Pacific Defense Arms Energy And Americas Future In Asia:

Pacific Defense Kent E. Calder, 1996 Calder director of the Program on U S Japan Relations at Princeton shows how the rapidly increasing demands for energy especially nuclear energy in East Asia combines with political instability to produce a dangerous region

Energy Security in Asia Michael Wesley, 2007-01-24 This book explores the various dimensions of energy security in Asia which has become an increasingly important geopolitical issue Reputable international contributors look at the roles played by each of the major energy importers the United States China Japan and India as well as the main suppliers the OPEC states Russia the Central Asian states and Australia In each case the domestic politics of energy security are investigated and state interests and perspectives on the issue are considered Analyzing the policy and security aspects of energy security the book includes an examination of the geopolitics of energy competition strategic economic and environmental dimensions the impacts of energy security on human security With energy security being one of the central issues facing the world today this book is a timely and impressive appraisal of the major energy security issues facing Asia

Joint Force Quarterly, 1995 Joint Force Quarterly is published for the Chairman Joint Chiefs of Staff by the Institute for National Strategic Studies National Defense University to promote understanding of the integrated employment of land sea air space and special operations forces The journal focuses on joint doctrine coalition warfare contingency planning combat operations conducted by the unified commands and joint force development

Energy Security Cooperation in Northeast Asia Bo Kong, Jae H. Ku, 2015-04-24 Drawing on cutting edge research from leading scholars this book investigates state preferences for regime creation and assesses state capacity for executing these preferences in Northeast Asia's energy domain defined as the geographical area comprising the following countries Russia Mongolia China Japan South Korea and North Korea It examines questions pertaining to how states perceive the need and necessity for establishing a regime when it comes to the issue of energy and how much commitment they make to the effort in Northeast Asia The book analyses the factors that shape each country's fundamental energy interests in the region how these interests impact their attitudes toward engaging the region on energy security and the way they carry out their regional engagement Based on countries' interests in promoting institutionalized regional energy cooperation and their capacity for forging that cooperation the collection assesses each state's role in contributing to an energy regime in Northeast Asia It then concludes with a critique on the decade plus quest for energy security cooperation in Northeast Asia and suggests ways forward for facilitating regional energy security cooperation This book will be of great interest to scholars and students of environmental policy energy policy security studies Asian studies and international relations

The United States in the Asia-Pacific Since 1945 Roger Buckley, 2002-05-07 In a fast moving and incisive narrative Roger Buckley examines America's close and continuous relationship with the Asia Pacific region from the end of the Pacific War to the first days of the Presidency of George W Bush The author traces the responses of the United States government to the major crises in the area through the Cold War

decades and the initial post Cold War years He demonstrates how the US sought to maintain its dominant regional position through a series of security alliances and its own political military and economic strengths Professor Buckley examines the subject from geopolitical perspectives to provide a gateway to the understanding of a complex region certain to be of global importance in the twenty first century

Identities and Security in East Asia Koro Bessho, 2013-09-13 East Asia has been relatively free from large scale conflict in the 1990s but the absence of security organisations or even of a sense of community within the region has raised doubts about its future security China and Japan are likely to bear much of the responsibility for maintaining stability but both countries have been reluctant to adopt a leadership role South east Asian states have been willing to take the initiative outside of their sub region but they possess neither the resources nor the authority to lead the whole of East Asia In the long term the ability to organise the region depends on greater clarity in the identity of leading states in the region and of the region as a whole This paper analyses the way in which issues of identity have affected the actions of the key players and assesses future challenges and possibilities in the search for regional security It concludes that Through the Association of South East Asian Nations ASEAN South east Asian states have developed a sense of confidence and unity However ASEAN s need to safeguard its newly acquired identity means that it has not exported the ASEAN way to the wider region of East Asia or the Asia Pacific The greater diversity that enlargement will bring and the effects of the crisis since 1997 are likely to make the Association s defensive instincts still more resistant to change In the 1990s Japan has sought to redefine its identity both in terms of its past and of its post war values such as pacifism and human rights This process has compelled Japan to face Asia more squarely and has increased the country s self assurance As a result it may become more willing to take the initiative in political and security as well as economic areas For China nationalism has become more important just as communism s position as the country s unifying ideology has eroded Beijing has tried to change the status quo in a forceful way By the close of the 1990s however China has become increasingly willing to act as a responsible world power A key test of this transformation will be Beijing s treatment of the Taiwan question The prospects for regional stability depend on Japan s ability to reform and return to growth The most pressing task is to revitalise East Asia s economies A return to prosperity would encourage China s reform and opening process lessen Japan s introspection make disagreements between the South east Asian states less acute and allow the Asia Pacific region as a whole to move beyond both the triumphalism of the East Pacific and the resentment of the West

The Rise and Decline of the Asian Century Christopher Lingle, 2019-03-25 First published in 1997 this volume reflects an attempt to put order in the place of what appears to be chaos amidst East Asia s rapid dash toward economic development With experiences of Turkey during and after martial law Italy during the Red Brigade England during the Winter of Discontent post Franco Spain s stumbling embrace of democracy Poland in the beginning of the solidarity movement South Africa in the crumbling of apartheid China during the early student protests and Europe when the Iron Curtain was lifted Christopher Lingle applies

these ideas to modern developments in East Asia providing an intriguing counter intuitive refreshing take on its economies

Japan's Defense Policy and Bureaucratic Politics, 1976-2007 Takao Sebata, 2010-06-05 This book examines Japan's military expansion and the decision making of her defense policy between 1976 and 2007 It explores how the bureaucratic politics model applies to the case of Japan's defense policy and demonstrates some similarities and differences between Japanese

A Century of War and Peace Timothy L.H. McCormack, Michael Tilbury, Gillian D. Triggs, 2021-10-18 This the first volume in the new series Melbourne Studies in Comparative and International Law contains the revised and updated versions of papers presented to the Asia Pacific Regional Conference held at The University of Melbourne to commemorate the centenary of the 1899 Hague Peace Conference and the 50th anniversary of the 1949 Geneva Conventions Within the context of the Asia Pacific region the collection by a wealth of international scholars and expert practitioners explores the major issues addressed at the Conference in 1899 including the peaceful settlement of disputes international humanitarian law and arms control and disarmament

China's Energy Security Giulia Romano, Jean-Francois Meglio, 2016-06-10 A secure supply of energy is essential for all nations to sustain their economy and indeed their very survival This subject is especially important in the case of China as China's booming economy and consequent demand for energy is affecting the whole world and in turn potentially driving realignments in international relations Moreover as this book argues energy security should be considered more broadly to include issues of sustainability environmental protection and the domestic organisation of energy policy and energy supply This book presents a comprehensive picture of China's energy security It covers all energy sectors coal oil gas renewables international relations with all major sources of energy supply the Middle East Central Asia Africa and key areas of domestic policy making and supply

Uneasy Warriors Sabine Frühstück, 2007-08-14 Following World War II Japan's postwar constitution forbade the country to wage war or create an army However with the emergence of the cold war in the 1950s Japan was urged to establish the Self Defense Forces as a way to bolster Western defenses against the tide of Asian communism Although the SDF's role is supposedly limited to self defense Japan's armed forces are equipped with advanced weapons technology and the world's third largest military budget Sabine Frühstück draws on interviews historical research and analysis to describe the unusual case of a non war making military As the first scholar permitted to participate in basic SDF training she offers a firsthand look at an army trained for combat that nevertheless serves nontraditional military needs

Pacific Asia? Melvin Gurtov, 2002 Emphasizing human and environmental security over traditional power politics Mel Gurtov offers a provocative reinterpretation of security in the Asia Pacific region The author questions a number of prevailing assumptions such as the China threat a U S centered balance of power and the necessity of a greater Japanese security role He argues instead for a cooperative framework for future security that focuses on people's basic needs is sensitive to Asian nationalism and gradually replaces military power with developmental priorities With its concise appraisals of the security policies of the United States China Japan the two Koreas

and the ASEAN countries this work will be a valued reference for policymakers scholars and students alike Eurasian Maritime Geopolitics Kent E. Calder,2025-03-04 Reviews the strategic geography of the sea lanes from Northeast Asia through the Indian Ocean to Europe since the Middle Ages noting how changing technology and economic patterns have transformed the global significance of those passage ways especially since the end of the Cold War Begins with a survey of the geography itself and of how rimland nations such as India Indonesia and the Gulf configure it A history of the changing economic role of the sea lanes complements that geographic assessment chronicling how maritime flows of energy commodities and information have steadily increased Focuses on the contrasting roles of the United States as Guardian at the Gate and China as Challenger in these strategic sea lanes and the contrasting leverage which each side enjoys Concludes with an assessment of shadows and uncertainties relating to the Eurasian sea lanes in the post Ukraine world and to policies that can sensibly be taken to deal with looming future policy challenges **Super Continent** Kent E. Calder,2019-04-30 A Eurasian transformation is underway and it flows from China With a geopolitically central location the country s domestic and international policies are poised to change the face of global affairs The Belt and Road Initiative has called attention to a deepening Eurasian continentalism that has argues Kent Calder much more significant implications than have yet been recognized In Super Continent Calder presents a theoretically guided and empirically grounded explanation for these changes He shows that key inflection points beginning with the Four Modernizations and the collapse of the Soviet Union and culminating in China s response to the Global Financial Crisis and Crimea s annexation are triggering tectonic shifts Furthermore understanding China s emerging regional and global roles involves comprehending two ongoing transformations within China and across Eurasia as a whole and that the two are profoundly interrelated Calder underlines that the geo economic logic that prevailed across Eurasia before Columbus and that made the Silk Road a central thoroughfare of world affairs for close to two millennia is reasserting itself once again Korean Attitudes Toward the United States David I. Steinberg,2015-05-11 This is the first book length work in English dealing with the crucial and troubled relationship between Korea and the United States Leading scholars in the field examine the various historical political cultural and psychological aspects of Korean American relations in the context of American global and East Asian relationships especially with Japan *Seeing the Elephant* Hans Binnendijk,Richard L. Kugler,2006-11 An intellectual history of the post Cold War period **The Hatoyama Dynasty** M. Itoh,2003-11-07 This is a multi generational political history of the Hatoyamas a family that has participated at the highest levels of Japan s parliamentary government from its inception in the late 1800s The Hatoyama family is one of the most prominent political families in modern Japanese government It has produced six members of the Diet Japan s parliament many of whom have served as cabinet members and party leaders Due to the family s political legacy they have often been likened to the Kennedy family in American politics though they have been spared the tragedy and scandal visited upon the Kennedys Despite the significance of the Hatoyamas

to modern Japanese politics this is the first comprehensive study available in English In tracing the rising political fortunes of this family it is also possible to study the role of hereditary politicians in Japan the growth and evolution of Japanese political parties and perhaps most importantly the way political leadership functions in Japan a society known more for consensus building than strong leaders

Island Disputes and Maritime Regime Building in East Asia Min Gyo Koo, 2010-05-06

islands has emotional content far beyond any material significance because giving way on the island issue to Japan would be considered as once again compromising the sovereignty over the whole Korean peninsula For Japan the Dokdo issue may lack the same degree of strategic and economic values and emotional appeal as the other two territorial disputes that Japan has had with Russia and the two Chinas namely the Northern Territories Southern Kurile Islands and the Senkaku Islands respectively Nevertheless fishing resources and the maritime boundary issues became highly salient with the introduction of UNCLOS Also the legal political and economic issues surrounding Dokdo are all intertwined with Japan's other territorial disputes to the extent that concessions of sovereignty on any of these island disputes could jeopardize claims or negotiations concerning the rest South Korea and Japan have forged a deeper diplomatic and economic partnership over the past decade A new spirit of partnership after the landmark joint declaration of 1998 culminated in the successful co hosting of the World Cup 2002 At the end of 2003 the two neighbors began to negotiate an FTA to further strengthen their already close economic ties South Korea's decades long embargo on Japanese cultural products has now been lifted while a number of South Korean pop stars are currently sweeping across Japan creating the so called Korean Wave fever A pragmatic calculation of national interests would thus suggest cooperative behavior

The "Peak Oil" Scare and the Coming Oil Flood Michael C. Lynch, 2016-07-25

Is the earth's oil supply starting to run out or is there far more oil than some experts believe This book points out flaws in the research used to warn of an oil shortfall and predicts that large new reserves of oil are soon to be tapped In the last decade oil experts geologists and policy makers alike have warned that a peak in oil production around the world was about to be reached and that global economic distress would result when this occurred But it didn't happen The Peak Oil Scare and the Coming Oil Flood refutes the recent claims that world oil production is nearing a peak and threatening economic disaster by analyzing the methods used by the theory's proponents Author Michael C Lynch former researcher at Massachusetts Institute of Technology MIT debunks the Peak Oil crisis prediction and describes how the next few years will instead see large amounts of new supply that will bring oil prices down and boost the global economy This book will be invaluable to those involved in the energy industry including among those fields that are competing with oil as well as financial institutions for which the price of oil is of critical importance Lynch uncovers the facts behind the misleading news stories and media coverage on oil production as well as the analytic process that reveals the truth about the global oil supply General readers will be dismayed to learn how governments have frequently been led astray by seeming logical theories that prove to have no sound basis and will come away with a healthy sense of skepticism about popular economics

The Origins of the Bilateral Okinawa Problem Robert D. Eldridge, 2013-05-13 Using a multi national and multi archival approach to this diplomatic history study the author examines comprehensively and in great detail for the first time the origins of the so called Okinawa Problem Also includes four maps
