Painting Art And Craft Skills:

Musical Performance Stan Godlovitch, 2002-01-31 Most music we hear comes to us via a recording medium on which sound has been stored Such remoteness of music heard from music made has become so commonplace it is rarely considered Musical Performance A Philosophical Study considers the implications of this separation for live musical performance and music making Rather than examining the composition or perception of music as most philosophical accounts of music do Stan Godlovitch takes up the problem of how the tradition of active music playing and performing has been challenged by technology and what problems this poses for philosophical aesthetics Where does the value of musical performance lie Is human performance of music a mere transfer medium Is the performance of music more expressive than recorded music Musical Performance poses questions such as these to develop a fascinating account of music today musicians but via some recording medium on which sound has been stored

Expanded Painting Mark Titmarsh, 2017-08-24 The relevance of painting has been questioned many times over the last century by the arrival of photography installation art and digital technologies But rather than accept the death of painting Mark Titmarsh traces a paradoxical interface between this art form and its opposing forces to define a new practice known as expanded painting giving the term historical context theoretical structure and an important place in contemporary practice As the formal boundaries tumble the being of painting expands to become a kind of total art incorporating all other media including sculpture video and performance Painting is considered from three different perspectives ethnology art theory and ontology From an ethnological point of view painting is one of any number of activities that takes place within a culture In art theory terms painting is understood to produce objects of interest for humanities disciplines Yet painting as a medium often challenges both its object and image status expanding and creating hybrid works between painting objects screen media and text Ontologically painting is understood as an object of aesthetic discourse that in turn reflects historical states of being Thus Expanded Painting delivers a new kind of saying a post aesthetic discourse that is attuned to an uncanny tension between the presence and absence of painting

Dialogue on the Errors and Abuses of Painters Giovanni Andrea

Gilio,2018-04-17 Giovanni Andrea Gilio s Dialogue on the Errors and Abuses of Painters 1564 is one of the first treatises on art published in the post Tridentine period It remains a key primary source for the discussion of the reform of art as it unfolded at the time of the Council of Trent and the Catholic Reformation Relatively little is known about Gilio himself a cleric from Fabriano Italy He was evidently familiar with Cardinal Alessandro Farnese s lively court circle in Rome and dedicated his book to the cardinal His text available here in English in full for the first time takes the form of a spirited dialogue among six protagonists using the voices of each to present different points of view Through their dialogue Gilio grapples with a host of issues from the relationship between poetry and painting to the function of religious images to the effects such images have on viewers The primary focus is the proper representation of history and Michelangelo s Last Judgment fresco in the Sistine Chapel is the exemplary case Indeed Michelangelo s painting is both praised and condemned as an example of the possibilities and limits of art Although Gilio s dialogue is often quoted by art historians to point out the more controlling view of art and artists by the Roman Catholic Church the unabridged text reveals the nuanced and provisional debates happening during this critical era **The Oxford Handbook of Aesthetics** Jerrold
