*Extreme Programming Refactored* Don Rosenberg, Matt Stephens, 2008-01-01 Extreme Programming Refactored The Case Against XP featuring Songs of the Extremos takes a satirical look at the increasingly hyped extreme programming XP methodology It explores some quite astonishing Extremo quotes that have typified the XP approach quotes such as XPers are not afraid of oral documentation Schedule is the customer's problem Dependencies between requirements are more a matter of fear than reality and Concentration is the enemy In between the chuckles though there is a serious analysis of XP's many flaws The authors also examine C3 the first XP project whose team most of whom went on to get XP book deals shortly before C3's cancellation described themselves as the best team on the face of the Earth In a later chapter the authors also note that one problem which can affect pair programmers is overconfidence or is that eXcessive courage The authors examine whether the problems that led to C3's inexplicable cancellation could also afflict present day XP projects In the final chapter

Refactoring XP Matt and Doug suggest some ways of achieving the agile goals of XP using some XP practices used in moderation combined with other less risk laden methods

*The Search for Meaning at Work* Steve Van Valin, 2022-11-01 Offers a path to purpose and meaning at work to engage and support employees at every level While recent studies have shown that companies with high levels of employee engagement have 40% less turnover half the absenteeism rate and double the net profit compared to companies with low engagement many firms continue to struggle with engaging their employees and a mass exodus is under way Business leaders are unprepared to deliver the type of culture and leadership that infuses the work experience of their employees with purpose and meaning No surprise that a recent Gallup survey showed that only 15% of employees consider themselves engaged in their work In *The Search for Meaning at Work* Steve Van Valin an organizational culture consultant and former long time executive with QVC provides talent leaders and managers at all levels with a focused awareness and a robust set of actionable tools to meet the talent challenge head on Building on the research of Harvard professor Dr Teresa Amabile and others Van Valin's model is based on eleven Amplifiers of Meaning that identify and describe the core purpose that gives work meaning Without purpose there is no meaning Van Valin argues and without meaning there is no true engagement For many employees and their managers the purpose that drives an employee's motivation to work remains hidden as a result employees are disengaged leaving managers and leaders frustrated as they search for answers Van Valin's approach is a confident and creative challenge to leaders to think differently with greater empathy for the power of purpose and meaning in people's lives Each chapter contains personal observations revealing anecdotes and a playbook which provides specific and relevant actions steps the reader can follow to

### **Extreme Programming and Agile Processes in Software Engineering** Hubert

Baumeister, Michele Marchesi, Mike Holcombe, 2005-06-13 Extreme Programming has come a long way since its first use in the C3 project almost 10 years ago Agile methods have found their way into the mainstream and at the end of last year we saw the second edition of Kent Beck's book on Extreme Programming containing a major refactoring of XP This year the 6th International Conference on Extreme Programming and Agile Processes in Software Engineering took place June 18-23 in Sheffield As in the years before XP 2005 provided a unique forum for industry and academic professionals to discuss their needs and ideas on Extreme Programming and its methodologies These proceedings reflect the activities during the conference which ranged from presentation of research papers invited talks posters and demonstrations panels and activity sessions to tutorials and workshops Included are also papers from the Ph.D. and Master's Symposium which provided a forum for young researchers to present their results and to get feedback As varied as the activities were the topics of the conference which covered the presentation of new and improved practices empirical studies experience reports and case studies and last but not least the social aspects of agile methods The papers and the activities went through a rigorous reviewing process Each paper was reviewed by at least three Program Committee members and

was discussed carefully among the Program Committee Of 62 papers submitted only 22 were accepted as full papers *Software Process Improvement* Rory O'Connor, Nathan Baddoo, Kari Smolander, Richard Messnarz, 2008-09-08 This textbook is intended for use by SPI Software Process Improvement managers and researchers quality managers and experienced project and research managers The papers constitute the research proceedings of the 15th EuroSPI European Software Process Improvement www.eurospi.net conference in Dublin Ireland 3-5 September 2008 Since the first conference held in Dublin in 1994 EuroSPI conferences have been held in 1995 in Vienna Austria in 1997 in Budapest Hungary in 1998 in Gothenburg Sweden in 1999 in Pori Finland in 2000 in Copenhagen Denmark in 2001 in Limerick Ireland in 2002 in Nuremberg Germany in 2003 in Graz Austria in 2004 in Trondheim Norway in 2005 in Budapest Hungary in 2006 in Joensuu Finland and in 2007 in Potsdam Germany EuroSPI has established an experience library library.eurospi.net which will be continuously extended over the next few years and was made available to all attendees EuroSPI has also started an umbrella initiative for establishing a European Qualification Network in which different SPINs and national ventures can join mutually beneficial collaborations EQN EU Leonardo da Vinci network project With a general assembly on 15-16-10-2007 through EuroSPI

**Connected Gaming** Yasmin B. Kafai,Quinn Burke,2024-03-19 How making and sharing video games offer educational benefits for coding collaboration and creativity Over the last decade video games designed to teach academic content have multiplied Students can learn about Newtonian physics from a game or prep for entry into the army An emphasis on the instructionist approach to gaming however has overshadowed the constructionist approach in which students learn by designing their own games themselves In this book Yasmin Kafai and Quinn Burke discuss the educational benefits of constructionist gaming coding collaboration and creativity and the move from computational thinking toward computational participation Kafai and Burke point to recent developments that support a shift to game making from game playing including the game industry s acceptance and even promotion of modding and the growth of a DIY culture Kafai and Burke show that student designed games teach not only such technical skills as programming but also academic subjects Making games also teaches collaboration as students frequently work in teams to produce content and then share their games with in class or with others online Yet Kafai and Burke don t advocate abandoning instructionist for constructionist approaches Rather they argue for a more comprehensive inclusive idea of connected gaming in which both making and gaming play a part
