*Neale's Common Foot Disorders* Donald Neale, 1997 This text is designed as a reference for students and professionals within podiatry and chiropody. Suitable for undergraduates, the book aims to help them pass exams and provides them with an overview of the scope of podiatry practice, the pathology and presenting features of the common conditions encountered, their diagnosis and management and related therapeutics. The structure of the book makes it suitable for use both as a reference book and as a revision text.

*Pathomechanics of Common Foot Disorders* Douglas H. Richie Jr, 2020-10-07 This new book consolidates the current knowledge of lower extremity biomechanics and pathomechanics and makes this information relevant to the study of common foot and ankle pathologies. The content is presented in a language and format that allows the clinician to review current evidence explaining the etiology of these disorders in order to formulate effective treatment interventions. In order to understand pathomechanics, the clinician must also become versed in the normal healthy biomechanics of the lower extremity. A review of gait, muscle function and forces acting on the lower extremities during physical activity will be the focus of the first part of this book. The second part of the book will study the common challenging pathologies treated on a daily basis by foot and ankle clinicians: hallux abducto valgus, hallux rigidus, metatarsalgia, digital deformities, adult acquired flatfoot and plantar heel pain. These chapters discuss all the relevant factors contributing to these conditions, evaluating and exposing myths and misconceptions about the pathomechanics and treatments of these conditions. For each disorder, a comprehensive review of published research provides a foundation for an updated, valid description of etiology and risk factors. Providing a fresh approach to lower extremity pathomechanics and management strategies, *Pathomechanics of Common Foot Disorders* is a valuable resource for podiatrists and orthopedic foot and ankle surgeons at all levels.
