Partnerships Against Violence ,1995      **Partnerships Against Violence: Promising programs** ,1995      Cultural Dilemmas of Progressive Politics Stephen M. Hart,2010-03-15 Why have conservatives fared so much better than progressives in recent decades even though polls show no significant move to the right in public opinion Cultural Dilemmas of Progressive Politics highlights one reason that progressives often adopt impoverished modes of discourse ceding the moral high ground to their conservative rivals Stephen Hart also shows that some progressive groups are pioneering more robust ways of talking about their issues and values providing examples other progressives could emulate Through case studies of grassroots movements particularly the economic justice work carried on by congregation based community organizing and the pursuit of human rights by local members of Amnesty International Hart shows how these groups develop distinctive ways of talking about politics and create characteristic stories ceremonies and practices According to Hart the way people engage in politics matters just as much as the content of their ideas when activists make the moral basis for their activism clear engage issues with passion and articulate a unified social vision they challenge the recent ascendancy of conservative discourse On the basis of these case studies Hart addresses currently debated topics such as individualism in America and whether strains of political thought strongly informed by religion and moral values are compatible with tolerance and liberty

of experience providing the best book on the topic to date a gift to scholars and practitioners alike John Paul Lederach Professor of International Peacebuilding Kroc Institute University of Notre Dame Multicultural Geographies John W. Frazier, Florence M. Margai, 2010-09-01 In an approach that differs from other publications on U S multiculturalism Multicultural Geographies examines the changing patterns of race and ethnicity in the United States from geographical perspectives It reflects the significant contributions made by geographers in recent years to our understanding of the day to day experiences of American minorities and the historical and current processes that account for living spaces persistent patterns of segregation and group inequalities and the complex geographies that continue to evolve at local and regional levels across the country One of the book s underlying themes is the dynamic and complex nature of U S multiculturalism and the academic difficulty in evaluating it from a single viewpoint or theoretical stance As such Multicultural Geographies is derived from the joint efforts of selected scholars to bring together diverse perspectives and approaches in documenting the experiences of American minorities and the issues that affect them **Wilhelm Von Humboldt and Transcultural Communication in a Multicultural World** John Walker, 2022 Shows that the work of Wilhelm von Humboldt 1767 1835 forms a philosophy of dialogue and communication that is crucially relevant to contemporary debates in the Humanities Wilhelm von Humboldt 1767 1835 is the progenitor of modern linguistics and the originator of the modern teaching and research university However his work has received remarkably little attention in the English speaking world Humboldt conceives language as the source of cognition as well as communication both rooted in the possibility of human dialogue In the same way his idea of the university posits the free encounter between radically different personalities as the source of education for freedom For Humboldt both linguistic and intellectual communication are predicated firstly on dialogue between persons which is the prerequisite for all intercultural understanding Linking Humboldt s concept of dialogue to his idea of translation between languages persons and cultures this book shows how Humboldt s thought is of great contemporary relevance Humboldt shows a way beyond the false alternatives of culturalism the demand that a plurality of cultural and faith based traditions be recognized as sources of ethical and political legitimacy in the modern world and universalism the assertion of the primacy of a universal culture of human rights and the renewal of the European Enlightenment project John Walker explains how Humboldt s work emerges from the intellectual conflicts of his time and yet directly addresses the concerns of our own post secular and multicultural age *Public Commissions on Cultural and Religious Diversity* Solange Lefebvre, Patrice Brodeur, 2017-05-08 Due to growing negative perceptions about relations between historically entrenched dominant populations and various minority groups issues relating to the need to better manage cultural and religious diversity have been intensifying in many countries These negative perceptions have recently led to a significant increase in popular support for right and extreme right nationalist discourses and have created so much public tension that national governments have had no choice but to respond In the last two decades in several Western

contexts in particular the issues raised by such combined challenges have culminated in the creation of government initiated or private national commissions This book presents the results of a multidisciplinary analysis from a broader framework that includes the national public commissions which have addressed the challenges of managing cultural and religious diversity in Belgium Britain Canada Quebec France Morocco and Norway including also other cases of public management in Australia and Singapore It includes in depth studies of the issues and controversies examined by each of the commissions such as the ways they perceived the issues their results and impact the key political players involved the media debates and reception surrounding each commission the communication strategies and difficulties their leaders encountered as well as the legal aspects each commission has raised The reports represent a rich body of work charting the fundamental questions nations face about their nature history and future while the impact on peoples lives tells us much about different approaches to the issues of cultural identity between countries
