Near Death Experience A Holographic Explanation:

Near Death Experience Oswald G. Harding Ph. D.,2005-12-01 *What is the New Age?* William P. Frost,1992 This study offers information about the claims and beliefs of the New Age as well as background to the physical biological neurophysiological cultural anthropological psychological and quantum theoretical facts that are part of discussions of this form of holistic spirituality **Near-Death Experience: Scientific Interpretation** Prof. (Dr.) Jai Paul Dudeja,2024-01-02 A Near Death Experience NDE is the recollected experience of someone who has been declared clinically dead by the doctors followed by resuscitation the act of bringing someone back to life Common traits that have been reported by NDErs persons having near dear experiences are An awareness of being dead A sense of peace well being painlessness and other positive emotions a sense of removal from the world an intense feeling of unconditional love and acceptance experiencing euphoric environments an out of body experience OBE that means a perception of one s body from an outside position sometimes observing medical professionals performing resuscitation efforts a tunnel experience or entering a zone of darkness a rapid movement toward a bright light being reunited with deceased loved ones receiving a life review commonly referred to as seeing one s life in a flash back before one s eyes approaching a border or a decision by oneself or others to return to one s body often accompanied by a reluctance to return and suddenly finding oneself back inside one s body Although majority of the NDErs report pleasant experiences a few of them may have distressing or unpleasant experiences also This book consists of 13 chapters categorized into three sections i Introduction and Overview ii Some True Stories and iii Scientific Interpretation Deathing Anya Foos-Graber,1989-01-15 Everyone who is born is someday going to die Some of us will die peacefully in our sleep some will die in accidents and some as the result of diseases cancer or AIDS Because we do not usually know when we are going to die most of us are frightened of death We do not want to talk about it do not want to face it and we run from it as long as we can And some of us die a lonely death in a hospital surrounded by strangers and white sheets while family and loved ones are kept out of the room at the final moment Anya Foos Graber believes that death like birth should be a shining light filled conscious moment Death is not a disease It is the most natural passage we will make since birth Looking at death before the time comes is like learning about natural childbirth before having a baby Just as women are choosing to be conscious participants in the birth process Foos Graber feels that all of us should be conscious as well of our eventual death that we should prepare for it the way the Tibetan Buddhists and American Indians used to do The author calls this process of conscious preparation and practice deathing The book presents two teaching stories illustrating both a conscious death and an unconscious one The second half of the book is a step by step manual containing complete instruction and simple exercises such as breathing visualization and the all important 6th technique or your chosen Name and form of God to which you direct your attention in life and the death transition You can use the formless LIGHT itself as referent an absence of any belief structure A support person rather like the father s presence in natural childbirth can assist

in the event of coma or accident death Other books have been written about grief about wills about taking care of your affairs This is a book about taking care of yourself and how to be helpful to someone you care for Deathing has two aims to make sure that the dying are comfortable and comforted as they die and to help all of us prepare for the greatest adventure we will face since birth *Death and Dying* John F. Szabo, 2009-11-02 While it can be traced to the 1700s the term thanatology has gained traction in recent decades to refer to the study of death Because of the breadth of the published material and the challenges of discovery in large bibliographic databases and catalogs finding and identifying monographic material on death dying grief and bereavement can be extremely challenging Although there have been several bibliographical resources published on thanatology those titles were incomplete limited in scope or leaned heavily toward one area of the field In *Death and Dying An Annotated Bibliography of the Thanatological Literature* John F Szabo provides more than 2 200 citations of monographs on the science and study of death and dying Among the areas this volume addresses are the psychological philosophical and attitudinal aspects coping and dealing with the burdens of caregiving and working in the helping professions instructional and educational topics for practitioners primarily health care providers cultural differences in bereavement rituals and grief mourning and loss In addition notable titles on or relating to death and dying in popular culture death themes in literature methods of death or specific ethical policy or public issues are also included when they contribute important information to subject areas on which the book focuses This book will be helpful to students researchers academics caregivers health care professionals psychologists social workers and anyone with an interest in death dying bereavement or the care of the terminally ill Holographic Universe Michael Talbot, 1992-05-06 Examines a new theory of reality based on holography that explains the paranormal abilities of the mind the latest frontiers of physics and the unsolved riddles of the brain and body *Otherworld Journeys* Carol Zaleski, 1988-11-03 Dozens of books articles television shows and films relating near death experiences have appeared in the past decade People who have survived a close brush with death reveal their extraordinary visions and ecstatic feelings at the moment they died describing journeys through a tunnel to a realm of light visual reviews of their past deeds encounters with a benevolent spirit and permanent transformation after returning to life Carol Zaleski's *Otherworld Journeys* offers the most comprehensive treatment to date of the evidence surrounding near death experiences The first to place researchers findings first person accounts and possible medical or psychological explanations in historical perspective she discusses how these materials reflect the influence of contemporary culture She demonstrates that modern near death reports belong to a vast family of otherworld journey tales with examples in nearly every religious heritage She identifies universal as well as culturally specific features by comparing near death narratives in two distinct periods of Western society medieval Christendom and twentieth century secular America This comparison reveals profound similarities such as the life review and the transforming after effects of the vision as well as striking contrasts such as the absence of hell or punishment scenes from modern accounts Mediating between the debunkers

and the near death researchers Zaleski considers current efforts to explain near death experience scientifically She concludes by emphasizing the importance of the otherworld vision for understanding imaginative and religious experience in general

THOUGHT FORMS AND HALLUCINATIONS Chidambaram Ramesh, 2014-02-27 In recent times the subject of consciousness has emerged as an important paradigm of scientific investigation and research despite most of its concerns having roots in philosophy religion and occultism What is consciousness What is the substance of consciousness Is it material or immaterial mortal or immortal How is it connected with a body Has it a particular seat in any particular body as the brain does Is consciousness synonymous with mind Is it eternal and non local These questions have interested thinkers for many centuries It is the object of this book to demonstrate through a series of cases reported across the world at various times relating to many curious mind related phenomena like the creation of mental entities the imprints of indelible images on the human body stigmata birthmarks and bodily deformities corresponding to the injuries sustained in the previous life thought photography materialization experiments etc that Human mind can bring into being thought forms and can exteriorize them giving them some objective consistency There can be continuity of thoughts even after the destruction of the physical brain These psychic entities are sometimes given a kind of autonomy so that they may act and seemingly think without the consent or even knowledge of their creator The book does not stop with the mere reproduction of recorded cases and just messaging the dimension of the problem but extends over to solve it by suggesting a bio holographic theory of body and mind The book is alike novel fun filled profound and useful thus affording the blend of interest and instruction which cannot fail to render it interesting to the inquisitive and candid mind

A new paradigm of reality? Gonzalo Rodríguez-Fraile, 2015-11-04 The vision that culture has historically offered about reality has failed to help humans to live fully or to achieve their potential A knowledge revolution has been taking place in recent years that once it is understood can completely transform human beings offering new solutions to personal and collective problems because their root causes have been identified at last What we now know means that we can understand spiritual truths and their multiple dimensions without abandoning rationality This new vision is strong enough to put an end to human suffering and boost inner peace which is for what every being human yearns New science sees an intelligent design in the whole Universe Quantum physics has revolutionized our knowledge of reality All scientists are now aware of the quantum enigmas but not everyone agrees on how to interpret them This book offers an interpretation that might explain them and one that is based on the idea of science within consciousness As you read the book it will become evident that this interpretation most closely resembles the vision of reality that both the perennial wisdom of Humanity and the teachings of the great spiritual masters have offered us throughout history The first part of the book outlines briefly what some of the leading thinkers on science and philosophy have to say about reality and how this new vision of the world is converging with what the perennial wisdom of Humanity has been saying throughout our history The second part seeks to explain what can happen to us when we are exposed to this new

knowledge and how all of us can change inside ourselves in the light of this information This book aims to unite not divide helping Humanity to raise its level of consciousness allowing us to live a higher quality life in accordance with our spiritual dimension

The Rule of Law and Governance in Indigenous Yoruba Society John Ayotunde Isola Bewaji, 2016-08-22 In The Rule of Law and Governance in Indigenous Yoruba Society John Ayotunde Isola Bewaji has two main goals The first is to provide an exploration of aspects of indigenous Yoruba philosophy of law The second is to relate this philosophy of law to the Yoruba indigenous traditions of governance with a view to appreciating the relevance of the Yoruba traditions of law and governance to contemporary African experiments with imported Western democracy in the 21st century This book is devoted to what can be described as a juridical forensic investigation of Nigeria's predicament of developmental deficit leading to gross and unconscionable impoverishment of large segments of the population in the midst of so much natural resources and abundant human capital using Yoruba indigenous legal traditions as reflective template Bewaji urges that Africa has to take seriously the necessity of obedience observance enforcement and operation of law as no respecter of persons groups affiliations and pedigrees as was in the case in the societies founded by our ancestors rather than the present scenario whereby the highest bidder procures semblances of justice from a crooked system of common law which was never designed to be fair equitable and just to the disadvantaged in society

The Physics of Encounter Roderick H. Boes, 2009-05-15 The Physics of Encounter suggests explanations for paranormal phenomena It describes the hidden force that generates consciousness and enables our mind to influence physical events The proposed conceptual model shows that mind and matter are two sides of the same coin and introduces new interpretations of pivotal concepts into the public debate about science and religion Written for readers of all backgrounds the book illuminates the controversial views regarding the nature of our universe Could our minds be imbedded in a field of cosmic consciousness Was our universe created from nothing or is it a pulsating reality expanding and collapsing The book examines the issue of consciousness in the light of recently developed theories of vacuum fluctuations and oscillating strings It describes how entanglements with a hidden force give rise to such baffling phenomena as Near Death Experiences UFOs and backward causation Last not least the book examines fears that have recently resurfaced in the media could our entire earth be pulled into a black hole Could the simulation of a big bang in an immensely powerful particle accelerator like the one at the atomic research lab CERN near Geneva create such a fateful event As you read this the earth is still circling around the sun The book provides a framework for a rational discussion of fascinating and by no means trivial phenomena
