**The Hohenzollerns and the Nazis** Stephan Malinowski, 2025-01-30 AWARDED THE GERMAN NON FICTION PRIZE 2022 Malinowski's work is a near masterpiece relating a story not synthesised in this way before and about which any number of self-serving myths exist

Simon Heffer *The Telegraph* Stephan Malinowski's brilliant book strikes a balance between the forensic analysis of individual behaviour and a new understanding of how the toxic political culture of a defeated monarchy helped to disrupt democracy in Germany

Christopher Clark *The shocking true story of the German monarchy's collaboration with the Nazis* already a bestseller in Germany now in English for the first time

The disappearance of the Hohenzollern family from the history of Germany in November 1918 as the Kaiser fled into Dutch exile is one of the most startling rapid instances of a once all-powerful royal family becoming almost overnight irrelevant and marginal

Except this is not exactly what happened

Stephan Malinowski's German bestseller is an extraordinary work of recovery It suited both the Weimar Republic and then the Third Reich to view the Hohenzollerns with contempt and yet the royal family's hatred of the former and approval of the latter were for millions of Germans a significant factor in their own view of their country and its government

With forensic and often shocking detail Malinowski shows that far from being ridiculous marginal figures the

Hohenzollerns lay at the heart of Germany's ongoing nightmare. Despite formally losing power, the members of the royal family remained prominent, catastrophically allowing many other conservative Germans to stay distanced from the new republic and to eventually betray conservative traditions and values. Battered from both left and right, the Republic collapsed in 1933 in part because conservative forces, fearful of both Communism and Fascism, had abandoned their own principles just as much as the leading members of the former royal family had, who were themselves beguiled by and fooled by Hitler. This is an important and shocking book as well as a devastating picture of an inadequate and trivial royal family painfully underequipped to fulfil its role.

*Museums and Centers of Contemporary Art in Central Europe after 1989* Katarzyna Jagodzińska, 2019-07-02. *Museums and Centers of Contemporary Art in Central Europe* is a comprehensive study of the ecosystem of art museums and centers in the Czech Republic, Hungary, Poland, and Slovakia. Focusing on institutions founded after 1989, the book analyses a thirty-year boom in art exhibition space in these regions as well as a range of socio-political influences and curatorial debates that had a significant impact upon their development. Tracing the inspiration for the increase in art institutions and the models upon which these new spaces were based, Jagodzińska offers a unique insight into the history of museums in Central Europe. Providing analysis of a range of issues including private and public patronage, architecture, and changing visions of national museums of art, the book situates these newly founded institutions within their historical, political, and museological contexts. Considering whether and in what ways they can be said to have a shared regional identity that is distinct from institutions elsewhere, this valuable contribution paints a picture of the region in its entirety from the perspective of new institutions of art. Offering the first comprehensive study on the topic, *Museums and Centers of Contemporary Art in Central Europe* should be of great interest to academics, researchers, and postgraduate students engaged in the study of museums, art history, and architecture.

**From West to East** Scott D. Stull, 2015-04-01. This volume is a collection of current work in medieval archaeology, mainly as it is practiced in North America, with a comprehensive view rather than a local or regional perspective, allowing scholars from different regions access to research from across the medieval world. It includes chapters from well-established professors and up-and-coming scholars. The majority of the papers came from the first annual conference in medieval archaeology held at the State University of New York at Cortland in 2013. This conference gave those located in North America who were interested in medieval archaeology, both of Europe and the Mediterranean world, a chance to see what the latest developments were in the discipline. This volume includes both methodological and theoretical approaches such as integrating remote sensing with laser scanning or exploring the definition of ethnicity. Chapters include Viking Vinland, castles in Ireland and England, several Byzantine and Islamic era sites in the eastern Mediterranean, and various other topics ranging from a church in Hungary to the social construction of the medieval diet.
