Archer,2021-12-24 First Published in 1988 In 1986 Croom Helm published for the Royal Institute of International Affairs Northern Waters security and resource issues which included a number of contributions from the Northern Waters Study Group of the Scottish Branch of the Royal Institute This Study Group brought together academics businessmen civil servants and serving officers interested in Northern Waters and helped arrange a number of seminars and international conferences Its members also had contacts with those in Scandinavia and North America who had a professional involvement in Northern Waters Since the establishment of the Study Group in 1979 interest in Northern Waters has flourished in Britain the United States Canada West Germany and the Nordic countries In Autumn 1985 the Centre for Defence Studies University of Aberdeen held an International Colloquium on what have probably been the main inspirations for the attention devoted to Northern Waters increased Soviet activity therein and the response of the Western powers This book reflects some of the issues dealt with at that colloquium and like the 1986 book covers jurisdictional and resource questions as well as those concerned with international security     Modern Naval History Richard Harding,2015-12-17 Specifically structured around research questions and avenues for further study and providing the historical context to enable this further research Modern Naval History is a key historiographical guide for students wishing to gain a deeper understanding of naval history and its contemporary relevance Navies play an important role in the modern world and the globalisation of economies cultures and societies has placed a premium on maritime communications Modern Naval History demonstrates the importance of naval history today showing its relevance to a number of disciplines and its role in understanding how navies relate to their host societies Richard Harding explains why naval history is still important despite slipping from the attention of policy makers and the public since 1945 and how it can illuminate answers to questions relating to economic diplomatic political social and cultural history The book explores how naval history has informed these fields and how it can produce a richer and more informed historical understanding of navies and sea power     **The New Battle for the Atlantic** Magnus F Nordenman,2019-06-15 In this book Magnus Nordenman explores the emerging competition between the United States and its NATO allies and the resurgent Russian navy in the North Atlantic This maritime region played a key role in the two world wars and the Cold War serving as the strategic link between the United States and Europe that enabled the flow of reinforcements and supplies to the European Allies Nordenman shows that while a conflict in Europe has never been won in the North Atlantic it surely could have been lost there With Vladimir Putin s Russia threatening the peace in Europe following the annexation of Crimea in 2014 the North Atlantic and other maritime domains around Europe are once again vitally important But this battle will in many ways be different Nordenman demonstrates due to an overstretched U S Navy the rise of disruptive technologies a beleaguered NATO that woke up to the Russian challenge unprepared for high end warfighting in the maritime domain and a Russia commanding a smaller but more sophisticated navy equipped with long range cruise missiles Nordenman also provides a set of recommendations for what the United States and NATO must do now in order to

secure the North Atlantic in this new age of great power competition      *Twenty-First Century Seapower* Peter Dutton, Robert Ross, Øystein Tunsjø, 2013-05-02 This book offers an assessment of the naval policies of emerging naval powers and the implications for maritime security relations and the global maritime order Since the end of the Cold War China Japan India and Russia have begun to challenge the status quo with the acquisition of advanced naval capabilities The emergence of rising naval powers is a cause for concern as the potential for great power instability is exacerbated by the multiple maritime territorial disputes among new and established naval powers This work explores the underlying sources of maritime ambition through an analysis of various historical cases of naval expansionism It analyses both the sources and dynamics of international naval competition and looks at the ways in which maritime stability and the widespread benefits of international commerce and maritime resource extraction can be sustained through the twenty first century This book will be of much interest to students of naval power Asian security and politics strategic studies security studies and IR in general      Talking about Naval History John B. **Arms Races in International Politics** Thomas Mahnken, Joseph Maiolo, David Stevenson, 2016-01-14 This volume provides the first comprehensive history of the arms racing phenomenon in modern international politics drawing both on theoretical approaches and on the latest historical research Written by an international team of specialists it is divided into four sections before 1914 the inter war years the Cold War and extra European and post Cold War arms races Twelve case studies examine land and naval armaments before the First World War air land and naval competition during the 1920s and 1930s and nuclear as well as conventional weapons since 1945 Armaments policies are placed within the context of technological development international politics and diplomacy and social politics and economics An extended general introduction and conclusion and introductions to each section provide coherence between the specialized chapters and draw out wider implications for policymakers and for political scientists Arms Races in International Politics addresses two key questions what causes arms races and what is the connection between arms races and the outbreak of wars

**Gulf of Alaska Navy Training Activities** ,2011 **Britannia's Navy on the West Coast of North America, 1812-1914** Barry Gough, 2016-10-04 The influence of the Royal Navy on the development of British Columbia and the Pacific Northwest was both extensive and effective Yet all too frequently its impact has been ignored by historians who instead focus on the influence of explorers fur traders settlers and railway builders In this thoroughly revised and expanded edition of his classic 1972 work naval historian Barry Gough examines the contest for the Columbia country during the War of 1812 the 1844 British response to the aggressive American agenda of President Polk s Manifest Destiny and cries of Fifty four forty or fight the gold rush invasion of 30 000 outsiders and the jurisdictional dispute in the San Juan Islands that spawned the so called Pig War The author also looks at the Esquimalt based fleet in the decade before British Columbia joined Canada and the Navy s relationship with coastal indigenous peoples over the five decades that preceded the Great War

**Small Navies** Michael Mulqueen, Deborah Sanders, Ian Speller, 2016-04-01 Whilst maritime studies tend to reflect the dominance of large navies history shows how relatively small naval forces can have a disproportionately large impact on global events From Confederate commerce raiders in the nineteenth century to Somali pirates today even the most minor of maritime forces can become a key player on a global stage Examining a broad range of examples this volume addresses the roles and activities of small navies in the past and the present at the national regional and international level In particular it focusses on the different ways in which such forces have identified and addressed national and international security challenges and the way in which they interact with other navies and security agencies In addition the collection also investigates the relationship of such navies with non governmental organisations institutions and bodies in pursuit of broader maritime goals be they political financial or environmental Adopting an interdisciplinary approach drawing on the best new research from the fields of international relations security studies strategic studies and maritime history the book examines the diversity of

experience amongst different smaller navies and also establishes areas of similarity Divided into two sections part one begins with a number of chapters that are theoretical in nature whilst part two provides case studies that offer a more regional focus including analysis of the challenges facing contemporary navies and historical case studies designed to reveal the experience of small navies over time By adopting an approach that combines historical considerations with analysis of current events the collection offers a unique perspective on the role that small navies have played in wider nautical affairs and their continued impact upon global maritime strategies

**Christian IV and his Navy** Martin Bellamy, 2006-11-30 This book provides a detailed survey of the Danish navy during the highly influential reign of Christian IV He created a large and powerful navy with impressive ships and one of Europe's finest dockyards It was relatively advanced in the design and construction of its warships and the administration of its seamen and dockyard workforce However its political and military leadership were highly flawed reflecting the power struggle between the king and his council at both an international and domestic level which ultimately led to its crushing defeat at the hands of Sweden This work offers for the first time a valuable insight into the workings of one of the most significant but frequently ignored navies in early modern Europe
