Environmental Policy in the EU Andrew Jordan, 2012-04-27 This second and fully revised edition brings together some of the most influential work on the theory and practice of contemporary EU environmental policy. Comprising five comprehensive parts, it includes in depth case studies of contemporary policy issues such as climate change, genetically modified organisms and trans-Atlantic relations, as well as an assessment of how well the EU is responding to new challenges such as enlargement, environmental policy integration and sustainability. The book's aim is to look forward and ask whether the EU is prepared or even able to respond to the new governance challenges posed by the perceived need to use new policy instruments and processes to mainstream environmental thinking in all EU policy sectors.

The European Union and the Public Sphere John Erik Fossum, Philip R. Schlesinger, 2007-06-11 The European Union is often attacked for its democratic deficit, namely its deficiencies in representation, transparency, accountability and lack of popular support. This book assesses the possible formation of a communicative space that might enable and engender the creation of a transnational or a supranational public.

Survey of Current Business, 1960

Environmental Leaders and Laggards in Europe Tanja A. Börzel, 2017-05-15 No other European laws are so frequently violated as environmental directives. This informative and illuminating volume explains why member states have repeatedly failed to comply with European Environmental Law. It challenges the assumption that non-compliance is merely a southern problem. By critically comparing and analyzing Spain and Germany, the volume demonstrates that both northern leaders and southern laggards face compliance problems if a European policy is not compatible with domestic regulatory structures. The North-South divide is therefore much more complex than previously thought. Examining each country's capabilities of shaping European policies according to its environmental concerns and economic interests, the book debates the possible outcomes if the European Union does not come to terms with the leader-laggards dynamics in environmental policy making. It will be a prime resource for anyone concerned with environmental policy making and law, particularly within the EU, as well as those interested in environmental and political geography.

New York Magazine, 1976-01-12 New York magazine was born in 1968 after a run as an insert of the New York Herald Tribune and quickly made a place for itself as the trusted resource for readers across the country. With award-winning writing and photography covering everything from politics and food to theater and fashion, the magazine's consistent mission has been to reflect back to its audience the energy and excitement of the city itself while celebrating New York as both a place and an idea.

Bulletin from the European Community for Coal and Steel, 1966

The Making of a European Public Sphere Ruud Koopmans, Paul Statham, 2010-07-29 This book investigates an important source of the European Union's recent legitimacy problems. It shows how European integration is debated in mass media and how this affects democratic inclusiveness. Advancing integration implies a shift in power between governments, parliaments and civil society. Behind debates over Europe's democratic deficit is a deeper concern whether democratic politics can perform effectively under conditions of Europeanization and globalization. This study is based on a wealth of unique data from seven European countries combining newspaper content analyses, an innovative study of Internet communication structures and hundreds of interviews with leading political and media representatives across Europe. It is by far the most far-reaching and empirically grounded study on the Europeanization of media discourse and political contention to date and a must read for anyone interested in how European integration changes democratic politics and why European integration has become increasingly contested.

The European Economy since 1945 Barry Eichengreen, 2008-07-01 In 1945 many Europeans still heated with coal, cooled their food with ice and lacked indoor plumbing. Today things could hardly be more different. Over the second half of the twentieth century the average European's buying power tripled while working hours fell by a third. The European Economy since 1945 is a broad, accessible, forthright account of the extraordinary development of Europe's economy since the end of World War II. Barry Eichengreen argues that the continent's history has been critical to its economic performance and that it will continue to be so going forward. Challenging standard views that basic economic forces were behind postwar Europe's success, Eichengreen shows how Western Europe in particular inherited a set of institutions singularly well suited to the economic circumstances that reigned for almost three decades. Economic growth was facilitated by solidarity-centered trade unions, cohesive employers' associations and growth-minded governments—all legacies of Europe's earlier history. For example, these institutions worked together to mobilize savings, finance investment and stabilize wages. However, this inheritance of economic and social institutions that was the solution until around 1973, when Europe had to switch from growth based on brute force investment and the acquisition of known technologies to growth based on increased efficiency and innovation, then became the problem. Thus the key questions for the future are whether Europe and its constituent nations can now adapt their institutions to the needs of a globalized knowledge economy and whether in doing so the continent's distinctive history will be an obstacle or an asset.

Europe and the Maritime World Michael B. Miller, 2012-08-20 This book explores the development of the global economy in the twentieth century through the lens of the European maritime infrastructure.

Interdisciplinarity in Translation and Interpreting Process Research Maureen Ehrensberger-Dow, Susanne Göpferich, Sharon O'Brien, 2015-06-15 First published as a special issue of *Target* issue 25.1, 2013, this volume explores interdisciplinarity in translation and interpreting process research fields that have enjoyed a boom in the last decade. For this reason, the time was ripe for a reflection on the broad range of methodologies that have been applied in our endeavours to understand both translation and interpreting processes better. The ten chapters provide a

snapshot of how translation and interpreting process researchers have availed themselves of concepts and theories developed in other disciplines such as psychology the cognitive sciences journalism and literary studies to examine and illuminate their object of study This collection demonstrates that translation and interpreting process research borrow heavily from other disciplines and call for a consideration of how translation research can become truly interdisciplinary through increased collaboration synergy and mutual advancement Themes in Modern European History Since 1945
Rosemary Wakeman, 2003-06-26 Twelve chapters consider the key political cultural and economic changes of post 1945 Europe
