**Imperial Lineages and Legacies in the Eastern Mediterranean** Rhoads Murphey,2016-07-07 The comparative study of empires has traditionally been addressed in the widest possible global historical perspective with comparison of New World empires such as the Aztecs and Incas side by side with the history of imperial Rome and the empires of China and Russia in the medieval and modern periods Surprisingly little work has been carried out focusing on the evolution of state

control and imperial administration in the same territory approached in a rigorous and historically grounded fashion over a wide extent of historical time from late antiquity to the twentieth century The empires of Rome Byzantium the Ottomans and the latter day imperialists in the nineteenth and early twentieth centuries all inherited or seized and sought to develop overlapping parts of a common territorial base in the Eastern Mediterranean and all struggled to contain control or otherwise alter the political cultural and spiritual allegiances of the same indigenous population groups that were brought under their rule and administration The task undertaken in *Imperial Lineages and Legacies in the Eastern Mediterranean* is to investigate the balance between continuity and change adopted at various historical conjunctures when new imperial regimes were established and to expose common features and shared approaches to the challenge of imperial rule that united otherwise divergent societies and imperial administrations The work incorporates the contributions by twelve scholars each leading practitioners in their respective fields and each contributing their particular insights on the shared theme of imperial identity and legacy in the Mediterranean World of the pagan Christian and Muslim eras

[Material Koinai in the Greek Early Iron Age and Archaic Period](#) Anastasia Gadolou,Soren Handberg,2017-02-01 The

ancient Greek word koine was used to describe the new common language dialect that became widespread in the ancient Greek world after the conquests of Alexander the Great. Modern scholars have increasingly used the word to conceptualise regional homogeneities in the material culture of the ancient Mediterranean. In this volume, twenty scholars from various disciplines present case studies that focus on the fundamental question of how to perceive and the social and cultural mechanisms that led to the spread and consumption of material culture in the Greek early Iron Age. Combined, the chapters provide a critical examination of the use of the koine concept as a heuristic tool in historical research and discuss to what degree similarities in material culture reflect cultural connections. The volume will be of interest to scholars interested in archaeological theory and method, the social significance of material culture, and the history of the ancient Greek world in the first half of the first millennium BC.

*Mediterranean Archaeologies of Insularity in an Age of Globalization* Anna Kouremenos, Jody Michael Gordon, 2020-06-30 Recently complex interpretations of socio cultural change in the ancient Mediterranean world have emerged that challenge earlier models Influenced by today's hyper connected age scholars no longer perceive the Mediterranean as a static place where Greco Roman culture was dominant but rather see it as a dynamic and connected sea where fragmentation and uncertainty along with mobility and networking were the norm Hence a current theoretical approach to studying ancient culture has been that of globalization Certain eras of Mediterranean history e.g. the Roman empire known for their increased connectivity have thus been analyzed from a globalized perspective that examines rhizomal networking cultural diversity and multiple processes of social change Archaeology has proven a useful discipline for investigating ancient globalization because of its recent focus on how identity is expressed through material culture negotiated between both local and global influences when levels of connectivity are altered One form of identity that has been inadequately explored in relation to globalization theory is insularity Insularity or the socially recognized differences expressed by people living on islands is a form of self identification created within a particular space and time Insularity as a unique social identity affected by global forces should be viewed as an important research paradigm for archaeologies concerned with re-examining cultural change The purpose of this volume is to explore how comparative archaeologies of insularity can contribute to discourse on ancient Mediterranean globalization The volume's theme stems from a colloquium session that was chaired by the volume's co editors at the Annual Meeting of the Archaeological Institute of America in January 2017 Given the current state of the field for globalization studies in Mediterranean archaeology this volume aims to bring together for the first time archaeologists working on different islands and a range of material culture types to examine diachronically how Mediterranean insularities changed during eras when connectivity increased such as the Late Bronze Age the era of Greek and Phoenician colonization the Classical period and during the High and Late Roman imperial eras Each chapter aims to situate a specific island or island group within the context of the globalizing forces and networks that conditioned a particular period and utilizes archaeological material to reveal how islanders shaped their insular identities or notions of insularity at the nexus of local and global influences

*The Oxford History of the Archaic Greek World* Robin Osborne, 2024-11-12 The ancient Greek world consisted of approximately 1 000 autonomous polities scattered across the Mediterranean basin and each one developed its own unique set of socio political institutions and social practices The Oxford History of the Archaic Greek World offers twenty one detailed studies of key sites from across the Greek world between c. 750

and c 480 BCE a crucial period when much of what is now seen as distinctive about Greek culture emerged All the studies in this seven volume series use the same structure and methodology so that readers can easily compare a wide range of Greek communities The series thus offers a new and unique resource for the study of ancient Greece that will transform how we study and think about a crucial era in ancient Greek history Volume IV contains detailed and up to date studies of Cyrene Delphi Macedonia Massalia and Metapontion      *Bibliographic Guide to Maps and Atlases* ,1999
