal role in global naval combat The National Union Catalog, Pre-1956 Imprints , 1968
