Duana Fullwiley has penned an intimate chronicle of laboratory life in the genomic age She presents many of the influential scientists at the forefront of genetics who have redefined how we practice medicine and law and understand ancestry in an era of big data and waning privacy Exceedingly relatable and human the scientists in these pages often struggle for visibility teeter on the tightrope of inclusion and work tirelessly to imprint the future As they actively imagine a more equal and just world they often find themselves ensnared in reproducing timeworn conceits of race and racism that can seed the same health disparities they hope to resolve Nothing dynamic can live for long as a blank slate an innocent tabula rasa But how the blank slate of the once raceless human genome became one of racial differences in various forms of what Fullwiley calls the tabula raza has a very specific and familiar history one that has cycled through the ages in unexpected ways **Save the People!** Stacy McAnulty,2022-05-10

had brought three millennia of almost totally uninterrupted peace in an empire the like of which had never been seen by any species and the hitherto undreamt of stability and prosperity that came with that The first few centuries of life on the cluster passed quickly as the early waves of foolhardy but courageous volunteer settlers a mere handful of millions of them enthusiastically busied themselves with matters such as establishing peaceful cooperative relationships with the roughly twenty million indigenes

Parachute Minds: Leap of Fate Jeremiah Sanchez, 2021-01-21 Parachute Minds Leap of Faith

By Jeremiah Sanchez Traveler explains it was during his people's third phase that they discovered elastic light By harnessing light's elasticity they were able to explore the universe healing with each jump It wasn't long before they discovered they are not alone Other habitable worlds exist throughout the cosmos populated by uniquely evolved Homo sapiens Their observers confirmed each planet's humanity goes through the same three phases Phase one traveling and mapping one's world Phase two manipulation of tools agriculture industry electricity and technology Phase three exploring beyond one's planet into the stars But they traveled too far They discovered something humanity was never meant to in the farthest reaches of space The fourth phase The mysteries held within its unknown are so terrifying that Traveler's people refuse to explore it themselves He explains that's why he's come to Earth to recruit brave souls willing to go where his people dare not Gideon a death seeking adrenaline junky with a disturbing secret seems the perfect candidate for Traveler's invitation He accepts leaving Earth behind with a wink and a smile but Traveler worries the gamble may prove to be too much Gideon's recklessness could either be the key to unlocking the fourth phase or the mistake that unleashes humanity's extinction across the stars
