autors han encarat el repte d'escriure sobre un tema tan aparentment eteri i subtil com els valors per no en abstracte sin
referits a un altre tema complex que s tan material omnipresent i vast com el territori i la seva expressió perceptible el
paisatge El viatge entre els dos extrems l'espiritual i el material el cobreixen eficaçment i gilment per no pas amb celeritat sin
amb intensitat sense deixar res per verd valgui la dita també per la connotació ecològica que tanta importància té en el llibre o
per ser més exactes socioecològica que s el terme que Ramon Folch adopta com a definidor de la seva principal ocupació
professional i que té l'avantatge entre d'altres de més científics de connectar netament amb el de la geografia Josepa Bru El
resultat de la seva col·laboració des d'instàncies alhora diferents i properes s un llibre en què es trenen de forma sàlida

polític sin tots això alhora i de forma harmònica Biografia dels autors **Spanish Tourism Geographies** Asunción

Blanco-Romero,Macià Blázquez-Salom,2023-09-30 This book provides an overview of the progress in Spanish tourism
geography particularly after the overlay of financial pandemic and climate crisis by the scrutiny of the different geographical
areas and variables of analysis It shows the diversity of geographical environments and their varied relationship with tourism
from the emptied inland regions to urban heritage in historic centres to coastal resorts The book also introduces the analysis
of the most important variables when studying the implications of Spanish tourist specialization How are the beaches with
intensive tourist use managed What socio spatial processes do leisure rooted migrations involve What are the labour
conditions in the Spanish tourism industry How does saving water boost tourism growth The book offers answers through a
methodological specificity of Spanish geography which is highly oriented towards the analysis of public policies and even the
proposal of new planning and methodology formulas that go beyond diagnostic studies The domestic perspective or that of
insiders of these scientists residing in Spain bestows them with special codes for conducting interpretations and analyses
based on their everyday proximity to a territory characterised by its intense touristification The tourism and real estate
specialisation that Spanish society together with its territory and institutions have forged since the beginning of
developmentalism permeates this scientific analysis By providing a strong conceptual and empirical portrait this book is a
great resource for students and scholars in geography of tourism as well as for social scientists and policy makers

(conté CD-ROM) ,2010-12-29 Els documents que s apleguen en aquesta publicació i que provenen de les distintes pràctiques
pedagògiques i dels diversos programes d'estudi del Departament d'Escultura poden ser una excel·lent cartografia del

recorregut de la pràctica escultòrica des del classicisme fins a l'actualitat. En la diversitat de tractaments i continguts pedagògics impartits per l'equip docent del Departament d'Escultura hi podem detectar tres fases d'experiència assimilades al recorregut històric de la disciplina escultòrica: *Territori i urbanisme. Estat i alternatives*, **System of Open Spaces** Raquel Tardín, 2012-08-11. In the current panorama of urban growth and planning in many urban territories of western societies open spaces are residual spaces of urban occupation or are reserved for eventual occupation. Open spaces have been viewed in this manner in the earlier stages of the compact city and especially now in a time of the dispersed territories characterized by discontinuity, heterogeneity and fragmentation. The disciplinary perspectives of ecology, geology, landscape architecture and urbanism but also public opinion have for some time promoted the conservation and protection of the most valuable natural spaces and efforts have been made to remove such spaces from the real estate market. However such positions usually radical are insufficient for territorial equilibrium and inevitably lead to the progressive disappearance of valuable natural spaces.

Landscape Indicators Claudia Cassatella, Attilia Peano, 2011-01-28. In recent years EU policy towards the landscape has become better defined whereas at the same time the notion of landscape itself remains elusive. The need for indicators to evaluate and monitor the effects of landscape policies and plans is urgent. What is more landscape is one of the components considered in environmental reporting but unlike air, soil or water it is difficult to measure using quantitative methods. With studies on landscape indicators being as rare as they are this volume is an attempt to fill the gap dealing as it does with the definition and use of specific indicators for landscape assessment and monitoring. To tackle the diverse dimensions of the landscape whose complexity is well known the subject is approached by a multidisciplinary team of experts in landscape ecology, landscape history, landscape perception, regional planning, strategic environmental assessment and environmental impact assessment procedures and multi-criteria assessment methods. Individual chapters include comparative assessments of studies conducted thus far in the EU as well as detailed analyses of ecological, historical, perceptive, land use and economic ways of looking at landscape. As well as providing a rich source of references for researchers studying the landscape from a variety of perspectives the book will be required reading for European officials involved at any level in planning or assessing the landscape or environment.
