Survival Strategies of East German Companies in a Competitive Market after Reunification Ilka Wiedemann, 2006-06-16 Inhaltsangabe

Introduction The speed with which the Berlin Wall fell on the 9 November 1989 was both surprising and inspiring No longer would the people of East Germany be held captive under a repressive regime that deprived them not only of western commodities but of the most fundamental of human needs the freedom to thrive On 18 May 1990 politicians from the East and West signed a treaty creating an economic and social union This was followed by the Treaty of Unification on 31 August 1990 The dream of one Germany had become a reality It was now up to the German people to build a unified economy a task that posed difficult questions most importantly what to do with the state owned businesses that comprised the former GDR German Democratic Republic The former states of the GDR contain some of the highest growth regions in Europe Despite this there is social instability and high unemployment As of October 2003 the unemployment rate in East Germany was 17.3% compared with 8.0% for the West and 8.1% for the European Union While there is a necessity to improve the situation for all of Germany many hurdles remain In the case of unified Germany Deutschland einig Vaterland is more than a slogan of unity it is a statement for economic survival The aim of this thesis will be to explore the following questions How did three East German companies the Rotk ppchen sparkling wine company the Florena cosmetics company and the Fit detergent company survive and even thrive after reunification How did the Treuhand Anstalt THA or Trust Agency help these companies and what affect has this had on the German economy What were some peripheral reasons for economic survival including government incentives global economic expansion during the 1990s and ostalgie What were some East German companies that did not survive and why did they fail when others succeeded How could these survival strategies be applied to other companies in other nations and what are the lessons for the future In answering these questions it will be necessary to explore the history not only of the three companies Rotk ppchen Florena and Fit but also of the East German market Due to the complexity of this topic however this thesis will remain focused on three main survival strategies These will include how finding a niche market using mergers and acquisitions and using company and product diversification have helped companies

Political Economy of Agrarian Reform in Central and Eastern Europe Johan F.M Swinnen, 2018-08-10 First published in 1997 this volume

responds to the challenges faced in post Communist Eastern Europe in the privatization and decollectivisation of agriculture. The contributors feature specialists in agriculture, finance, economics and political science. They begin with discussions on the political economy of privatization and a historical overview and continue with thoughts on agricultural decollectivization in twelve countries across Eastern Europe including Albania, the Baltic countries, Bulgaria, Slovakia and Hungary. The project reflects the basic framework of endogenous institutional change and policy analysis and uses a political economy framework to explain and interpret these agricultural trends.

Recasting East Germany Chris Flockton, Eva Kolinsky, 2012-11-12. The transformation of east Germany since unification has wrought vast changes in the economy and in society and left deep scars as the types of social protection offered by the centralised socialism of the previous regime gave way to uncertainties and individualised life chances. *Social Transformation in Eastern Germany* investigates the deep economic and social processes which east Germany has undergone, highlighting the restructuring of the social impacts and the stresses of adjustment experienced by key social groups whose workplace and social context has been recast almost out of recognition since 1990.

The Political Economy of Property Rights David L. Weimer, 1997-04-13. Originally published in 1997, *The Political Economy of Property Rights* reports on comparative research into the transformation of property rights in post communist countries and China. Two important theoretical questions unify the contributions: what aspects of political systems give credibility to systems of property rights? What can be learned from the transformation of property rights in post communist countries about the large scale change of economic institutions? The contributors consider the credibility of property rights as arising from the strategic interaction of political and economic actors and they apply this perspective and test its implications using a variety of qualitative and quantitative methods. Overall, the volume demonstrates the value of coordinated cross national research by area specialists sharing a common focus on questions of political economy.

Between State Capitalism and Globalisation Gareth Dale, 2004. This book is an exploration of the economic history of the German Democratic Republic with an emphasis upon its confrontation by and contribution towards economic and military competition on the world stage. Beginning with an analysis of the Soviet bloc as a state capitalist formation, the GDR's economic history is charted with detailed examinations of the challenges to Soviet style autarky that were posed by the globalising world market as well as of GDR policymakers' attempts to use Western imports and credits as a whip to spur growth. The book's central section consists of an exploration of the ambivalent attitudes of East German policymakers and industrialists towards their West German counterparts in the 1980s as the whip was transformed into an ever tightening noose of debt. Here a prodigious range of secondary sources as well as hitherto unpublished documents from the archives of the old regime are drawn upon to document the means by which relative economic decline and dependency upon Western institutions came to constrain the options available to the East German nomenklatura. Finally, this study analyses the political economy of the 1989 revolution and unification and of post unification Eastern Germany.

Re-thinking the Political Economy of Immigration Control Lea Sitkin,2019-10-08 This book offers a systematic exploration of the changing politics around immigration and the impact of resultant policy regimes on immigrant communities It does so across a uniquely wide range of policy areas immigration admissions citizenship internal immigration controls labour market regulation the welfare state and the criminal justice system Challenging the current state of theoretical literature on the criminalisation or marginalisation of immigrants this book examines the ways in which immigrants are treated differently in different national contexts as well as the institutional factors driving this variation To this end it offers data on overall trends across 20 high income countries as well as more detailed case studies on the UK Australia the USA Germany Italy and Sweden At the same time it charts an emerging common regime of exploitation which threatens the depiction of some countries as more inclusionary than others The politicisation of immigration has intensified the challenge for policy makers who today must respond to populist calls for restrictive immigration policy whilst simultaneously heeding business groups calls for cheap labour and respecting legal obligations that require more liberal and welcoming policy regimes The resultant policy regimes often have counterproductive effects in many cases marginalising immigrant communities and contributing to the growth of underground and criminal economies Finally developments on the horizon driven by technological progress threaten to intensify distributional challenges While these will make the politics around immigration even more fraught in coming decades the real issue is not immigration but the loss of good jobs which will have serious implications across all Western countries This book will appeal to scholars and students of criminology social policy political economy political sociology the sociology of immigration and race and migration studies

JEFF ROMM PROFESSOR FOR RESOURCE POLICY UNIVERSITY OF CALIFORNIA AT BERKELEY US The book addresses the theoretically and politically most important division of social organization into public and private The authors bring an exciting multidisciplinary perspective to bear on changing and multiple publics and the strength of relationships connecting these two spheres in rural development and natural resource governance The contributions range from consumer health and food safety soil science forestry and water management to sociological and economic aspects of natural resource property and governance

FRANZ VON BENDA BECKMANN MAX PLANCK INSTITUTE FOR SOCIAL ANTHROPOLOGY

GERMANY Natural resources have historically been considered as being governed in public or private spheres that is by the state on behalf of the people or by companies or individuals driven by the market This dichotomy between private and public is now recognized as overly simplistic and it is clear that publics and privates operate at a range of levels and with differing degrees of separation or overlap Bringing together a group of internationally respected researchers this book provides a new perspective on prominent issues in resource governance including the state NGOs civil society communities participation devolution privatization and hybrid institutions highlighting the three dimensional nature of relations between public and private It builds on empirical analyses from six fields of natural resource governance agri environment biodiversity bioenergy food quality and safety forestry and rural water and employs a comparative approach that goes beyond the specificities of individual policy fields recognizing shared elements and allowing for a greater understanding of the dynamics underlying governance processes Introductions to the volume and to each section summarize the key debates and highlight linkages between chapters This is essential reading for academics students and policy experts in natural resource governance development and environmental policy

The Political Economy of Germany under Chancellors Kohl and Schröder
 Jeremy Leaman, 2009-07-01 While unification has undoubtedly had major effects on Germany's political economy the pattern of current policy making preferences was established at an earlier stage in particular at the beginning of the Kohl era in 1982 This essentially neo liberal pattern can be seen to have dominated the modalities chosen to guide Germany through the process of unification and was mirrored in developments in other OECD countries and in particular within the EU This book demonstrates that the three policy imperatives neo liberal structural reform European monetary integration and unification produced a policy mix which together with other structural economic and demographic factors has had disappointing results in all three areas and hampered Germany's overall economic development

The New Germany and the New Europe Paul B. Stares, 2010-12-01 Since the first heroic and largely spontaneous acts precipitated the end of the Cold War Europe has been transformed in a truly remarkable and wholly unforeseen manner Germany has been unified the Warsaw Pact has collapsed and the Soviet Union has disintegrated leaving in its wake many new independent states These momentous events have taken place so rapidly and often in such confused circumstances that their full meaning has barely been comprehended let alone assimilated A clearer and deeper appreciation of the forces and processes unleashed by the recent changes is vitally important however to meet the challenges and exploit the opportunities that now present themselves in Europe This volume therefore is intended to promote wider understanding of the key issues and it represents the most comprehensive assessment to date of the new Germany and the new Europe The volume begins with detailed accounts by U S and German scholars of how unification came about and the resulting changes to the political economy security policy and foreign relations A complementary section discusses the implications for the rest of Europe as well as Japan While the focus of the book is on the new Germany two separate chapters provide specific designs for a new adoption of a general system of cooperative security

After The Wall Patricia J Smith, 2019-05-20 Since the fall of the Berlin Wall in November 1989 Germany has faced complex challenges The rapid introduction of political economic and social union in 1990 joined East and West in an experiment without precedent as the former German Democratic Republic adopted the structures of the Federal Republic of Germany Related issues include the adoption of the **The Political Economy Of Public Sector Reform And Privatization** Ezra Suleiman, John Waterbury, 2019-07-09 This book suggests some of the ways in which levels of development shape public sector reform and privatization in developed and developing countries showing that conservative as well as socialist governments were committed to increasing the state's guiding role in the political economy **Varieties of Transition** Claus Offe, 1997 The nine essays in this volume explore such topics as the characteristics and shortcomings of state socialist societies and of democratic capitalism the role of ethnic politics in East European transitions issues of retribution and restitution in the transition to a democratic society based on a private economy and the effects the collapse of Communism have had on Western democracies and on the Left in particular **Organizing Democracy in Eastern Germany** Stephen Padgett, 2000 The emergence of interest group politics is one of the decisive factors in democratic transformation in post communist society Stephen Padgett argues that evidence from eastern Germany suggests that market transition produces rather open and fluid societies in which group interests and identities are tenuous Lacking a supportive social infrastructure interest groups operate on entrepreneurial lines a form of associational activity which falls far short of pluralist ideals With its accelerated transition to a market economy eastern Germany provides a fast forward study of an advanced post communist society which enables us to anticipate the social structures and issues shaping interest group politics in the newly democratizing states of east central Europe Examining a number of different interest groups and comparing a number of countries across east central Europe this book may also offer a vision of the future of interest group politics in the West
