Politics of Democratization in Europe Tuija Pulkkinen,2016-03-23 Democratization is a concept often used in academic book titles yet not many of them deal with the initial breakthrough of democratization This research companion presents an alternative view to the widespread assumption that Western democracies should be the normative reference for the study of democratization elsewhere Rather it questions the universal validity of such an assumption by searching the history of European politics and by paying specific attention to the struggles of democratization accomplished outside Western Europe The authors apply a comparative approach to analyzing debates in the primary sources in a number of countries and languages and situate the results into a broader European context Focusing on European democratization from different historical and analytical perspectives they discuss the politics concepts and histories involved in democratization as a complex of changes that has altered the conditions of political action and debate in the continent for the past two centuries

The Ashgate Research Companion to the Politics of Democratization in Europe José María Rosales,Professor Tuija Pulkkinen,Professor Kari Palonen,2013-03-28 Democratization is a concept often used in academic book titles yet not many of them deal with the initial breakthrough of democratization This research companion applies a comparative approach to analyzing debates in a number of countries It discusses the politics concepts and histories involved in European democratization as a complex of changes that has altered the conditions of political action and debate in the continent for the past two centuries *The Darkest Sides of Politics, I* Jeffrey M. Bale,2017-09-04 This book examines a wide array of

phenomena that arguably constitute the most noxious extreme terrifying murderous secretive authoritarian and or anti democratic aspects of national and international politics Scholars should not ignore these dark sides of politics however unpleasant they may be since they influence the world in a multitude of harmful ways The first volume in this two volume collection focuses on the history of underground neo fascist networks in the post World War II era neo fascist paramilitary and terrorist groups operating in Europe and Latin America in the 1960s and 1970s and the manipulation of those and other terrorist organizations by the security forces of various states both authoritarian and democratic A range of global case studies are included all of which focus on the lesser known activities of certain secular extremist milieus This collection should prove to be essential reading for students and researchers interested in understanding seemingly arcane but nonetheless important dimensions of recent historical and contemporary politics *Party Ideology, Public Discourse, and Reform Governance in China* Yayoi Kato,2021-02-23 This book analyzes the operational dimension of the Chinese communist party s ideology and reveals the complex relationship between ideology language governance and political power in the

broader context of China's economic reforms. The book questions state-centric legitimacy focused and content-based approaches to party ideology and analyzes its practice. Conceptualizing public discourse as a language game played by the rules set by the party, the book examines how party ideology is operationalized by multiple state and non-state actors as political rhetoric for persuasion in contentious reform discourses. Through the case studies of the policy discourses over state-owned enterprise reforms under Deng Xiaoping, Jiang Zemin, and Xi Jinping, the book highlights ideology's double-edged operational functions: consensus-inducing and conflict-inducing, and claims that ideology can be a double-edged sword for rulers. It is a vital resource to legitimate and sustain their rule yet it potentially destabilizes their rule as well. The book proposes new angles to study ideology, legitimacy, and governance and is aimed at political scientists who study authoritarian governance, policy process, and political communication. Its multi-disciplinary approach also appeals to sociologists, media communication scholars, and linguists who work on rhetoric, political language, and media discourses.

Fighting the Last War Jeffrey M. Bale, Tamir Bar-On, 2024-01-24

The authors argue that the potential threat of a resurgence of fascism has been consistently exaggerated from 1945 until present day; that the ongoing lack of conceptual and definitional clarity with respect to terms like fascism, the radical right, the alt-right, white supremacism, populism, racism, etc., has enabled ill-informed or dishonest commentators to distort their meaning and abusively misapply those labels so as to delegitimize their political opponents; and that the political and economic elites in charge of contemporary Western societies are now deliberately exaggerating and exploiting the threat posed by the domestic radical right in order to facilitate vilifying, harassing, deplatforming, censoring, canceling, and repressing disgruntled citizens, no matter where they may lie along the political spectrum, who openly criticize and vigorously oppose their agendas. The authors also advocate the use of well-

established scholarly methods for carrying out research on the right and provide precise definitions of various terms in order to facilitate the development of more accurate categorizations

Religion as Brand An Analogy to Reconceptualize Religion delves into the complex relationship between religions and brands Through a process of abstraction the book creates an analogy to compare religion with brand which clarifies the similar functionalities of both within society and explores the complexities in this comparison beyond mere semiotic aspects Through

this innovative lens it unveils the common mechanisms of both phenomena and unveils fundamental incentives and needs in human being nature that are evoked and fulfilled by these two social institutions Across four diverse case studies the book examines this analogy in real world contexts and demonstrates how this approach can generate hypotheses These cases explore diverse scenarios including ISIS and Al Qaeda as sub brands of Islam the dynamic of Islam and Judaism as brands in the Israeli Palestinian conflict Ashura ceremonies as a campaign for Shi i Islam and the narrativity of Evangelicalism as a sub brand of Christianity This thought provoking exploration generates new hypotheses and challenges preconceived notions of both religion and brand

Ethnic Stratification and Economic Inequality around the World Max Haller in collaboration, Anja Eder, 2016-03-03 The modern world is characterised by pervasive economic inequalities Strong economic growth in some developing countries has contributed to a degree to a reduction in the levels of inequality between nations yet inequality within nations remains high and in some cases continues to increase Ethnic Stratification and Economic Inequality around the World investigates the reasons for these striking differences exploring the coincidence and interaction between economic stratification and ethnic differentiation Drawing on extensive international survey and statistical data the author develops a new theory and concrete hypotheses concerning the conditions which lead toward extreme inequality and those which tend toward greater equality A systematic examination of the interaction between class structures social stratification and ethnic differentiation this book sheds light on the manner in which the resulting social structures produce different levels of economic inequality offering a fivefold typology of patterns of ethnic stratification which can be applied to present day world regions Drawing on the work of Max Weber to provide a rigorous investigation of inequality around the world it demonstrates what sociology as a science of social reality can significantly contribute to our understanding of global economic stratification The book is relevant for a wide social scientific audience particularly for sociologists economists and political scientists working in a comparative perspective

Pathways to Demographic Adaptation Josefine Syssner, 2020-01-09 This book builds on case studies in depopulating and shrinking areas in Northern Europe While most contemporary literature on shrinkage focuses on these issues from a planning standpoint this book uniquely applies a policy perspective when approaching the material The book assesses the potential of demographic adaptation policies to manage depopulation that is policy programs aiming at managing depopulation through adaptation rather than through growth policies intended to foster population growth In 6 chapters the book acts as an up to date resource on demographic adaptation for master and Ph D students researchers and practitioners working in local and regional development governance and planning Chapter 1 gives an overview of recent demographic trends in Northern Europe and introduces the theoretical differences between growth policy and adaptation policy Chapter 2 accounts for the policy concept and introduces a framework for how local adaptation policies could be systematically analysed Chapter 3 suggests that the Nordic welfare states exhibit two characteristics that prove to be relevant when discussing the consequences and policy

implications of demographic decline i.e. an extremely sparse population structure and an ambitious welfare assignment that in many respects has been devolved to the local level of government Chapter 4 suggests that whether shrinkage constitutes a problem or not depends upon the interpretations of those in power but also upon political economic and geographic conditions Chapter 5 seeks to understand why local level policymakers avoid developing strategies for how to handle long term population decline Chapter 6 summarizes the points of the previous chapters and concludes that local governments in shrinking areas ought to develop local adaptation policies These policies however also need to be subjected to critical analysis and the chapter introduces a model for how local adaptation policy priorities could be assessed in a more structured manner
