Reclaiming the Game William G. Bowen, Sarah A. Levin, 2011-06-27 In Reclaiming the Game William Bowen and Sarah Levin disentangle the admissions and academic experiences of recruited athletes walk on athletes and other students In a field overwhelmed by reliance on anecdotes the factual findings are striking and sobering Anyone seriously concerned about higher education will find it hard to wish away the evidence that athletic recruitment is problematic even at those schools that do not offer athletic scholarships Thanks to an expansion of the College and Beyond database that resulted in the highly influential studies The Shape of the River and The Game of Life the authors are able to analyze in great detail the backgrounds academic qualifications and college outcomes of athletes and their classmates at thirty three academically selective colleges and universities that do not offer athletic scholarships They show that recruited athletes at these schools are as much as four times more likely to gain admission than are other applicants with similar academic credentials The data also demonstrate that the typical recruit is substantially more likely to end up in the bottom third of the college class than is either the typical walk on or the student who does not play college sports Even more troubling is the dramatic evidence that recruited athletes underperform they do even less well academically than predicted by their test scores and high school grades Over the last four decades the athletic academic divide on elite campuses has widened substantially This book examines the forces that have been driving this process and presents concrete proposals for reform At its core Reclaiming the Game is an argument for re establishing athletics as a means of fulfilling instead of undermining the educational missions of our colleges and universities

Handbook on the Economics of Women in Sports Michael Leeds, Eva Marikova Leeds, 2013-01-01 In the Handbook on the Economics of Women in Sports Leeds and

Leeds put together an impressive list of heavy hitters in the sociology and economics literature on sports to produce a tour de force volume. The entire spectrum of international perspectives is covered from US, Korean and Australian sports to world competition at the highest level of the Olympics and international championships. Whether your interest is attendance at women's events, performance and rewards in women's pro sports, gender issues in US college sports or international performance and how women compete, this handbook is a must read for any serious fan and for all serious scholars interested in the impacts of being female on sports performance and competitiveness. Rodney Fort, University of Michigan, US. Leeds and Leeds have filled a gaping hole in sports economics with this revealing collection of essays. The economics of women in sports has been too long neglected. By covering everything from women as sports spectators to women as participants in individual and team sports at the collegiate and professional levels to women's sports internationally, Title IX and women's differential response to incentives, this volume not only demonstrates that there is much fertile ground to be studied but also that the subject matter is both interesting and important. Andrew Zimbalist, Smith College, US. Women's sports have received much less attention from economists than from other social scientists. This Handbook fills that gap with a comprehensive economic analysis of women's sports. It also analyzes how the behavior and treatment of female athletes reflect broad economic forces. Contributors to this volume use current theoretical models and econometric tools to examine the legal, social and economic forces that affect the experiences of female athletes. They address such traditional topics as discrimination against female athletes and coaches and the effect of athletic events on the economies of host countries. They also apply theory and estimation to new settings such as how women respond to tournaments in skiing and figure skating or how the growing dominance of Korean women on the LPGA tour is a form of immigration. This groundbreaking book is a valuable resource for professors, students and researchers in sports economics, sports management and women's studies. *Elite Soccer Players* Ryan Curtis, Courteney Benjamin, Robert Huggins, Douglas J.
