The Papers of Joseph Henry Joseph Henry, 2004 *The Papers of Joseph Henry: January 1858-December 1865, The Smithsonian Years* Joseph Henry, 1972 **The Smithsonian's History of America in 101 Objects** Richard Kurin, 2016-10-25

The Smithsonian Institution is America's largest most important and most beloved repository for the objects that define our common heritage. Now Under Secretary for Art History and Culture Richard Kurin, aided by a team of top Smithsonian curators and scholars, has assembled a literary exhibition of 101 objects from across the Smithsonian's museums that together offer a marvelous new perspective on the history of the United States. Ranging from the earliest years of the pre-Columbian continent to the digital age and from the American Revolution to Vietnam, each entry pairs the fascinating history surrounding each object with the story of its creation or discovery and the place it has come to occupy in our national memory. Kurin sheds remarkable new light on objects we think we know well: from Lincoln's hat to Dorothy's ruby slippers and Julia Child's kitchen, including the often astonishing tales of how each made its way into the collections of the Smithsonian. Other objects will be eye-opening new discoveries for many but no less evocative of the most poignant and important moments of the American experience. Some objects, such as Harriet Tubman's hymnal, Sitting Bull's ledger, Cesar Chavez's union jacket, and the Enola Gay bomber, tell difficult stories from the nation's history and inspire controversies when exhibited at the Smithsonian. Others, from George Washington's sword to the space shuttle Discovery, celebrate the richness and vitality of the American spirit. In Kurin's hands, each object comes to vivid life, providing a tactile connection to American history. Beautifully designed and illustrated with color photographs throughout, *The Smithsonian's History of America in 101 Objects* is a rich and fascinating journey through America's collective memory and a beautiful object in its own right.

Strong deliberation honed literally millions of possibilities down to a careful selection of 101 remarkable objects that do justice to the history of our bountiful land and its people. That history begins with remains from the earliest years of the pre-Columbian continent and relics of the American Revolution and Civil War. The Papers of Joseph Henry: Jan. 1858-Dec. 1865 Joseph Henry,1972 **The Papers of Joseph Henry: January 1958-December 1865, the Smithsonian years** Joseph Henry,1972 *Smithsonian Stories* Wilton S. Dillon,2017-07-05 Why is the Smithsonian more than the Nation s Attic Or more than a museum complex As Wilton S Dillon shows the Smithsonian came to be the institution we know today under the twenty year leadership of Sun King S Dillon Ripley Ripley aspired to reinvent the Smithsonian as a great university with museums Although little understood by the public at large it began as a basic research center The Smithsonian remains a key contributor to the world of higher learning and functions

diplomatically as the ministry of culture for the United States Dillon provides backstage insights into Ripley's quest for the wholeness of knowledge He describes how he inspired its role as a theater of ideas as well as artifacts Under his tutelage the National Mall became a playground for world intelligentsia an intellectual free trade zone in the shadow of the nation's political capital Dillon reminds us that interdisciplinary international Smithsonian symposia foreshadowed twenty first century issues and trends His descriptions of the educational rewards of balancing tradition with the avant garde are inspiring As Dillon reminds us Ripley's twenty year reign may well have helped spark the waning embers of the Enlightenment

Exchanging Objects Catherine A. Nichols, 2021-04-01 As an historical account of the exchange of duplicate specimens between anthropologists at the Smithsonian Institution and museums collectors and schools around the world in the late nineteenth century this book reveals connections between both well known museums and little known local institutions created through the exchange of museum objects It explores how anthropologists categorized some objects in their collections as duplicate specimens making them potential candidates for exchange This historical form of what museum professionals would now call deaccessioning considers the intellectual and technical requirement of classifying objects in museums and suggests that a deeper understanding of past museum practice can inform mission driven contemporary museum work

Immeasurable Weather Sara J. Grossman, 2023-06-30 In *Immeasurable Weather* Sara J. Grossman explores how environmental data collection has been central to the larger project of settler colonialism in the United States She draws on an extensive archive of historical and meteorological data spanning two centuries to show how American scientific institutions used information about the weather to establish and reinforce the foundations of a white patriarchal settler society Grossman outlines the relationship between climate data and state power in key moments in the history of American weather science from the nineteenth century public

data gathering practices of settler farmers and teachers and the automation of weather data during the Dust Bowl to the role of meteorological satellites in data science's integration into the militarized state Throughout Grossman shows that weather science reproduced the natural world as something to be measured owned and exploited This data gathering she contends gave coherence to a national weather project and to a notion of the nation itself demonstrating that weather science's impact cannot be reduced to a set of quantifiable phenomena Lincoln and Darwin James Lander,2010-09-20 Born on the same day in 1809 Abraham Lincoln and Charles Darwin were true contemporaries Though shaped by vastly different environments they had remarkably similar values purposes and approaches In this exciting new study James Lander places these two iconic men side by side and reveals the parallel views they shared of man and God While Lincoln is renowned for his oratorical prowess and for the Emancipation Proclamation as well as many other accomplishments his scientific and technological interests are not widely recognized for example many Americans do not know that Lincoln is the only U S president to obtain a patent Darwin on the other hand is celebrated for his scientific achievements but not for his passionate commitment to the abolition of slavery which in part drove his research in evolution Both men took great pains to avoid causing unnecessary offense despite having abandoned traditional Christianity Each had one main adversary who endorsed scientific racism Lincoln had Stephen A Douglas and Darwin had Louis Agassiz With graceful and sophisticated writing Lander expands on these commonalities and uncovers more shared connections to people politics and events He traces how these two intellectual giants came to hold remarkably similar perspectives on the evils of racism the value of science and the uncertainties of conventional religion Separated by an ocean but joined in their ideas Lincoln and Darwin acted as trailblazers leading their societies toward greater freedom of thought and a greater acceptance of human equality This fascinating biographical examination brings the mid nineteenth century discourse about race science and humanitarian sensibility to the forefront using the mutual interests and pursuits of these two historic figures The Papers of Joseph Henry: January 1844-December 1846 : the Princeton years Joseph Henry,1972 **Inside Smithsonian Research** ,2005
