Welter, 2019-11-19 This

volume analyzes the extraordinary patronage of modern architecture that the Tremaine family sustained for nearly four decades in the mid twentieth century From the late 1930s to the early 1970s two brothers Burton G Tremaine and Warren D Tremaine and their respective wives Emily Hall Tremaine and Katharine Williams Tremaine commissioned approximately thirty architecture and design projects Richard Neutra and Oscar Niemeyer designed the best known Tremaine houses Philip Johnson and Frank Lloyd Wright also created designs and buildings for the family that achieved iconic status in the modern movement Focusing on the Tremaines houses and other projects such as a visitor center at the meteor crater in Arizona this volume explores the Tremaines architectural patronage in terms of the family s motivations and values exposing patterns in what may appear as an eclectic collection of modern architecture Architectural historian Volker M Welter argues that the Tremaines patronage was not driven by any single factor rather it stemmed from a network of motives comprising the clients practical requirements their private and public lives and their ideas about architecture and art Painting Toward Architecture, the Miller Collection M. PAGON Espen Johnsen,2023-10-05 Through the 1940s and 1950s PAGON Progressive Architects Group Oslo Norway was an alliance of young CIAM affiliated Norwegian architects known for their innovative joint projects As a group PAGON went on to become largely overlooked in the history of modern architecture even though its individual members which included Sverre Fehn J rn Utzon Arne Korsmo and Christian Norberg Schulz became defining figures in Scandinavian and international modernism This book tells the story of PAGON for the first time offering an impressive account of the group s projects buildings and approach and demonstrating why PAGON s projects are ripe for reappraisal in the international history of modern architecture It shows how PAGON s architecture constitutes a unique continuity between the Scandinavian functionalism of the late 1930s and the modern movement in the US and an important transitional stage before the emergence of the better known neo avant garde groups within CIAM and Team 10 Published as part of the Bloomsbury Studies in Modern Architecture series which brings to light the work of significant yet overlooked modernist architects this book fills a gap in our understanding of mid century modern architecture and highlights the internationally diverse nature of the modern movement *Perle Fine* Perle Fine,Christine A. Berry,Lisa N. Peters,2011 Catalog of an exhibition held at Spanierman Modern New York Nov 10 Dec 10 2011 Point and Line to Plane Wassily Kandinsky,2012-03-15 This famous work by a pioneer in the movement to free art from the bonds of tradition explores the role of the line point and other key elements of non objective painting 127 illustrations **John Dalton** Elizabeth Musgrave,2023-08-10 This book addresses the work of architect John Dalton 1927 2007 an important voice in mid century modernism in Australia whose work despite his being exhibited and published internationally and also winning several awards for his designs is woefully little known Published as part of the Bloomsbury Studies in Modern Architecture series which brings to light the work of significant yet

overlooked modernist architects the book draws on previously unpublished archival documents including Dalton's drawings and paintings transcripts of lectures letters and articles plans and photographic images of built works to characterize the architect not only as a very talented designer but also as a pioneer of environmentalist thinking in Australia The book reveals how Dalton's architectural preoccupations parallel a transition in mid century modern architecture globally from functional efficiency and material rationalism to a concern with being in dialogue with the environment confirming a wider environmental turn that involved the integration of environmental with cultural considerations through relational thinking and which preceded and transcends the discipline's fascination with theoretical paradigms such as Critical Regionalism John Dalton Subtropical Modernism and the Turn to Environment in Australian Architecture is thus not only an important contribution to the existing scholarship on 20th century modernism but also to the current renewed interest in environmental design across the globe
