Part One consists of sections of statewide interest divided into three categories: the first is coastal geography, which includes descriptions of coastal mountains, rivers, marine terraces, beaches, wetlands, nearshore waters, and the open ocean; the second is living resources, covering the flora and fauna of the coast; and the third is cultural resources, treating history, architecture, recreation, and economy, including such topics as parks and beaches, recreational fishing, amusement parks, lighthouses, offshore oil, tourism, agriculture, and other coastal industries. Part Two is composed of individual sections on each of California's coastal counties, as well as San Francisco Bay, the Farallon Islands, and the Channel Islands. This portion of the book includes 150 maps, lists of species of interest, a summary of each county's history, and site-by-site descriptions of parks, beaches, rivers, wetlands, coastal towns, and cities, missions, museums, and other coastal resources. Detailed information on the habitats, wildlife, and history of each site are included, as well as its address and, where applicable, the phone number.
