Hadean Earth T. Mark Harrison, 2020-06-18 This book consolidates the latest research on the Hadean Eon the first 500 million years of Earth history which has permitted hypotheses of early Earth evolution to be tested including geophysical models that include the possibility of plate tectonic like behavior These new observations challenge the longstanding Hadean paradigm based on no observational evidence of a desiccated lifeless continent free wasteland in which surface petrogenesis

was largely due to extraterrestrial impacts The eon was termed Hadean to reflect such a hellish environment That view began to be challenged in 2001 as results of geochemical analyses of greater than 4 billion year old zircons from Australia emerged These data were consistent with the zircons forming in a world much more similar to today than long thought and interpreted to indicate that sediment cycling was occurring in the presence of liquid water This new view leaves open the possibility that life could have emerged shortly after Earth accretion The epistemic limitations under which the old paradigm persisted are closely examined The book is principally designed as a monograph but has the potential to be used as a text for advanced graduate courses on early Earth evolution **Aspiring and Inspiring** Rebecca Garcia,Pamela E.

Harris,Dandrielle Lewis,Shanise Walker,2023-07-26 Aspiring and Inspiring is a collection of essays from successful women and gender minority mathematicians on what it takes to build a career in mathematics The individual essays are intended to advise encourage and inspire mathematicians throughout different stages of their careers Themes emerge as these prominent individuals describe how they managed to persist and rise to positions of leadership in a field which can still be forbidding to many We read repeatedly that individual mentorship matters that networks of support can be critical and that finding fulfillment can mean formulating one's own definition of success Those who aspire to leadership in the field will find much useful advice here The cumulative power of the collection carries a strong impact The glass ceiling is very real in mathematics and is the result of cultural and sociological factors at work in our community The book makes clear that we won't achieve equality of opportunity merely by exhorting those who are often excluded to change their behaviors and their goals The need for systemic cultural change is vividly at times painfully evident in these stories As Dr Erica Graham says in her powerful and moving essay we need a different kind of academy and we'll only get it by working for it We can start by reading this book and recognizing the kind of academy we currently have **Blake** David V.
