Daehnke, 2017-11-01 The Chinook Indian Nation whose ancestors lived along both shores of the lower Columbia River as well as north and south along the Pacific coast at the river s mouth continue to reside near traditional lands Because of its nonrecognized status the Chinook Indian Nation often faces challenges in its efforts to claim and control cultural heritage and its own history and to assert a right to place on the Columbia River Chinook Resilience is a collaborative ethnography of how the Chinook Indian Nation whose land and heritage are under assault continues to move forward and remain culturally strong and resilient Jon Daehnke focuses on Chinook participation in archaeological projects and sites of public history as well as the tribe s role in the revitalization of canoe culture in the Pacific Northwest This lived and embodied enactment of

Reconstructing Ancient Korean History Stella Xu,2016-05-12 This book examines the contested re readings of Korea in early Chinese historical records and their influence on the formation of Korean ness in later periods The earliest written records on Koreans are found in Chinese documents produced during the Han dynasty from the third century BCE to the third century CE Since then these early Chinese records have been used as primary sources for writing early Korean history in Korea China and Japan This study analyzes the various reinterpretations and utilizations of these early records that became more diverse by the late nineteenth century when the reconstruction of ancient history became a crucial part of the formation of Korean national consciousness Korea s modern historiography was complicated by a thirty five year colonial experience 1910 1945 under Japan During this period Japanese colonial scholars attempted to depict Korean history as

stagnant heteronymous and replete with factional strife while Korean nationalist historians strove to construct an indigenous Korean nation in order to mobilize Koreans national consciousness and recover political sovereignty While focused on Korea and Northeast Asia the links between historiography and political ideology investigated in this study are pertinent to historians in general

Convergent Evolution in Stone-Tool Technology Michael J. O'Brien, Briggs Buchanan, Metin I. Eren, 2024-05-21 Scholars from a variety of disciplines consider cases of convergence in lithic technology when functional or developmental constraints result in similar forms in independent lineages Hominins began using stone tools at least 2.6 million years ago perhaps even 3.4 million years ago Given the nearly ubiquitous use of stone tools by humans and their ancestors the study of lithic technology offers an important line of inquiry into questions of evolution and behavior This book examines convergence in stone tool making cases in which functional or developmental constraints result in similar forms in independent lineages Identifying examples of convergence and distinguishing convergence from divergence refutes hypotheses that suggest physical or cultural connection between far flung prehistoric toolmakers Employing phylogenetic analysis and stone tool replication the contributors show that similarity of tools can be caused by such common constraints as the fracture properties of stone or adaptive challenges rather than such unlikely phenomena as migration of toolmakers over an Arctic ice shelf Contributors R Alexander Bentley Briggs Buchanan Marcelo Cardillo Mathieu Charbonneau Judith Charlin Chris Clarkson Loren G Davis Metin I Eren Peter Hiscock Thomas A Jennings Steven L Kuhn Daniel E Lieberman George R McGhee Alex Mackay Michael J O'Brien Charlotte D Pevny Ceri Shipton Ashley M Smallwood Heather Smith Jayne Wilkins Samuel C Willis Nicolas Zayns

Ruins of Identity Mark James Hudson, 1999-08-01 Many Japanese people consider themselves to be part of an essentially unchanging and isolated ethnic unit in which the biological linguistic and cultural aspects of Japanese identity

overlap almost completely with each other In its examination of the processes of ethnogenesis the formation of ethnic groups in the Japanese Islands *Ruins of Identity* offers an approach to ethnicity that differs fundamentally from that found in most Japanese scholarship and popular discourse Following an extensive discussion of previous theories on the formation of Japanese language race and culture and the nationalistic ideologies that have affected research in these topics Mark Hudson presents a model of a core Japanese population based on the dual origin hypothesis currently favored by physical anthropologists According to this model the Jomon population which was present in Japan by at least the end of the Pleistocene was followed by agriculturalists from the Korean peninsula during the Yayoi period ca 400 BC to AD 300 Hudson analyzes further evidence of migrations and agricultural colonization in an impressive summary of recent cranial dental and genetic studies and in a careful examination of the linguistic and archaeological records The final sections of the book explore the cultural construction of Japanese ethnicity Cultural aspects of ethnicity do not emerge pristine and fully formed but are the result of cumulative negotiation Ethnic identity is continually recreated through interaction within and without the society concerned Such a view necessitates an approach to culture change that takes into account complex interactions with a larger system Accordingly Hudson considers post Yayoi ethnogenesis in Japan within the East Asian world system examining the role of interaction between core and periphery in the formation of new ethnic identities such as the Ainu He argues that the defining elements of the Ainu period and culture ca AD 1200 can be linked directly to a dramatic expansion in Japanese trade goods flowing north as Hokkaido became increasingly exploited by core regions to the south Highly original and at times controversial *Ruins of Identity* will be essential reading for students and scholars in Japanese studies and will be of interest to anthropologists and historians working on ethnicity in other parts of the world Text adopted at University of Chicago
