One Iota Of The Big Picture:

A New Chronology for Old Testament Times Jan Van Tuyl, 2012 This book brings solutions to a very great list of hitherto unsolved chronological and synchronisation problems The reason why those solutions could be found lies in the extensive research the author made in old and often rare texts instead of limiting himself to the near exclusive source of the Bible Ample use has been made of information that is available in works like the Books of Enoch The Apocrypha The Legends of the Jews The Seder Olam the Book of Jasher and many more as well as in the texts from known historians like Herodotus and the famous Jewish historian and priest Flavius Josephus Just a few of the many special findings are The real reason why Joseph was so popular with the Pharaoh Sarah was not Abraham's half sister Moses was uncircumcised and even forbade the ritual for 40 years Terah was not 70 years old when he begat Abraham The exact period of the Judges when they started and when they ended A solution for the verse of the about 450 years of Paul's speech Why did the Lord God give form and then blew life into Adam Eve was not made out of Adam's rib but from another body part A solution to the impossible synchronism of Judah and his sons Enoch made not one but 4 trips to Heaven The definitive answer why did King Josiah attack Necho II Why did King Ahab not fight at Qarqar And many more The book has a unique style It has nothing of the study book difficult to understand texts The subject is serious well researched and treated with respect But that does not mean that it cannot be presented at a fast moving pace in easy to read style with here and there even a bit of humour The purpose of the book is to prove that the promise that the Lord God made to Adam was kept It held that there would be exactly 5500 years between the arrival of Adam in this world and the arrival of Christ Every person who was of importance in that timespan has been visited For every single one there are his years of birth and death or the years of his rule Every person has a short story about some important part of his life his actions or the influence he had on the history of the Hebrew people that lived in that period

Witch Hunt Peter M. De Lorenzo, 2011-03-15 The U S auto industry has a history like no other What started as a cottage industry more than 100 years ago soon exploded into an industrial juggernaut a glittering showcase for American industrial might and know how that for decades was the envy of the world

The Other Side of Truth Paul Kimball, 2013-04-02 In The Other Side of Truth filmmaker Paul Kimball crosses the Rubicon of the imagination to explore the idea that what we call the paranormal is actually a form of artistic expression created by an advanced non human intelligence to inspire us to think about who we are where we have been and where we are going Using his own journey of discovery as the starting point Kimball presents the other side of truth the world not as we have been told it is but as we are being encouraged to imagine that it could become

Life Without Oil Steve Hallett, John Wright, 2011-03-14 By the end of the 21st century our oil and natural gas supplies will be virtually nonexistent and limited coal supplies will be restricted to only a handful of countries The authors an environmental scientist and veteran journalist make abundantly clear that we must plan for a future without reliance on oil They make a compelling case that the key determinant of our global economy is not so much the invisible hand

of the marketplace but the inexorable laws of ecology Although the coming decades will be a time of much disruption and change of lifestyle in the end we may learn a wiser more sustainable stewardship of our natural resources This timely sobering yet constructive discussion of energy and ecology offers a realistic vision of the near future and many important lessons about the limits of our resources

Crude Justice Stuart H. Smith,2015-01-13 One day in the small Mississippi town of Laurel a 26 year old expectant mom named Karen Street sat down at the edge of her bathtub and felt her hip split in two The episode was so bizarre it wasn't until later after she saw the doctor that she realized her bone disease was almost certainly linked to her father in law's business Winston Street ran a machine shop that drilled the gunk out of pipes used by Chevron Shell and other giants of the oil industry creating a white powder that covered Karen Street's husband's overalls every night which then landed in their vegetable garden and was highly radioactive Winston Street didn't know the dust was poisonous nor did his workers or his family But someone did know Indeed there was evidence that America's Big Oil companies were aware for decades that they were pulling up radium from under the earth poisoning yards like Street's while dumping radioactive water in unlined pits across the South Now to prove that and win justice for his blue collar clients an untested young lawyer named Stuart H Smith and his eccentric team would have to get the better of America's best known radiation attorney and the global clout of Chevron inside a Mississippi courtroom In a gripping tale that reads as if torn from the pages of a John Grisham novel *Crude Justice* tells how the Little Guy can take on the behemoth of Big Oil and win with the help of a good attorney Recounting more than two decades as a top environmental lawyer in the toxic oil patch of the American South Smith tells the story of how he upped the ante again and again getting the best of Chevron then taking on the world's most powerful corporation ExxonMobil with 1 billion on the line and finally ferreting out the elusive truth behind BP's 2010 Deepwater Horizon disaster the worst oil spill in U S history Smith finally builds upon the courtroom drama of his past and the environmental threats of the present from fracking to the Keystone XL pipeline to issue a resounding call for America to break its crippling addiction to fossil fuels
