Pageant Of The Sea The Macpherson Collec:

Art and the Sea Emma Roberts, 2022-04-15 This edited collection re examines the relationship between art and the sea reflecting growing interest in the intersections between art and maritime history Artists have always been fascinated by and drawn to the sea and this book considers some of the themes and approaches in art that have evolved as a result of this captivation The chapters consider how an examination of art can provide new insights into existing knowledge of port and maritime history and are representative of a cultural turn in port and maritime studies which is becoming increasingly visible In **Art and the Sea** multiple perspectives are offered as a result of the contributors individual positions and methodologies some museological others art historical or maritime historical Each chapter proposes a new way of building upon available interpretations of port and maritime history whether this be to reject support or reconsider existing knowledge The book as a whole is a timely addition therefore to the developing body of revisionist texts in port and maritime history The interdisciplinary nature of the volume relates to a current trend for interdisciplinarity in art history and will appeal to those with an interest in art history geography sociology history and transport maritime studies

Writings on American History, 1964 *Ports of the World* Cindy McCreery, 1999 This book showcases some of the finest examples of The National Maritime Museum's collection of prints of ports from this period Prints are analysed as commercial and art objects rather than as simple historical records of matters maritime The aim is to address a broad audience including general readers of eighteenth and nineteenth century British and colonial history those interested in ports and maritime affairs and those with an interest in prints themselves The eighteenth and nineteenth centuries were a period of enormous political and commercial development across the globe Of particular importance was the revolution in transportation and communication by sea with the concomitant growth in size and importance of the seaport Despite growing awareness that the eighteenth and nineteenth centuries were a formative period in the development of maritime art there has been relatively little exploration of maritime prints This is extraordinary since the period c 1700 1870 was a golden age of print production and saw the development of new forms of engraving such as aquatint and lithography as well as the

production of beautiful examples of line engraving and woodcut The eighteenth and nineteenth centuries saw the establishment and expansion of major ports not just in Britain but in continental Europe Africa Asia Australia and in North and South America The National Maritime Museum upon which collection this book is based is at the centre of the preservation and display of Britain s maritime heritage Its print collection reveals the firm link between art and commerce in the development of these ports **The Connoisseur** ,1952 *Dictionary Catalog of the Art and Architecture Division* New York Public Library.
